------	------------	--

# Newegg Marketplace API

Newegg Marketplace API is a set of API services that enable sellers to manage items, orders, accounts and reports.

Please go through the following before you start:

1. [Registering To User API Service](#)
2. [Newegg Marketplace API Authentication](#)
3. [SSL Requirements for Inbound Connections](#)
4. [URL Case-sensitive](#)
5. [Pacific Standard Time Requirement](#)
6. [Throttling](#)
7. [Create Your Own Client Library](#)

The following sections define all available services in details to serve different business operations:

8. [Service Status](#)
9. [Item Management](#)
10. [Order Management](#)
11. [Newegg Shipping Label Service](#)
12. [DataFeed Management](#)
13. [RMA Management](#)
14. [Reports Management](#)
15. [Seller Management](#)
16. [SBN \(Shipped by Newegg\) Management](#)

## 1. Registering To Use API Services

If you would like to use Newegg Marketplace API services, please contact your Newegg Marketplace seller account manager to obtain your Newegg API credentials.

**Obtain your API account API Key & Secret Key** – once your API account request has been approved and created, Newegg Marketplace integration team will assign and send a pair of API key and secret key to you. You must provide the API key and the secret key per function as authentication in order to access Newegg Marketplace API services.

**Authorize the access rights to 3<sup>rd</sup> party developer** – if you want to allow your 3rd party developer(s) to access the Newegg Marketplace API services, with your authorization, we can assign an additional pair of API key and secret key to the developer(s). The 3<sup>rd</sup> party developer(s) must present the additionally assigned API key and secret key in order to access Newegg Marketplace API services on your behalf.

**\*Note:** We highly recommend that you do not let any unauthorized personnel or 3<sup>rd</sup> party developers have access to your original pair of API key and secret key. Anyone with this information can access Newegg Marketplace API services as you. As stated before, we can issue additional API key and secret key to your 3<sup>rd</sup> party developers, but you should keep your original key information to yourself.

## 2. Newegg Marketplace API Authentication

To access Newegg Marketplace API services, you must provide authentication information listed below:

Name	Required?	Description
Authorization	Yes	Format: Authorization:{authorization}  API key: the unique API Key which Newegg Marketplace integration team assigned to you
Secretkey	Yes	Format: Secretkey:{secretkey}  Secret key: the unique Secret Key which Newegg Marketplace integration team assigned to you

Example: XML, Request

```
POST https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid=A006
Authorization: 727ddc067f4d115bd544aff46bc15634
SecretKey: 1B6B1383-01D1-4A1E-BA53-05DECE9BD765
Content-Type: application/xml
Accept: application/xml
```

Example: Json, Request

```
POST https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid=A006
Authorization: 727ddc067f4d115bd544aff46bc15634
SecretKey: 1B6B1383-01D1-4A1E-BA53-05DECE9BD765
Content-Type: application/json
Accept: application/json
```

## 2.1. Authentication Failure Errors

API key authentication failure:

Error Code	Description
InvalidConsumerKey	The provided consumer key is incorrect or invalid

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>InvalidConsumerKey</Code>
        <Message>The provided consumer key is incorrect or invalid.</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "InvalidConsumerKey",
    "Message": "The provided consumer key is malformed or otherwise invalid."
}
```

Secret Key authentication failure:

Error Code	Description
InvalidToken	SellerID is null
InvalidToken	Secret Key is null
InvalidToken	Invalid Secret Key
AccessDenied	The specified seller ID is invalid or you do not have authorization from this seller
AccessDenied	The API services for this seller account has been deactivated

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>InvalidToken</Code>
        <Message>Secret Key is null.</Message>
    </Error>
</Errors>
```

```
</Error>  
</Errors>
```

Example: Json, Response

```
{  
    "Code": "InvalidToken",  
    "Message": "The provided secret key is null."  
}
```

## 2.2. Authorization for Third-party Developer

If you are a third-party developer/integration partner who wants to access and utilize Newegg Marketplace API services for a seller, you must:

- Get one API key from our Newegg Marketplace Integration Team (Datafeeds@Newegg.com)
- Get the Seller ID and Secret key from the seller/Newegg that authorized the Newegg Marketplace API services access to you, for each seller you are integrating for. (Seller and 3<sup>rd</sup> party developer can contact Newegg Marketplace for this information)
- Attach the API key and Secret key in the http header, and specify the Seller ID in the URL, and please make sure the Secret Key is for the correct seller.

For the below example, the Secret Key must be the one corresponding to seller ID A001.

Example: XML, Request

```
POST https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid=A001  
Authorization: 727ddc067f4d115bd544aff46bc15634  
SecretKey: 1B6B1383-01D1-4A1E-BA53-05DECE9BD765  
Content-Type: application/xml  
Accept: application/xml
```

Example: Json, Request

```
POST https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid=A001  
Authorization: 727ddc067f4d115bd544aff46bc15634  
SecretKey: 1B6B1383-01D1-4A1E-BA53-05DECE9BD765  
Content-Type: application/json
```

```
Accept: application/json
```

Otherwise the system will respond with below error message due to invalid secret key.

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>InvalidToken</Code>
        <Message>Invalid secret key.</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "InvalidToken",
    "Message": "Invalid secret key."
}
```

## 3.TLS Requirements for Inbound Connections

Inbound connections to Newegg Marketplace API endpoints require TLS version 1.0 or higher.

## 4.URL Case-sensitive

Newegg Marketplace API URL's are case-sensitive. Please make sure your request URL (excluding Seller ID) is all in lower case. And the URL cannot contain any blank space or line break. Seller ID is an exception, and can be capitalized.

Example:

```
https://api.newegg.com/marketplace/contentmgmt/item
https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid={sellerid}
https://api.newegg.com/marketplace/contentmgmt/item/price?sellerid={sellerid}
https://api.newegg.com/marketplace/contentmgmt/item/inventoryandprice?sellerid={sellerid}
https://api.newegg.com/marketplace/ordermgmt/orderstatus
```

```
https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}
```

## 5. Pacific Standard Time Requirement

Newegg Marketplace API requires the datetime field to be in Pacific Standard Time in all request and response content. Please ensure in all your files and requests, the datetime field are specified in Pacific Standard Time.

The C# code example as following demonstrates how to convert your local time to a Pacific Standard Time.

Example: C#

```
//Your local time
System.DateTime localTimeNow = System.DateTime.Now;
//Get the PST time zone info
System.TimeZoneInfo pstTimeZoneInfo =
    TimeZoneInfo.FindSystemTimeZoneById("Pacific Standard Time");

//Convert your local time to PST time
DateTime pstTime = ResolveAmbiguousOrInvalidTime(localTimeNow);

//Resolve Ambiguous or invalid time issue between PDT and PST exchange
private static DateTime ResolveAmbiguousOrInvalidTime(DateTime ambiguousOrInvalidTime)
{
    TimeZoneInfo timeZoneInfo = TimeZoneInfo.FindSystemTimeZoneById("Pacific Standard
Time");

    if(timeZoneInfo.IsInvalidTime(ambiguousOrInvalidTime) ||
timeZoneInfo.IsAmbiguousTime(ambiguousOrInvalidTime))
    {
        //DateTime utcTime = ambiguousOrInvalidTime.ToUniversalTime();
        DateTime utcTime = DateTime.SpecifyKind(ambiguousOrInvalidTime -
TimeZoneInfo.Local.BaseUtcOffset, DateTimeKind.Utc);

        return TimeZoneInfo.ConvertTime(utcTime, timeZoneInfo);
    }

    return ambiguousOrInvalidTime;
}
```

# 6.Throttling

Newegg Marketplace API supports large variety of application and process millions of API requests daily. To maintain stable service with a high level of availability, Newegg Marketplace limits the API usage.

## 6.1. Per Seller

Rate limiting of each API request is based on per-seller basis.

## 6.2. Rate Limit

Rate limits are divided into minute intervals. This means you have a maximum number of requests you can submit to a specific function in a one-minute period.

## 6.3. Datafeed Limit

Certain datafeed related functions have the hourly limitation of request and the maximum size of each request. This means you have a maximum allowance of requests you can submit to a specific function in a one-hour period. And each request cannot exceed the maximum size limitation.

Below is the response if you exceed the limit:

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>DF012</Code>
        <Message>Your feed with request ID: 2291326430 exceeded the hourly allowance and cannot be processed. Please submit your feed again after 2016-12-16 11:05:00.</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "DF012",
```

```
        "Message": "Your feed with request ID: 2291326430 exceeded the hourly allowance and cannot be  
processed. Please submit your feed again after 2016-12-16 11:05:00."  
    }
```

## 6.4. HTTP Headers and Response Codes

The following elements in HTTP headers can be used for diagnosing a given rate limit for the API service endpoint.

- **X-RateLimit-Limit:** Request limit per defined time window
- **X-RateLimit-Remaining:** The number of requests left for the time window.
- **X-RateLimit-ResetTime:** the time for resetting the remaining records.
- **X-RecordCount-Limit:** the max record seller can upload.
- **X-RecordCount-Remaining:** the # of record count left for the time window
- **X-RecordCount-ResetTime:** the time for resetting the remaining records.

The API will return a HTTP 429 “Too Many Requests” response code, and the following error will be returned in the response body:

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors xmlns:xsd="http://www.w3.org/2001/XMLSchema" xmlns:xsi="http://www.w3.org/2001/XMLSchema-  
instance">  
    <Error>  
        <Code>429</Code>  
        <Message>Too many request.</Message>  
    </Error>  
</Errors>
```

Example: Json, Response

```
[  
    {  
        "Code": "429",  
        "Message": "Too many request."  
    }  
]
```

# 7. Create Your Own Client Library

You can create your own client library to use with the Newegg Marketplace API. Your code should construct and sign a request in the format expected by the Newegg Marketplace API, and then you can parse the XML response.

You can access the Newegg Marketplace API by following steps:

1. Determine the correct Newegg Marketplace API URL to use.
3. Specify the parameter value in the request URL.
4. Specify the correct HTTP request method and the xml/Json content types that are accepted.
5. Attach your API Key and the Secret Key in requests (refer to authentication examples above).
5. Construct the request body as required. Submit the HTTP request.
6. Parse the response.

## 7.1. Request Format

Newegg Marketplace API supports query/update requests for calling Restful service actions. Query requests are simple HTTP requests, using the GET or POST method with query parameters in the URL or HTTP body respectively. Update requests using the PUT or DELETE method with updated parameters in the URL or HTTP body respectively.

Newegg Marketplace API requires the use of **HTTPS** in order to prevent third-party eavesdropping on your communication with Newegg.

## 7.2. Create a HTTP Request

To create a Newegg Marketplace API query/update request, you need to first construct a correctly formatted request URL. You can refer to the URL template of the API services you want to use (please refer to the API reference section).

Below are the possible value lists in your HTTP request:

Name	Required?	Description
Request URL	Yes	The Newegg Marketplace API service endpoint you are using
Request Method	Yes	The GET/POST or PUT/DELETE method of the API service required
Body Content-type	No	The XML/Json format of the content in the request body. The default is XML.
Response Content-type	No	The XML/Json format of the content in the response. The default is XML.
Authentication header	Yes	Format: Authorization:{api-key} The API key of the authorized API developer
SecretKey header	Yes	Format: Secretkey:{secretkey}

		The secret key of an authorized API developer
RAW body	No	Pass parameters by the request body. The format of the content should conform to the specification of the API service.

Note: The API reference section includes the important information for each API function for your reference.

Example:

```
GET
Https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
Sellerid	Yes	Your seller ID on Newegg Marketplace
OrderNumber	Yes	The order number

#### URL Resource Information:

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
GET	Required	XML, Json	XML, Json	1000 per min per client

**HTTP method** – specifies which request method.

**Authentication** -- indicates this service needs an authentication to use.

**Request Formats** – the request parameters format in the request body.

**Response Formats** – the supported format of the response content.

**Rate Limited** – API Request Limit

#### Request Parameters:

**URL Parameters** – the required parameters in the request URL.

**Request Parameters** – some specific parameters in the request body. The format shall be XML or Json; you can get the supported type from the “request format” in the URL Resource Information section above.

## 7.3. Bad Request

Newegg Marketplace API will return a bad request (HTTP status code = 400) if you submitted an inappropriate request in the following types:

- Illegal request body. Such as not well-formatted XML or incorrect tag or data type.

**Example: XML, Response**

```
<?xml version="1.0" encoding="utf-8"?>
<Errors xmlns:xsd="http://www.w3.org/2001/XMLSchema" xmlns:xsi="http://www.w3.org/2001/XMLSchema-
instance">
<Error>
<Code>CE003</Code>
<Message>XML parsing error. The 'NeweggAPIRequest1' start tag on line 1 position 2 does not
match the end tag of 'NeweggAPIRequest'. Line 1, position 451.</Message>
</Error>
</Errors>
```

**Example: Json, Response**

```
{
  "Code": "CE003",
  "Message": "XML parsing error. The 'NeweggAPIRequest1' start tag on line 1 position 2 does not
match the end tag of 'NeweggAPIRequest'. Line 1, position 451."
}
```

- Business validation failure. Invalid data request or fail to match business requirement. For the detail error code and message please refer to the “Request Failure Errors” part at the end of every service definition.

**Example: XML, Response**

```
<?xml version="1.0" encoding="utf-8" ?>
<Errors>
<Error>
<Code>SO011</Code>
<Message>Only unshipped orders can be shipped. The order status is currently Closed</Message>
</Error>
</Errors>
```

**Example: Json, Response**

```
{
  "Code": "SO011",
  "Message": "Only unshipped orders can be shipped. The order status is currently Closed"
}
```

In order to parse error messages in your own programs correctly, please refer to “Exception Handling for Bad Request” in the “Code Examples” section.

## 7.4. Code Examples

\* Please note that these examples are provided to you with the simple purpose of demonstrating how you can use Newegg Marketplace API functions and resources. The examples do not take in consideration of extra requirements such as authentication/security required by each programming language.

### C# Example

The code example below demonstrates how to query the inventory quantity of the specified Newegg Item “9SIA00600000023” for the seller “A006” in .NET C#

1. Create a new class to de-serialize the response:

Example: C#, Inventory response entity

```
public class InventoryResult
{
    public string SellerID { get; set; }
    public string ItemNumber { get; set; }
    public int AvailableQuantity { get; set; }
    public string Active { get; set; }
    public string SellerPartNumber { get; set; }
    public string ShipByNewegg { get; set; }
}
```

2. Get the inventory available quantity:

Example: C#, Get Item Inventory

```
Console.WriteLine(string.Format("Newegg Marketplace API - Get Inventory request at:{0}",
DateTime.Now.ToString()));
Console.WriteLine("");
Console.WriteLine("*****");
Console.WriteLine("");
try
{
    InventoryResult inventoryResult = null;

    //Determine the correct Newegg Marketplace API endpoint to use.
```

```

// Please make sure your request URL is all in lower case
string endpoint =
@"https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid={0}";
endpoint = String.Format(endpoint, "A006");

//Create an HttpWebRequest
System.Net.HttpWebRequest request =
    System.Net.WebRequest.Create(endpoint) as HttpWebRequest;

//Remove proxy
request.Proxy = null;

//Specify the request method
request.Method = "POST";

//Specify the xml/Json request and response content types.
request.ContentType = "application/xml";
request.Accept = "application/xml";

//Attach authorization information
request.Headers.Add("Authorization", "your API-key here");
request.Headers.Add("Secretkey", "your secretkey here");

//Construct the query criteria in the request body
string requestBody = @"
<ContentQueryCriteria>
<Type>1</Type>
<Value>A006ZX-35833</Value>
</ContentQueryCriteria>";

byte[] byteStr = Encoding.UTF8.GetBytes(requestBody);
request.ContentLength = byteStr.Length;

using (Stream stream = request.GetRequestStream())
{
    stream.Write(byteStr, 0, byteStr.Length);
}

//Parse the response
using (HttpWebResponse response = request.GetResponse() as HttpWebResponse)
{

```

```

        if (response.StatusCode != HttpStatusCode.OK)
        {
            Console.WriteLine(String.Format("Code:{0}.Error:{1}",
                response.StatusCode.ToString(), response.StatusDescription));
        }

        return;
    }

    using (Stream responseStream = response.GetResponseStream())
    {
        XmlSerializer serializer =
            new XmlSerializer(typeof(InventoryResult));
        inventoryResult =
            serializer.Deserialize(responseStream) as InventoryResult;
    }
}

string sellerID = inventoryResult.SellerID;
string itemNumber = inventoryResult.ItemNumber;
int availableQuantity = inventoryResult.AvailableQuantity;

string message = String.Format("SellerID:{0} ItemNumber:{1} Available Quantity:{2} \r\n
Active:{3} SellerPartNumber:{4} ShipByNewegg:{5}",
    inventoryResult.SellerID,
    inventoryResult.ItemNumber,
    inventoryResult.AvailableQuantity,
    inventoryResult.Active,
    inventoryResult.SellerPartNumber,
    inventoryResult.ShipByNewegg);

Console.WriteLine(message);
}

catch (WebException we)//Error Handling for Bad Request
{
    if (((WebException)we).Status == WebExceptionStatus.ProtocolError)
    {
       WebResponse errResp = ((WebException)we).Response;
        using (Stream respStream = errResp.GetResponseStream())
        {
            StreamReader reader = new StreamReader(respStream);
            Console.WriteLine(String.Format("{0}", reader.ReadToEnd()));
        }
    }
}

```

```

        }
    }

}

catch (Exception ex) //unhandle error
{
    Console.WriteLine(string.Format("exception: at time:{0}", DateTime.Now.ToString()));
    Console.WriteLine(ex.Message + "---->");
    Console.WriteLine(ex.StackTrace.ToString());
}

Console.WriteLine("");
Console.WriteLine("*****");
Console.WriteLine("");
Console.WriteLine("Please input any key to exit.....");
Console.ReadLine();

```

### Error Handling for Bad Request (Status Code = 400)

```

try
{
//Your code here
}

catch (WebException we)//Error Handling for Bad Request
{
    if (((WebException)we).Status == WebExceptionStatus.ProtocolError)
    {
        WebResponse errResp = ((WebException)we).Response;
        using (Stream respStream = errResp.GetResponseStream())
        {
            StreamReader reader = new StreamReader(respStream);
            Console.WriteLine(String.Format("{0}", reader.ReadToEnd()));
        }
    }
}

```

### Java Example

The following example demonstrates how to retrieve order information through Newegg Marketplace API in Java.

```

/*
 * To change this template, choose Tools | Templates
 * And open the template in the editor.
 */
package marketplaceapi_java_demo;

import java.io.BufferedReader;
import java.io.InputStreamReader;
import java.io.OutputStream;
import java.net.MalformedURLException;
import java.net.URL;
import java.security.cert.X509Certificate;
import java.util.Calendar;
import javax.net.ssl.HostnameVerifier;
import javax.net.ssl.HttpsURLConnection;
import javax.net.ssl.SSLContext;
import javax.net.ssl.SSLSocket;
import javax.net.ssl.TrustManager;
import javax.net.ssl.X509TrustManager;

public class MarketplaceAPI_Java_Demo {

    /**
     * @param args the command line arguments
     */
    public static void main(String[] args) throws Exception{
        GetOrderInfo();
    }

    private static void GetOrderInfo() throws Exception{

        System.out.println("[" + Calendar.getInstance().getTime() + "]Newegg Marketplace API -
GetOrderInfo:");
        System.out.println("-----");

        String requestUrl =
"https://api.newegg.com/marketplace/ordermgmt/order/orderinfo?sellerid=A006";

        try {

            // Create a trust manager that does not validate certificate chains

```

```

TrustManager[] trustAllCerts = new TrustManager[] {new X509TrustManager() {
    public java.security.cert.X509Certificate[] getAcceptedIssuers() {
        return null;
    }
    public void checkClientTrusted(X509Certificate[] certs, String authType) {
    }
    public void checkServerTrusted(X509Certificate[] certs, String authType) {
    }
}
};

// Install the all-trusting trust manager
SSLContext sc = SSLContext.getInstance("SSL");
sc.init(null, trustAllCerts, new java.security.SecureRandom());

HttpsURLConnection.setDefaultSSLSocketFactory(sc.getSocketFactory());

// Create all-trusting host name verifier
HostnameVerifier allHostsValid = new HostnameVerifier() {
    public boolean verify(String hostname, SSLSocket session) {
        return true;
    }
};

// Install the all-trusting host verifier
HttpsURLConnection.setDefaultHostnameVerifier(allHostsValid);

URL url = new URL(requestUrl);

HttpsURLConnection httpsConnection = (HttpsURLConnection)url.openConnection();

//javax.net.ssl. = false;
//Set accepted format in response message:application/xml|application/json
httpsConnection.setRequestProperty("Accept", "application/xml");
//Set the accepted format in request body:application/xml|application/json
httpsConnection.setRequestProperty("content-type", "application/xml");
//Set the request method:GET|PUT|POST
httpsConnection.setRequestMethod("PUT");

//Set authorization key

```

```

httpsConnection.setRequestProperty("Authorization",
"720ddc067f4d115bd544aff46bc75634");

//Set secret-key
httpsConnection.setRequestProperty("SecretKey", "21EC2020-3AEA-1069-A2DD-
08002B30309D");

httpsConnection.setDoInput(true);
httpsConnection.setDoOutput(true);

String requestStr = "<NeweggAPIRequest>
+ "<OperationType>GetOrderInfoRequest</OperationType>"
+ "<RequestBody>
+ "<PageIndex>1</PageIndex>
+ "<PageSize>10</PageSize>
+ "<RequestCriteria>
+ "<OrderNumberList>
+ "<OrderNumber>159243598</OrderNumber>
+ "<OrderNumber>41473642</OrderNumber>
+ "</OrderNumberList>
+ "<Status>1</Status>
+ "<Type>1</Type>
+ "<OrderDateFrom>2011-01-01 09:30:47</OrderDateFrom>
+ "<OrderDateTo>2011-12-17 09:30:47</OrderDateTo>
+ "<OrderDownloaded>0</OrderDownloaded>
+ "</RequestCriteria>
+ "</RequestBody>
+ "</NeweggAPIRequest>";

byte[] requestBody = requestStr.getBytes();

//Set content-length
httpsConnection.setRequestProperty("Content-Length",
String.valueOf(requestBody.length));

OutputStream outStream = httpsConnection.getOutputStream();
outStream.write(requestBody);
outStream.close();

InputStreamReader inputReader = new
InputStreamReader(httpsConnection.getInputStream());
BufferedReader reader = new BufferedReader(inputReader);

```

```

String responseBody = "";

while(reader.ready()) {
    responseBody += reader.readLine();
}

reader.close();
inputReader.close();

System.out.println("[" + Calendar.getInstance().getTime() + "]Response Message:");
System.out.println("-----");
System.out.println(responseBody);

} catch (MalformedURLException ex) {
    System.out.println("Illegal request URI:" + ex.getMessage());
}
catch(Exception e){
    System.out.println("Exception:" + e.getMessage());
    //Error Handling for Bad Request
    InputStreamReader errorReader = new
InputStreamReader(httpsConnection.getErrorStream());
    BufferedReader bufferReader = new BufferedReader(errorReader);

    String errorMsg = "";

    while(bufferReader.ready()){
        errorMsg += bufferReader.readLine();
    }

    bufferReader.close();
    errorReader.close();

    System.out.println(errorMsg);
}

}

}

```

## Error Handling for Bad Request (Status Code = 400)

```
try
{
//Your code here
}

catch(Exception e){
    System.out.println("Exception:" + e.getMessage());
    //Error Handling for Bad Request
    InputStreamReader errorReader = new InputStreamReader(httpsConnection.getErrorStream());
    BufferedReader bufferReader = new BufferedReader(errorReader);

    String errorMsg = "";

    while(bufferReader.ready()){
        errorMsg += bufferReader.readLine();
    }

    bufferReader.close();
    errorReader.close();

    System.out.println(errorMsg);
}
```

## PHP Example

The code example below demonstrates how to access Newegg API with PHP curl extension under windows operation system.

1. Download `php_curl.dll`
2. Edit `php.ini` and apply the extension:  
`Extension=php_curl.dll`
3. Restart the apache server

Example:PHP, Get order status

```
GET:

<?php

// Request Newegg API! REST Web Service using
```

```

// HTTP POST with curl. PHP4/PHP5
// Allows retrieval of HTTP status code for error reporting

error_reporting(E_ALL);

$SellerID = 'A006';
// The POST URL and parameters
// Please make sure your request URL is all in lower case
$request =
'https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/12345678?sellerid='.$SellerID;

$header_array =array('Content-Type:application/xml',
'Accept:application/xml',
'Authorization: your API-key here',
'SecretKey: your secretkey here');

try
{
    // Get the curl session object
    $session = curl_init($request);

    // Set the POST options.
    curl_setopt($session, CURLOPT_HEADER, 1);
    curl_setopt($session,CURLOPT_HTTPHEADER,$header_array);
    curl_setopt($session, CURLOPT_HEADER, false);
    curl_setopt($session, CURLOPT_RETURNTRANSFER, true);
    curl_setopt($session, CURLOPT_SSL_VERIFYPeer, 0);

    // Do the POST and then close the session
    $response = curl_exec($session);
    curl_close($session);

    print $response;
}
catch (InvalidArgumentException $e)
{
    curl_close($session);
    throw $e;
}
catch (Exception $e)
{

```

```

curl_close($session);
throw $e;
}
?>

```

#### Example:PHP, Get item inventory

POST:

```

<?php

// Request Newegg API! REST Web Service using
// HTTP POST with curl. PHP4/PHP5
// Allows retrieval of HTTP status code for error reporting

error_reporting(E_ALL);

$SellerID = 'A006';
// The POST URL and parameters
// Please make sure your request URL is all in lower case
$request = 'https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid='.$SellerID;

$body = '<ContentQueryCriteria>
<Type>0</Type>
<Value>9SIA08I0492622</Value>
</ContentQueryCriteria>';

$header_array =array('Content-Type:application/xml',
'Accept:application/xml',
'Authorization: your API-key here',
'SecretKey: your secretkey here');

try
{
    // Get the curl session object
    $session = curl_init($request);
    $putString = stripslashes($body);
    $putData = tmpfile();
    fwrite($putData, $putString);
    fseek($putData, 0);
}

```

```

// Set the POST options.
curl_setopt($session, CURLOPT_HEADER, 1);

    curl_close($session);
    throw $e;
}

catch (Exception $e)
{
    curl_close($session);
    throw $e;
}

?>

```

The code example below demonstrates how to access Newegg API with pecl http request extension under LINUX system.

1. Download pecl\_http extension from [http://pecl.php.net/package/pecl\\_http](http://pecl.php.net/package/pecl_http), get the latest stable version such as 1.7.1
2. Install the extension( refer to :

[http://www.zipservers.com/community/showthread.php?59-How-to-install-PECL-Modules-on-Linux\)](http://www.zipservers.com/community/showthread.php?59-How-to-install-PECL-Modules-on-Linux)

```

[root@server ]# cd /root/ ; wget http://pecl.php.net/get/pecl_http-1.6.5.tgz
[root@server ]# tar -zxvf pecl_http-1.6.5.tgz
[root@server ]# cd pecl_http-1.6.5
[root@server ]# phpize
[root@server ]# ./configure
[root@server ]# make
[root@server ]# make test
[root@server ]# make install
[root@server ]# php -i | grep "Configuration File"

Configuration File (php.ini) Path => /usr/local/lib
Loaded Configuration File => /usr/local/lib/php.ini

```

3. Switch on the extension in the php.ini

```
[root@server ]# vi /usr/local/lib/php.ini
```

And add extension=http.so

#### 4. Restart the apache serve

Example: PHP, Get Item Inventory

```
<?php
//request url
// Please make sure your request URL is all in lower case
$url =
" https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid=A006";

//set the api-key & secret-key
$header_array = array('Authorization' => '{your API-key here}',
                      'Secretkey' => '{your secret-key here}');

//set the body if necessary
$body = "<ContentQueryCriteria>
<Condition>1</Condition>
<Type>0</Type>
<Value>9SIA0B992342342</Value>
</ContentQueryCriteria>";

$options = array(headers => $header_array);

//create the httprequest object
//specfiy the request method:HTTP_METH_GET|HTTP_METH_POST|HTTP_METH_PUT
$httpRequest_OBJ = new httpRequest($url, HTTP_METH_POST, $options);

//add the content type
$httpRequest_OBJ->setContentType = 'Content-Type: text/xml';
//add the raw post data
//{$httpRequest_OBJ->setRawPostData ($body)};
$httpRequest_OBJ->setBody ($body);

try
{
    //send the http request
    $result = $httpRequest_OBJ->send();
} catch(HttpException $ex)
{
    if (isset($ex->innerException)) {
        echo $ex->innerException->getMessage();
    }
}
```

```

        exit;
    } else {
        echo $ex;
        exit;
    }
}

$response_code = $httpRequest_OBJ->getResponseCode();
if($response_code == "200")
{
    //request success
    echo $response_code;
    echo $httpRequest_OBJ->getResponseBody();
}
else
{
    //failure
    echo $response_code;
    echo $httpRequest_OBJ->getResponseBody();
}
?>

```

### Error Handling for Bad Request (Status Code = 400)

```

// Do the POST and then close the session
$response = curl_exec($session);
curl_close($session);

//The error message will be stored in this variable if it's a bad request
print $response;

```

## Python Example

The code example below demonstrates how to access Newegg API in Python.

Example: Python, Get Item Price

```

import httplib2
#import pyodbc
import string

```

```

all_items_location_id=521799450
# whether to print item data retrieved from database
print_item_data=True

# items data retrieved from database
items=[]

def _put_call(url, xmlfeed):
    h = httplib2.Http(".cache", disable_ssl_certificate_validation=True)
    resp, content = h.request(url, "POST", body=xmlfeed, headers={'content-
type':'application/xml','Authorization': 'your API-key here', 'Secretkey':'your secretkey here' })
    print "response header from Newegg:", resp
    print "response body from Newegg:", content

def get_price():

    header = '<?xml version="1.0" encoding="UTF-8"?>'
    xmlfeed=[]
    xmlfeed.append(header)
    xmlfeed.append('<ContentQueryCriteria>')
    xmlfeed.append('<Type>1</Type>')
    xmlfeed.append('<Value>TCR8996</Value>')
    xmlfeed.append('</ContentQueryCriteria>')
    xmlfeed=string.join(xmlfeed,'')

    print "Get item price:"
    put_call_url = 'https://api.newegg.com/marketplace/contentmgmt/item/price?sellerid=A006'
    _put_call(put_call_url,xmlfeed)

get_price()

```

## Error Handling for Bad Request (Status Code = 400)

```
def _put_call(url, xmlfeed):
    h = httplib2.Http(".cache", disable_ssl_certificate_validation=True)
    resp, content = h.request(url, "POST", body=xmlfeed, headers={'content-
type':'application/xml','Authorization': 'your API-key here', 'Secretkey':'your secretkey here' })
    print "response header from Newegg:", resp
    #The error message will be stored in this variable if it's a bad request
    print "response body from Newegg:", content
```

# 8. Service Status

Newegg Marketplace API provides an interface in every major service group to allow you to check whether the service you are invoking is available or not. Each major service group is listed in the Parameters section, domain field description.

## 8.1. Get Service Status

Return each major service group's availability.

### 8.1.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/{domain}/servicestatus?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
domain	Yes	Major Service Groups Options: - contentmgmt - ordermgmt - datafeedmgmt - servicemgmt - reportmgmt - sellermgmt - sbnmgmt - shippinglabelmgmt

Sellerid	Yes	Your seller ID on Newegg Marketplace
----------	-----	--------------------------------------

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
GET	Required	XML, Json	XML, Json	1000 per min per client

### 8.1.2. Request Body

Example: XML, Request

```
GET https://api.newegg.com/marketplace/contentmgmt/servicestatus?sellerid={SellerID}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml
```

Example: Json, Request

```
GET https://api.newegg.com/marketplace/contentmgmt/servicestatus?sellerid={SellerID}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json
```

### 8.1.3. Response Body

Attribute		Format	Description
NeweggAPIResponse Response Body	IsSuccess	String	Used to identify whether the requested service is successful or not. Returns true or false.
	OperationType	String	Fixed value: GetServiceStatus
	SellerID	String	Your Seller ID
	Status	Integer	0. Service unavailable 1. Service available
	Timestamp	String	Request date time (Pacific Standard Time)
	Message	String	When service is unavailable (status = 0), this field will provide a detailed explanation.

## Example: XML, Service Available Response

### XSD

API Schema > SellerMgmt > SellerStatusCheck > GetSellerAccountStatusResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>
  <OperationType>GetServiceStatus</OperationType>
  <SellerID>A006</SellerID>
  <ResponseBody>
    <Status>1</Status>
    <Timestamp>2/14/2012 9:42:46</Timestamp>
  </ResponseBody>
</NeweggAPIResponse>
```

## Example: Json, Service Available Response

```
{
  "IsSuccess": "true",
  "OperationType": "GetServiceStatus",
  "SellerID": "A006",
  "ResponseBody": {
    "Status": "1",
    "Timestamp": "2/14/2012 9:42:46"
  }
}
```

## Example: XML, Service Unavailable Response

### XSD

API Schema > SellerMgmt > SellerStatusCheck > GetSellerAccountStatusResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>
  <OperationType>GetServiceStatus</OperationType>
  <SellerID>A006</SellerID>
  <ResponseBody>
    <Status>0</Status>
```

```

<Timestamp>2/15/2012 14:50:38</Timestamp>
<Message>The service is unavailable or experiencing extremely high error rates.</Message>
</ResponseBody>
</NeweggAPIResponse>

```

#### Example: Json, Service Unavailable Response

```

{
  "NeweggAPIResponse": {
    "IsSuccess": "true",
    "OperationType": "GetServiceStatus",
    "SellerID": "A006",
    "ResponseBody": {
      "Status": "0",
      "Timestamp": "2/15/2012 2:50:38",
      "Message": "The service is unavailable or experiencing extremely high error rates."
    }
  }
}

```

#### 8.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

#### Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>
    <Code>CE001</Code>
    <Message>SellerID cannot be null or empty</Message>
  </Error>
</Errors>

```

#### Example: Json, Response

```

{
  "Code": "CE001",
}

```

```
    "Message": "SellerID cannot be null or empty"
```

```
}
```

## 8.2. Failover Endpoints for API Service

To avoid any downtime caused by network, failover endpoints are available for accessing Newegg API services:

- **[https://api.newegg.com \(Primary\)](https://api.newegg.com)**
- **<https://api01.newegg.com>**
- **<https://api02.newegg.com>**

The first listed endpoint should be configured as the primary and all other endpoints are treated as backups. Please configuring your requests always sent only to the primary endpoint: <http://api.newegg.com>. If the primary endpoint fails, please redirect your requests to the next active endpoint. For best performance, you should always switches back to the primary endpoint as soon as it becomes available.

To check the current status of all available endpoints, please visit: <http://www.newegg.com/sellers/EndpointTest.html>

# 9. Item Management

The Item Management service group contains functions that will allow you to perform simple item related updates such as Update Item Inventory, Price, Shipping and Status.

For item creation / information update (creating an item listing for the seller, updating item listing for the seller such as item description, item title, item detailed properties and values), please refer to [DataFeed Management section](#) and refer to ITEM\_DATA attribute type.

## 9.1. Get Item Inventory

Get the inventory quantity of an item by NE Item #, seller part #, or UPC code.

**Note: This feature will not support multiple warehouse locations. For getting the inventory status for multiple warehouse locations, see [International Program- Get Item Inventory](#).**

### 9.1.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid={sellerid}&version={versionno}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace
version	Yes	Available version numbers: 304

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	1000 per min per client

### 9.1.2. Request Body

Attribute		Required?	Format	Description
	Condition	No	Integer	<p>1: New 2: Refurbished 3: Used – Like New 4: Used – Very Good 5: Used – Good 6: Used – Acceptable</p> <p>Only applies if type = [2-UPC code]. If type does not = [2-UPC code], then this column will be disregarded.</p> <p>If left blank, default value will be New.</p>
ContentQueryCriteria	Type	Yes	Integer	<p>0: NE Item# 1: Seller Part# 2: UPC Code</p>
	Value	Yes	String	A string according to specified type

Example: XML, Request

XSD

API Schema > ContentMgmt > GetInventory > GetItemInventoryRequest.xsd

```

POST
https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid={SellerID}&version=304
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

<ContentQueryCriteria>
  <Type>1</Type>
  <Value>A006testitem201201021459</Value>
</ContentQueryCriteria>

```

Example: Json, Request

```

POST https://api.newegg.com/marketplace/contentmgmt/item/inventory?sellerid={SellerID}
Authorization: 720ddc067f4d115bd544aff46bc75634

```

```
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
```

```
Content-Type: application/json
```

```
Accept: application/json
```

```
{
    "Type": "1",
    "Value": "A006testitem201201021459"
}
```

### 9.1.3. Response Body

Attribute		Format	Description
InventoryResult	SellerId	String	Your seller ID
	ItemNumber	String	Newegg item number
	SellerPartNumber	String	Seller part number
	FulfillmentOption	Integer	0: ShippedBySeller 1: ShippedByNewegg 2: All
	Active	Integer	0: Inactive 1: Active
	AvailableQuantity	Integer	Total available inventory
	WarehouseAllocation	WarehouseCode	<p>Currently available Newegg warehouse for SBN (Shipped By Newegg): 06: Tennessee Bulk Warehouse 07: California Small Warehouse 08: California Bulk Item Warehouse 10: New Jersey Bulk Warehouse 12: Tennessee Small Warehouse 14: New Jersey Small Warehouse</p> <p>Note: this information will be returned for the SBN (Shipped by Newegg) item only.</p> <p>Shipped by seller: SBS</p>
	Quantity	Integer	Current available inventory in this warehouse.

## Example: XML, Response

### XSD

API Schema > ContentMgmt > GetInventory > GetItemInventoryResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<InventoryResult>
    <SellerID>A006</SellerID>
    <ItemNumber>9SIA0060884598</ItemNumber>
    <SellerPartNumber>A006testitem201201021459</SellerPartNumber>
    <FulfillmentOption>2</FulfillmentOption>
    <Active>0</Active>
    <AvailableQuantity>50</AvailableQuantity>
    <WarehouseAllocation>
        <Warehouse>
            <WarehouseCode>07</WarehouseCode>
            <Quantity>3</Quantity>
        </Warehouse>
        <Warehouse>
            <WarehouseCode>12</WarehouseCode>
            <Quantity>37</Quantity>
        </Warehouse>
        <Warehouse>
            <WarehouseCode>SBS</WarehouseCode>
            <Quantity>10</Quantity>
        </Warehouse>
    </WarehouseAllocation>
</InventoryResult>
```

## Example: Json, Response

```
{
    "Active": "0",
    "ItemNumber": "9SIA0060884598",
    "SellerID": "A006",
    "SellerPartNumber": "A006testitem201201021459",

    "FulfillmentOption": "1",
    "AvailableQuantity": 0,
```

```

"WarehouseAllocation": {
  "Warehouse": [
    {
      "WarehouseCode": "07",
      "Quantity": "3"
    },
    {
      "WarehouseCode": "12",
      "Quantity": "37"
    }
  ]
}

```

#### 9.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT001	Invalid ItemNumber
CT002	Invalid SellerPartNumber
CT003	Invalid UPCCode
CT005	Invalid Action Type. We only support: 0 – NE Item#, 1 -- Seller Parts#, 2 -- UPC Code
CT010	Cannot find item with specified item condition.
CT026	No data found
CT074	Get Item Inventory call does not support multiple warehouse locations. For multiple warehouse locations, please use International Program - Get Item Inventory.

Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>
    <Code>CT002</Code>
    <Message>Invalid SellerPartNumber</Message>
  </Error>
</Errors>

```

Example: Json, Response

```
{  
    "Code": "CT002",  
    "Message": "Invalid SellerPartNumber"  
}
```

## 9.2. Get Item Price

Get the pricing information of a specified item by NE Item#, seller part#, or UPC code.

### 9.2.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/contentmgmt/item/price?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	1000 per min per client

### 9.2.2. Request Body

Attribute		Required?	Format	Description
ContentQueryCriteria	Type	Yes	Integer	0: NE Item# 1: Seller Part# 2: UPC Code
	Value	Yes	String	A string according to a given inquiry type
	Condition	No	Integer	1: new 2: Refurbished 3: Used – Like New 4: Used – Very Good 5: Used – Good

			<b>6: Used – Acceptable</b>
			<p>Only applies if type = [2-UPC code]. If type does not = [2-UPC code], then this column will be disregarded.</p> <p>If left blank, default value will be New.</p>

Example: XML, Request

## XSD

API Schema > ContentMgmt > GetPrice > GetItemPriceRequest.xsd

```
POST https://api.newegg.com/marketplace/contentmgmt/item/price?sellerid={SellerID}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

<ContentQueryCriteria>
  <Type>1</Type>
  <Value>A006testitem201201021459</Value>
</ContentQueryCriteria>
```

Example: Json, Request

```
POST https://api.newegg.com/marketplace/contentmgmt/item/price?sellerid={SellerID}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

{
  "Type": "1",
  "Value": "A006testitem201201021459"
}
```

### 9.2.3. Response Body

Attribute		Format	Description
PriceResult	SellerId	String	Your seller ID
	ItemNumber	String	Newegg item number
	SellerPartNumber	String	Seller part number
	MSRP	Decimal	The manufacturer's suggested retail price
	MAP	Decimal	Minimum Advertised Price. If the Selling Price is below the defined MAP, website will ask customer to add item to shopping cart to see the item's price.
	CheckoutMAP	Integer	<p>0: False 1: True</p> <p>If Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. The MAP value will not be considered. Another words, if this field is marked as true, it doesn't matter if the selling price is above or below MAP, the customer will always need to add item to cart and go to checkout to see item's price.</p> <p>If MAP is greater than 0.00 and CheckoutMAP is left blank, by default CheckoutMAP will equal False.</p>
	Selling Price	Decimal	The actual selling price
	EnableFreeShipping	Integer	<p>0: Default 1: Free Shipping</p>
	On promotion	Integer, separated by comma	<p>0: No active Promotion 1: Active promotion with Price Lock 2: Active Promotion with Promotion Code 3: Active promotion with Auto Add To Cart 4: Active Promotion with Combo 5: Active Promotion with Volume Discount</p>
	ShipByNewegg	Integer	<p>0: ShippedBySeller 1: ShippedByNewegg</p>
	Active	Integer	<p>0: Inactive 1: Active</p>

#### Example: XML, Response

##### XSD

API Schema > ContentMgmt > GetPrice > GetItemPriceResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<PriceResult>
    <SellerID>A006</SellerID>
    <ItemNumber>9SIA0060884598</ItemNumber>
    <SellerPartNumber>A006testitem201201021459</SellerPartNumber>
    <ShipByNewegg>1</ShipByNewegg>
    <Active>0</Active>
    <MSRP>30.98</MSRP>
    <MAP>25.99</MAP>
    <CheckoutMAP>0</CheckoutMAP>
    <SellingPrice>20.92</SellingPrice>
    <EnableFreeShipping>1</EnableFreeShipping>
    <OnPromotion>1,5</OnPromotion>
</PriceResult>
```

#### Example: Json, Response

```
{
    "Active": "0",
    "ItemNumber": "9SIA0060884598",
    "SellerID": "A006",
    "SellerPartNumber": "A006testitem201201021459",
    "ShipByNewegg": "1",
    "EnableFreeShipping": "1",
    "MSRP": 30.98,
    "MAP": 25.99,
    "CheckoutMAP": 0,
    "OnPromotion": "1,5",
    "SellingPrice": 20.92
}
```

#### 9.2.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT001	Invalid ItemNumber
CT002	Invalid SellerPartNumber
CT003	Invalid UPCCode
CT005	Invalid Action Type. We only support: 0 - NE Item#, 1 - Seller Parts#, 2 - UPC Code
CT010	Cannot find item with specified item condition.
CT026	No data found

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CT002</Code>
        <Message>Invalid SellerPartNumber</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "CT002",
    "Message": "Invalid SellerPartNumber"
}
```

## 9.3. Update Inventory and Price

Update items' Inventory, MSRP, Selling Price, Shipping or Status.

**Note:** This feature will not support multiple warehouse locations. For updating the inventory for multiple warehouse locations, see [International Program- Updating Item Inventory](#).

### 9.3.1. Resource URL & Information

Resource URL

```
https://api.newegg.com/marketplace/contentmgmt/item/inventoryandprice?sellerid={sellerid}&version={versionno}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

## Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace
version	Yes	Available version numbers:304

## Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	300 per min per client

### 9.3.2. Request Body

Attribute	Required?	Format	Description
ItemInventoryAndPriceInfo	Type	Yes	<p>Integer</p> <p>0: NE Item # 1: Seller Part # 2: UPC</p>
	Value	Yes	String A string according to inquiry type
	Inventory	No	<p>Integer Available quantity</p> <p>You're not able to update the inventory for a SBN (Shipped by Newegg) item.</p>
	MSRP	No	<p>Decimal The manufacturer's suggested retail price. If you want to remove MSRP, input "0.00" or '0' in this field. If null, no change to current sets.</p>
	MAP	No	<p>Decimal This field allows you to dictate the "minimum advertised price" for the item. If the Selling Price is below the defined MAP, the website will ask customer to add item to shopping cart to see the item's price. If you want to remove MAP, input "0.00" or '0' in this field. If null, no change to current sets.</p>
	CheckoutMAP	No	<p>Integer 0: False 1: True</p> <p>If Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. The MAP value will not be considered. Another words, if this field is marked as true, it doesn't matter if the selling price is above or below MAP, the customer will always need to add item to cart and go to checkout to see item's price.</p> <p>If MAP is greater than 0.00 and CheckoutMAP is left blank, by default CheckoutMAP will equal False.</p>

				If MAP and CheckoutMAP both left null, no change to current sets.
SellingPrice	No	Decimal	The actual selling price The selling price cannot be bigger than MSRP.	
EnableFreeShipping	No	Integer	0: Default 1: Free Shipping	
Active	No	Integer	Null = Ignore this action, no change to current item active/deactivate setting 0: Deactivate item 1: Activate item	
Condition	No	Integer	1: New (default) 2: Refurbished 3: Used – Like New 4: Used – Very Good 5: Used – Good 6: Used – Acceptable  Only applies if type = [2-UPC code]. If type does not = [2-UPC code], then this column will be disregarded.	
FulfillmentOption	No	Integer	Reference only. Value will not be processed. For SBN (Shipped by Newegg), please use <a href="#">SBN (Shipped by Newegg) Management calls directly.</a>

  "SellingPrice": "200",
  "EnableFreeShipping": "1",
  "Active": "0",
  "FulfillmentOption": "1"
}

```

#### 9.3.3. Response Body

Attribute	Format	Description
UpdateInv	Result	Integer Used to identify whether the current request of service is successful or not. 0: Failure

		1: Success
SellerID	String	Your seller ID
ItemNumber	String	Newegg item number
SellerPartNumber	String	Seller Part Number
FulfillmentOption	Integer	0: Shipped by Seller 1: Ship by Newegg 2: All
Active	Integer	0: Deactivate item 1: Activate item
AvailableQuantity	Integer	Total available inventory for the warehouse. Including SBS (Shipped by Seller) and SBN (Shipped by Newegg).
MSRP	Decimal	The manufacturer's suggested retail price for United States.
MAP	Decimal	Minimum Advertised Price for United States. If the Selling Price is below the defined MAP, website will ask customer to add item to shopping cart to see the item's price.
CheckoutMAP	Integer	0: False 1: True if Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. The MAP value will not be considered. Another words, if this field is marked as true, it doesn't matter if the selling price is above or below MAP, the customer will always need to add item to cart and go to checkout to see item's price. If MAP is greater than 0.00 and CheckoutMAP is left blank, by default CheckoutMAP will equal False.
SellingPrice	Decimal	The actual selling price for United States.
EnableFreeShipping	Integer	For United States: 0: Default 1: Free Shipping

### 9.3.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT001	Invalid ItemNumber
CT002	Invalid SellerPartNumber
CT003	Invalid UPCCode
CT005	Invalid Action Type. We only support: 0 - NE Item#, 1 - Seller Parts#, 2 - UPC Code
CT004	Item under review, you cannot activate.
CT006	Invalid MSRP. The range should be between 0-99999.99
CT007	Invalid Selling Price. The range should be between 0-99999.99
CT008	Invalid Shipping type. We only support: 0 - default, 1 - free shipping
CT009	Cannot activate item by restricted manufacturer - {0}[({1}){2}].
CT010	Cannot find item with specified item condition.
CT014	SellerItemNumber or SellerPartNumber does not exist
CT015	Item does not belong to this seller
CT016	The item: [SellerPart#] is locked for an on-going/upcoming promotion. CANNOT update the Shipping. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT019	The item: [SellerPart#] is locked for an on-going/upcoming promotion. CANNOT update the Selling Price. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT022	This item is Shipping by newegg. Can NOT update inventory
CT023	Inventory value must be between 0 and 999999
CT025	This item is an approved promotion and its minimum inventory cannot be lower than {0}
CT028	Invalid Active Mark. We only support: 0 - deactivate item, 1 - activate item
CT029	The selling price {selling price} cannot be greater than MSRP {MSRP}.
CT030	MAP price should be decimal with 2 digits. The range should be between 0-99999.99.
CT031	Invalid CheckoutMAP value. We only support: 0 - False, 1 – True.
CT032	The selling price cannot be 0.
CT043	The item cannot be active because of one of the following reasons:1.Does not exist 2.Breaks the price rule 3.No image
CT044	The item cannot be deactivated because of an on-going/upcoming promotion that is locked by Newegg. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT045	Item was automatically deactivated due to 7 days out of stock and cannot be reactivated with 0 inventory.
CT047	Cannot convert Seller Part # [SellerPart#] to [the original request value of either ship by seller/ship by Newegg] because of scheduled/ongoing promotion(s). Please close promotion(s) first then submit your request again
CT048	This item cannot be converted to ship by seller until item's in-transit qty and fulfillable qty have been returned to seller.
CT050	Item Activation Failed. Strict MAP enforced: \${0} – Selling Price must be greater than or equal to strict MAP. Please contact your account manager for more information.
CT051	The update submitted for seller part #: {SellerPart#} cannot be processed because the item is currently deactivated.
CT052	This item cannot be activate because of the subcategory had been disabled for your account.

CT053	This item now matches a restricted item and cannot be activated. All other updates will be processed.
CT055	This is a duplicated request for Seller Part #: [seller part #]. This item does not exist in Newegg so we are not able to process your request. We will resume the process of price and inventory update for this item 8 hours after [last failed timestamp].
CT056	Request has been processed. Warning: The item: [{seller part#}] is a Subscribe & Save item but currently either deactivated or out of stock. Any order with existing subscription will NOT be processed.
CT065	Invalid Selling Price. The Selling Price should be greater than the existing 1st tier volume discount unit price: [{0}]
CT067	The item: [SellerPart#] is regulated by a Newegg existing MAP (Minimum Advertised Pricing) setting: MAP = [amount], Checkout MAP = [status]. When MAP amount is great than 0 or Checkout MAP = True, the attempt to change either MAP or Checkout MAP is restricted. All other requests have been processed.
CT070	Update Inventory and Price call does not support multiple warehouse locations. For multiple warehouse locations, please use International Program - Update Item Inventory and International Program - Update Item Price.
CT071	Request has been processed. Warning: Fulfillment option will not be changed.

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CE003</Code>
        <Message> The 'Type' element is invalid - The value 'a' is invalid according to its datatype 'Int' - The string 'a' is not a valid Int32 value.</Message>
    </Error>
</Errors>
```

#### Example: Json, Response

```
{
    "Code": "CT002",
    "Message": "Invalid SellerPartNumber"
}
```

## 9.4. Manufacturer Lookup

Query available manufacturer list from Newegg.

### 9.4.1. Resource URL & Information

#### Resource URL

`https://api.newegg.com/marketplace/contentmgmt/manufacturer/manufacturerinfo?sellerid={sellerid}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

### 9.4.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest	OperationType		Yes	String	Fixed value: GetManufacturerRequest
	PageIndex		No	Integer	Current page index
					If left blank, will use 1 as default.
	PageSize		No	Integer	Return records count in one page. (Max is 100 per page)
					If left blank, will use 100 as default.
	RequestCriteria	CreatedDateFrom	No	String	Filter the manufacturers created after the date. Please refer to the Acceptable Date Format
		CreatedDateTo	No	String	Filter the manufacturers created before the date Please refer to the Acceptable Date Format

			ManufacturerName	No	String	Manufacturer name. If left blank, will return all manufacturer names.
--	--	--	------------------	----	--------	--

Example: XML, Request

```

#### 9.4.3. Response Body

Attribute		Format	Description
Newegg	IsSuccess	String	Used to identify the operation of Manufacturer lookup is successful True

	SellerID		String	Your seller ID
	OperationType		String	Fixed value: GetManufacturerResponse
	ResponseDate		String	Response date
	Memo		String	Additional messages
ResponseBody	PageInfo	TotalCount	Integer	Total number of records
		TotalPageCount	Integer	Total page count
		PageIndex	Integer	Current page index
		PageSize	Integer	How many records in a page.
	ManufacturerList	Name	String	Manufacturer Name
		IsRestricted	Integer	To identify the manufacturer is restricted or not. 0: No 1: Yes
		Subcategory	SubcategoryID	The subcategory ID which the restricted manufacturer applies on.  This will be empty if the manufacturer restricts for all subcategories.
		Subcategory	SubcategoryName	The subcategory name which the restricted manufacturer applies on.  This will be empty if the manufacturer restricts for all subcategories.
		MappedNameList	MappedName	Mapped manufacturer name.  If you use this mapped name to create a new item, Newegg will map it to the existing manufacturer accordingly.  For example: Manufacturer Name: SONY Mapped name: Sony Ericsson Mobile, Sony Audio/Video, Sony PlayStation, Sony Creative Software, Sony Creative Software, Inc
				If you use one of the Mapped name to create a new item, the manufacturer will be replaced with SONY.

#### 9.4.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT033	Invalid manufacturer name :{0}.

Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CT033</Code>
        <Message>Invalid manufacturer name: Joe Machine</Message>
    </Error>
</Errors>

```

Example: Json, Response

```
{
    "Code": "CT033",
    "Message": "Invalid manufacturer name: Joe Machine"
}
```

## 9.5. Submit Manufacturer Request

Manufacturer is one of the required information for creating new items in Newegg Marketplace. Only pre-defined values from our system can be used. A complete manufacturer list can be retrieved using [Manufacturer Lookup, section 9.4](#). If the manufacturer(s) for your items are not available from our system, you can submit new manufacturer creation request to Newegg Marketplace.

### 9.5.1. Resource URL & Information

#### Resource URL

`https://api.newegg.com/marketplace/contentmgmt/manufacturer/creationrequest?sellerid={sellerid}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	100 per min per client

### 9.5.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest	IssueUser		No	String	The request issuer's registered Seller Portal email address. System will only accept Seller's registered Seller Portal email addresses. If left blank, default value will be Seller ID.
	OperationType		Yes	String	Fixed value: SubmitManufacturerRequest
	RequestBody	ManufacturerRequest	Name	Yes	String
			URL	No	Manufacturer website address. Example: <code>http://www.domain.com</code>
			SupportEmail	No	Manufacturer support email address.
			SupportPhone	No	Manufacturer support phone number.
			SupportURL	No	Manufacturer support website address Example: <code>http://support.domain.com</code>

## Example: XML, Request

### XSD

API Schema > ContentMgmt > AddManufacturer > AddManufacturerRequest.xsd

```

    },  
    "ResponseDate": "2/22/2012 16:51:03"  
}
```

#### 9.5.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT034	[MfrName] Error: This Manufacturer is existing! Please use correct manufacturer name "{0}" for your reference.
CT035	[MfrName] Error: The manufacturer "{0}" already exists.
CT036	Require {manufacturer name manufacturer URL}.
CT037	[MfrSupportPhone] Error: Format Error. Examples: Domestic – 222-222-2222-2222. International – 0086-12345678EXT1234.
CT038	[MfrName] Error: The manufacturer "{0}" already declined. Please try another manufacturer name.
CT039	[MfrURL] Error:Format Error,For example:http://www.example.com
CT041	[MfrName] Error: The manufacturer "{0}" already existed in another pending request.
CT042	[SupportEmail] Error:Format Error,For example:123@newegg.com

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors>  
    <Error>  
        <Code>CT035</Code>  
        <Message>Sony Error: The manufacturer Sony already exists.</Message>  
    </Error>  
</Errors>
```

Example: Json, Response

```
{  
    "Code": "CT035",  
    "Message": "Sony Error: The manufacturer Sony already exists."  
}
```

## 9.6. Get Manufacturer Request Status

Check manufacturer request status from Newegg.

### 9.6.1. Resource URL & Information

Resource URL

<https://api.newegg.com/marketplace/contentmgmt/manufacturer/creationrequeststatus?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

### 9.6.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest	OperationType		Yes	String	Fixed value: GetManufacturerStatusRequest
	RequestBody	ManufacturerList	ManufacturerName	Yes	String Manufacturer name.

## Example: XML, Request

### XSD

API Schema > ContentMgmt > GetManufacturerProcessStatus > GetManufacturerProcessStatusRequest.xsd

```
PUT https://api.newegg.com/marketplace/contentmgmt/manufacturer/creationrequeststatus?sellerid={SellerID}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

<NeweggAPIRequest>
  <OperationType>GetManufacturerStatusRequest</OperationType>
  <RequestBody>
    <ManufacturerList>
      <ManufacturerName><! [CDATA[sony & wonder]]></ManufacturerName>
      <ManufacturerName><! [CDATA[AWG]]></ManufacturerName>
    </ManufacturerList>
  </RequestBody>
</NeweggAPIRequest>
```

## Example: Json, Request

```
PUT https://api.newegg.com/marketplace/contentmgmt/manufacturer/creationrequeststatus?sellerid={SellerID}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

{
  "OperationType": "GetManufacturerStatusRequest",
  "RequestBody": {
    "ManufacturerList": {
      "ManufacturerName": [
        "sony & wonder",
        "AWG"
      ]
    }
  }
}
```

### 9.6.3. Response Body

Attribute			Format	Description
NeweggAPIResponse	ResponseBody	ManufacturerList	IsSuccess	String Used to identify the operation of Manufacturer lookup is successful True
			SellerID	String Your seller ID
			OperationType	String Fixed value: GetManufacturerStatusResponse
			ResponseDate	String The response time.
			RequestName	String Original request manufacturer Name
			ApprovedName	String Approved manufacturer name that should be used in your request.
			RequestDate	String The request date.
			Status	String The manufacturer status.  Processing Approved Mapped Declined
			ProcessDate	String Processed date.
			DeclineReason	String The decline reason.  Available when Status = Declined.

Example: XML, Response

XSD

API Schema > ContentMgmt > GetManufacturerProcessStatus > GetManufacturerProcessStatusResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>

        "DeclineReason": "please provide manufacturer URL"
    }
]
}
}

```

#### 9.6.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

## 9.7. Volume Discount Creation/Update/Removal

A volume discount is an adjustment to the price of a product based on the quantity of that product in an order. By offering volume discounts, sellers are able to reward those who purchase a multiple quantity of goods.

Newegg Marketplace volume discount is designed as a 3-tier calculation. Volume discount creation/adjustment can only be submitted with the following rules:

- Purchase Quantity: Minimum Purchase Quantity (If any)  $\leq$  tier-1  $<$  tier-2  $<$  tier-3
- Price per Product: Regular Selling Price  $>$  tier-1  $>$  tier-2  $>$  tier-3
- Shipping setting: tier-1  $\geq$  tier-2  $\geq$  tier-3

To specify volume discount for item A as following:

- Purchase quantity from 2 to 4 units, the unit price is \$10
- Purchase quantity from 5 to 9, the unit price is \$8
- Purchase quantity from 10 and above, the unit price is \$5.

Volume Discount Structure:

Tier	Quantity	Price/ Product	Examples of Acceptable Shipping Setting			Examples of Unacceptable Shipping Setting		
1	2	\$10.00	Default	Default	Default	Free	Default	Free
2	5	\$8.00	Default	Default	Free	Default	Free	Default
3	10	\$5.00	Default	Free	Free	Default	Default	Free

#### NOTE:

- **Volume discount setting will not be available for customers if an ongoing promotion price is less than the 1-tier unit price.**
- **Only available for shipping destination as United States.**

### 9.7.1. Resource URL & Information

#### Resource URL

`https://api.newegg.com/marketplace/contentmgmt/item/volumediscount?sellerid={sellerid}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	100 per min per client

### 9.7.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIR	OperationType			Yes	String Fixed value: SubmitVolumeDiscountRequest
	Req	Item	SellerPartNumber		
	NeweggItemNumber			No	String Seller Part#

		VolumeActivation		Yes	String	Two action values are available: <b>True:</b> Add / Update <b>False:</b> Remove. The default setting is "True". You may set it to "False" if you wish to remove the existing volume discount.
	DiscountSetting	Tier	Priority	Yes	Integer	Set the tier for the volume discount.
			Quantity	Yes	int	Set the quantity for the tier's volume discount.
			SellingPrice	Yes	decimal	Set the unit price for the tier's volume discount.
			EnableFreeShipping	Yes	Integer	Set a shipping method for the tier's volume discount. The acceptable shipping method: 0:Default or 1:Free.

Example: XML, Request

}
```

### 9.10.3. Response Body

Attribute		Format	Description
PriceResult	SellerId	String	Your seller ID
	ItemNumber	String	Newegg item number
	SellerPartNumber	String	Seller part number
	CountryCode	String	The ISO standard 3-digit codes of the country where your warehouse is located. Please download the following to review details: <a href="http://promotions.newegg.com/marketplace/sellers/resourceLibrary/International%20Country%20Guide.pdf">http://promotions.newegg.com/marketplace/sellers/resourceLibrary/International%20Country%20Guide.pdf</a>
	Currency	String	The currency is to identify the Selling Price, MSRP, MAP for the target country you will be selling your items to. Only the ISO standard 3-digit codes are accepted. The default value will be USD if left blank. To review the complete list of available values, please download the following: <a href="http://promotions.newegg.com/marketplace/sellers/resourceLibrary/International%20Country%20Guide.pdf">http://promotions.newegg.com/marketplace/sellers/resourceLibrary/International%20Country%20Guide.pdf</a>
	Active	Integer	0: Inactive 1: Active
	MSRP	Decimal	The manufacturer's suggested retail price
	MAP	Decimal	Minimum Advertised Price. If the Selling Price is below the defined MAP, website will ask customer to add item to shopping cart to see the item's price.

			CheckoutMAP	Integer	<p>0: False 1: True</p> <p>If Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. The MAP value will not be considered. Another words, if this field is marked as true, it doesn't matter if the selling price is above or below MAP, the customer will always need to add item to cart and go to checkout to see item's price.</p> <p>If MAP is greater than 0.00 and CheckoutMAP is left blank, by default CheckoutMAP will equal False.</p>
			SellingPrice	Decimal	The actual selling price
			EnableFreeShipping	Integer	<p>0: Default 1: Free Shipping</p>
			On promotion	Integer, separated by comma	<p>0: No active Promotion 1: Active promotion with Price Lock 2: Active Promotion with Promotion Code 3: Active promotion with Auto Add To Cart 4: Active Promotion with Combo 5: Active Promotion with Volume Discount</p>

Example: XML, Response

            }
        ]
    }
}

```

#### 9.11.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT001	Invalid ItemNumber
CT002	Invalid SellerPartNumber
CT003	Invalid UPCCode
CT005	Invalid Action Type. We only support: 0 - NE Item#, 1 - Seller Parts#, 2 - UPC Code
CT010	Cannot find item with specified item condition.
CT014	SellerItemNumber or SellerPartNumber does not exist
CT015	Item does not belong to this seller
CT023	Inventory value must be between 0 and 999999
CT025	This item is an approved promotion and its minimum inventory cannot be lower than {0}
CT055	This is a duplicated request for Seller Part #: [seller part #]. This item does not exist in Newegg so we are not able to process your request. We will resume the process of price and inventory update for this item 8 hours after [last failed timestamp].
CT073	Inventory update failed. The specified warehouse location(s): [warehouselocation 1, warehouselocation 2] have not been setup yet. Please set up your warehouse(s) then submit your request again.

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
```

```

<Errors>
  <Error>
    <Code>CE003</Code>
    <Message> The 'Type' element is invalid - The value 'a' is invalid according to its datatype 'Int' - The string 'a' is not a valid Int32 value.</Message>
  </Error>
</Errors>

```

Example: Json, Response

```
{
  "Code": "CT002",
  "Message": "Invalid SellerPartNumber"
}
```

## 9.12. International Program - Update Item Price

If you're selling on multiple countries, you can use this API call to maintain the price of items in all eligible countries, including the United States.

### 9.12.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/contentmgmt/item/international/price?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	300 per min per client

## 9.12.2. Request Body

Attribute		Required?	Format	Description
ItemPriceInfo	Type	Yes	Integer	0: NE Item # 1: Seller Part # 2: UPC
	Value	Yes	String	A string according to inquiry type
	Condition	No	Integer	1: New (default) 2: Refurbished 3: Used – Like New 4: Used – Very Good 5: Used – Good 6: Used – Acceptable  Only applies if type = [2-UPC code]. If type does not = [2-UPC code], then this column will be disregarded.
Pricelist	Price	CountryCode	String	The target country you will be selling your items to. Only the ISO standard 3-digit codes are accepted.  To review the complete list of available values, please download the following: <a href="https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/International%20Country%20Guide.pdf">https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/International%20Country%20Guide.pdf</a>  NOTE: Item price must be submitted with the correct currency code based on ship-to destination country code. Submissions with incorrect combinations will error-out.
		Currency	String	The currency is to identify the Selling Price, MSRP, MAP for the target country you will be selling your items to. Only the ISO standard 3-digit codes are accepted.  To review the complete list of available values, please download the following: <a href="https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/International%20Country%20Guide.pdf">https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/International%20Country%20Guide.pdf</a>  NOTE: Correct currency code must be submitted based on ship-to destination country code. Submissions with incorrect combinations will error-out.

		Active	No	Integer	1: Activate item 0: Deactivate item Null = Ignore this action, no change to current item active/deactivate setting
		MSRP	No	Decimal	The manufacturer's suggested retail price
		MAP	No	Decimal	Minimum Advertised Price. If the Selling Price is below the defined MAP, website will ask customer to add item to shopping cart to see the item's price.
		CheckoutMAP	No	Integer	0: False 1: True  If Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. The MAP value will not be considered. Another words, if this field is marked as true, it doesn't matter if the selling price is above or below MAP, the customer will always need to add item to cart and go to checkout to see item's price.  If MAP is greater than 0.00 and CheckoutMAP is left blank, by default CheckoutMAP will equal False.
		SellingPrice	No	Decimal	The actual selling price
		EnableFreeShipping	No	Integer	0: Default 1: Free Shipping

#### 9.12.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT001	Invalid ItemNumber
CT002	Invalid SellerPartNumber
CT003	Invalid UPCCode
CT005	Invalid Action Type. We only support: 0 - NE Item#, 1 - Seller Parts#, 2 - UPC Code
CT004	Item under review, you cannot activate.
CT006	Invalid MSRP. The range should be between 0-99999.99
CT007	Invalid Selling Price. The range should be between 0-99999.99
CT008	Invalid Shipping type. We only support: 0 - default, 1 - free shipping
CT009	Cannot activate item by restricted manufacturer - {0}[({1}){2}].
CT010	Cannot find item with specified item condition.
CT014	SellerItemNumber or SellerPartNumber does not exist
CT015	Item does not belong to this seller
CT016	The item: [SellerPart#] is locked for an on-going/upcoming promotion. CANNOT update the Shipping. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT019	The item: [SellerPart#] is locked for an on-going/upcoming promotion. CANNOT update the Selling Price. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT028	Invalid Active Mark. We only support: 0 - deactivate item, 1 - activate item
CT029	The selling price {selling price} cannot be greater than MSRP {MSRP}.
CT030	MAP price should be decimal with 2 digits. The range should be between 0-99999.99.
CT031	Invalid CheckoutMAP value. We only support: 0 - False, 1 – True.
CT032	The selling price cannot be 0.
CT043	The item cannot be active because of one of the following reasons:1.Does not exist 2.Breaks the price rule 3.No image
CT044	The item cannot be deactivated because of an on-going/upcoming promotion that is locked by Newegg. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT045	Item was automatically deactivated due to 7 days out of stock and cannot be reactivated with 0 inventory.

CT050	Item Activation Failed. Strict MAP enforced: \${0} – Selling Price must be greater than or equal to strict MAP. Please contact your account manager for more information.
CT052	This item cannot be activate because of the subcategory had been disabled for your account.
CT053	This item now matches a restricted item and cannot be activated. All other updates will be processed.
CT055	This is a duplicated request for Seller Part #: [seller part #]. This item does not exist in Newegg so we are not able to process your request. We will resume the process of price and inventory update for this item 8 hours after [last failed timestamp].
CT065	Invalid Selling Price. The Selling Price should be greater than the existing 1st tier volume discount unit price: [{0}]
CT067	The item: [SellerPart#] is regulated by a Newegg existing MAP (Minimum Advertised Pricing) setting: MAP = [amount], Checkout MAP = [status]. When MAP amount is great than 0 or Checkout MAP = True, the attempt to change either MAP or Checkout MAP is restricted. All other requests have been processed.
CT071	The Inventory update for item: [SellerPart#] cannot be processed because of the warehouse: [warehouselocation] has not been created.
CT075	Price update failed. Invalid currency code. The currency code received: [code] does not match the specified country: [code].
CT076	Item cannot be activated for specified country: [code]. Please activate the country, then submit your request again.

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CE003</Code>
        <Message> The 'Type' element is invalid - The value 'a' is invalid according to its datatype 'Int' - The string 'a' is not a valid Int32 value.</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "CT002",
    "Message": "Invalid SellerPartNumber"
}
```

## 9.13. Submit Item Warranty Request

Specifying warranty services on refurbished items selling on Newegg Marketplace.

### 9.13.1. Resource URL & Information

#### Resource URL

<a href="https://api.newegg.com/marketplace/contentmgmt/item/warranty?sellerid={sellerid}">https://api.newegg.com/marketplace/contentmgmt/item/warranty?sellerid={sellerid}</a>
---

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	300 per min per client

### 9.13.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest			Yes	String	Fixed value: SubmitItemWarrantyRequest
			Yes	Integer	0: Create Warranty 1: Update Warranty 2: Delete Warranty
RequestBody	ItemWarrantyList	No	Integer	Warranty ID. When updating and deleting warranty, if warranty id is 0, we will find the warranty by SellerPartNumber and CountryCode.	
		Yes	String	Seller Part #	
		No	Integer	Parts Day, 0-99999. You can set Parts Days as "99999" to indicate a lifetime warranty.	
		No	Integer	Labor Day, 0-99999. You can set Labor Days as "99999" to indicate a lifetime warranty.	
		Yes	String	Service Provider Name	
		Yes	String	Warranty support email address.	

		ProviderSupportURL	No	String	Warranty support URL
		ProviderCustomerServicePhone	Yes	String	Warranty Customer Service phone number. Please use NANP phone number format. Example: 234-235-5678.
		CountryCode	Yes	String	Ship to country. Fixed Value: USA
		ApplyToAllCountryCode	Yes	Boolean	Fixed value: false.

#### 9.13.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
CT001	Invalid ItemNumber
CT002	Invalid SellerPartNumber
CT003	Invalid UPCCode
CT005	Invalid Action Type. We only support: 0 - NE Item#, 1 - Seller Parts#, 2 - UPC Code
CT004	Item under review, you cannot activate.
CT006	Invalid MSRP. The range should be between 0-99999.99
CT007	Invalid Selling Price. The range should be between 0-99999.99
CT008	Invalid Shipping type. We only support: 0 - default, 1 - free shipping
CT009	Cannot activate item by restricted manufacturer - {0}[({1}){2}].
CT010	Cannot find item with specified item condition.
CT014	SellerItemNumber or SellerPartNumber does not exist
CT015	Can't find this item in the system, please create it first
CT016	The item: [SellerPart#] is locked for an on-going/upcoming promotion. CANNOT update the Shipping. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT019	The item: [SellerPart#] is locked for an on-going/upcoming promotion. CANNOT update the Selling Price. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT028	Invalid Active Mark. We only support: 0 - deactivate item, 1 - activate item
CT029	The selling price {selling price} cannot be greater than MSRP {MSRP}.

CT030	MAP price should be decimal with 2 digits. The range should be between 0-99999.99.
CT031	Invalid CheckoutMAP value. We only support: 0 - False, 1 – True.
CT032	The selling price cannot be 0.
CT043	Item with no image cannot be activated. Please update your item with valid image then try again.
CT044	The item cannot be deactivated because of an on-going/upcoming promotion that is locked by Newegg. Please note: the inventory or minimum purchase quantity update will NOT be affected.
CT045	Item was automatically deactivated due to 7 days out of stock and cannot be reactivated with 0 inventory.
CT050	Item Activation Failed. Strict MAP enforced: \${0} – Selling Price must be greater than or equal to strict MAP. Please contact your account manager for more information.
CT052	This item cannot be activate because of the subcategory had been disabled for your account.
CT053	This item now matches a restricted item and cannot be activated. All other updates will be processed.
CT055	This is a duplicated request for Seller Part #: [seller part #]. This item does not exist in Newegg so we are not able to process your request. We will resume the process of price and inventory update for this item 8 hours after [last failed timestamp].
CT065	Invalid Selling Price. The Selling Price should be greater than the existing 1st tier volume discount unit price: [{0}]
CT067	The item: [SellerPart#] is regulated by a Newegg existing MAP (Minimum Advertised Pricing) setting: MAP = [amount], Checkout MAP = [status]. When MAP amount is great than 0 or Checkout MAP = True, the attempt to change either MAP or Checkout MAP is restricted. All other requests have been processed.
CT071	The Inventory update for item: [SellerPart#] cannot be processed because of the warehouse: [warehouselocation] has not been created.
CT075	Price update failed. Invalid currency code. The currency code received: [code] does not match the specified country: [code].
CT076	Item cannot be activated for specified country: [code]. Please activate the country, then submit your request again.
CT501	'Seller Part Number' is required.
CT502	'Service Provider' is required.
CT504	'Parts Day' and 'Labor Day' should not be equal to 0 at the same time.
CT505	'Provider Support Email' is required.
CT506	'Provider Support Email' is not in the correct format.
CT507	'Provider Support URL' is not in the correct format.
CT508	SellerPartNumber: xxx does not exist.
CT509	"Warranty does not exist in CountryCode: xxx, SellerPartNumber: xxx." Or "Warranty does not exist in CountryCode: xxx, SellerPartNumber: xxx, ItemManufacturerWarrantyID: xxx."
CT511	'Provider Customer Service Phone' is not in the correct format.
CT512	SellerPartNumber: xxx is not refurbished or used item.
CT513	'Provider Customer Service Phone' is required.
CT514	Warranty exists in CountryCode: xxx, SellerPartNumber: xxx.

### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CE003</Code>
        <Message> The 'Type' element is invalid - The value 'a' is invalid according to its datatype 'Int' - The string 'a' is not a valid Int32 value.</Message>
    </Error>
</Errors>
```

### Example: Json, Response

```
{
    "Code": "CT002",
    "Message": "Invalid SellerPartNumber"
}
```

# 10. Order Management

The Order Management service group contains functions that will allow you to perform order related operations such as get order info, status, update order status, remove items, confirm orders... etc.

## 10.1. Get Order Status

Get order status by specified order number of specified seller.

### 10.1.1. Resource URL & Information

Resource URL

```
https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}&version={versionno}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace
{ordernumber}	Yes	The order number
version	No	Available version numbers:304

Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
GET	Required	XML, Json	XML, Json	1000 per min per client

### 10.1.2. Request Body

Example: XML, Rquest

```
GET  
https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}  
Authorization: 720ddc067f4d115bd544aff46bc75634  
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D  
Content-Type: application/xml  
Accept: application/xml
```

Example: Json, Request

```

GET
https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

```

### 10.1.3. Response Body

Attribute	Format	Description
QueryOrderStatusInfo	OrderNumber	String The order number
	OrderStatusCode	Integer The Code of the order status 0: Unshipped 1: PartiallyShipped 2: Shipped 3: Invoiced 4: Void
	OrderStatusName	String The description of the status <b>Unshipped</b> for status code: 0 <b>PartiallyShipped</b> for status code: 1 <b>Shipped</b> for status code: 2 <b>Invoiced</b> for status code: 3 <b>Void</b> for status code: 4
	SellerID	String Your seller ID
	OrderDownloaded	String False: Order has not been downloaded yet. True: Order downloaded already. When order is shipped, this field will automatically become “True”.
	SalesChannel	Integer Order sales channel: 0: Newegg order 1: Multi-channel order
	FulfillmentOption	Integer Order fulfillment option: 0: Ship by Seller 1: Ship by Newegg

#### Example: XML, Response

#### XSD

API Schema > OrderMgmt > GetOrderStatus > GetOrderStatusResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<QueryOrderStatusInfo>
    <OrderNumber>159243598</OrderNumber>
    <SellerID>A006</SellerID>
    <OrderStatusCode>1</OrderStatusCode>
    <OrderStatusName>PartiallyShipped</OrderStatusName>
    <OrderDownloaded>true</OrderDownloaded>
    <SalesChannel>0</SalesChannel>
    <FulfillmentOption>0</FulfillmentOption>
</QueryOrderStatusInfo>
```

#### Example: Json, Response

```
{
    "OrderDownloaded": true,
    "OrderNumber": "159243598",
    "OrderStatusCode": 1,
    "OrderStatusName": "PartiallyShipped",
    "SellerID": "A006",
    "SalesChannel": 0,
    "FulfillmentOption": 0
}
```

### 10.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SO002	Order Number should be an integer (ranging from 1 to 2147483647)
SO003	No data found or this order does not belong to this seller

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SO002</Code>
        <Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
    </Error>
</Errors>
```

#### Example: Json, Response

```
{
    "Code": "SO002",
    "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"
}
```

## 10.2. Update Order Status

Update order status by specific order number. Currently support cancel or ship a single order.

### 10.2.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}&version={versionno}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace
{ordernumber}	Yes	The order number for the operation
version	Yes	Available version numbers:304

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML,Json	XML,Json	1000 per min per client

## 10.2.2. Request Body

### Cancel Order

Attribute		Required?	Format	Description
UpdateOrderStatus	Action	Yes	Integer	<p>1: Cancel Order</p> <p>Note: SBN order might not be cancelled if the order is been processing by Newegg Warehouse. Please use <a href="#">Get SBN Order Cancellation Request Result, section 10.6</a> to check the status.</p>
	Value	Yes	Integer	<p>The cancel reason code:</p> <p>24: OutOfStock</p> <p>72: Customer Requested to Cancel</p> <p>73: PriceError</p> <p>74: Unable to Fulfill Order</p>

Example: XML, Request (Cancel Order Request Example)

### XSD

API Schema > OrderMgmt > UpdateOrder > CancelRequest.xsd

```
PUT
https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept:application/xml

<UpdateOrderStatus>
  <Action>1</Action>
  <Value>24</Value>
</UpdateOrderStatus>
```

Example: Json, Request

```
PUT
https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/{ordernumber}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
```

```

SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

{
    "Action": "1",
    "Value": "24"
}

```

## Ship Order

Ship Order function allows you to update shipment of one or all items in an order. When an order has been completely fulfilled, mean that all the items are fulfilled, the order process is completed.

Please review the following example and the possible shipment options you can assign for each request:

Order XYZ has item A (5 units) and item B (1 unit)

- Single package contains 5 units of item A and 1 unit of item B with one tracking number.
- Single package contains either 5 units of item A or 1 unit of item B with one tracking number.
- Multiple packages: one package contains 5 units of item A with one tracking number. The other package contains 1 unit of item B with another tracking number.
- Multiple packages: one package contains 2 units of item A with one tracking number. Another package contains 3 units of item A with another tracking number. The other package contains 1 unit of item B with another tracking number.
- Multiple packages: one package contains 2 units of item A with one tracking number. The other package contains 3 units of item A and one unit of item B with another tracking number.
- **You cannot submit a request for partial shipment as following:** Single package contains 2 units of item A with one tracking number.

Attribute					Required?	Format	Description
UpdateOrderStatus	Action				Yes	Integer	2: Ship Order
	Value	Shipment	Header	SellerID	Yes	String	Your Seller ID
				SONumber	Yes	Integer	Sales order number
	Pack	Pack	TrackingNumber		Yes	String	Tracking number for the shipped package.

				ShipCarrier	Yes	String	Shipping carrier type, choose from: UPS UPS MI FedEX DHL USPS  NOTE: Please specify the ship carrier name other than above. Please refer to the following XML formatted example.
				ShipService	Yes	String	Shipping service type, such as air, ground, etc. Please reference your shipping carrier directly
ItemList	Item	SellerPartNumber		SellerPartNumber	Yes	String	The Seller Part # of the item(s)
		NeweggItemNumber		NeweggItemNumber	No	String	Newegg Item Number of the item
		ShippedQty		ShippedQty	Yes	Integer	Shipped quantity of items. Must be larger than 0

Example: XML, Request

### 10.2.3. Response Body

#### Cancel Order

Attribute		Format	Description
UpdateOrderStatusInfo	IsSuccess	String	Used to identify the operation of order update is successful Returns true or false.
	Result	Integer	The order number
	SellerID	String	Your Seller ID

	OrderStatus	String	The order status. The following values are available: Void – Void successfully. Processing – Cancellation request has been received and under processing. This status is ONLY available for the cancellation request of SBN orders. The final processing result can be checked using 10.6 Check SBN Order Cancellation Result.
--	-------------	--------	--

Example: XML, Response

XSD

API Schema > OrderMgmt > UpdateOrder > CancelOrderResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<UpdateOrderStatusInfo>
  <IsSuccess>true</IsSuccess>
  <Result>
    <OrderNumber>159243598</OrderNumber>
    <SellerID>A006</SellerID>
    <OrderStatus>Void</OrderStatus>
  </Result>
</UpdateOrderStatusInfo>
```

Example: Json, Response

```
{
  "IsSuccess": "true",
  "Result": {
    "OrderNumber": "159243598",
    "SellerID": "A006",
    "OrderStatus": "Void"
  }
}
```

## Ship Order

Attribute		Format	Description
UpdateOr	IsSuccess	String	Used to identify the operation of order update is successful. Always returns true.
	TotalPackageCount	Integer	package(s) count

		SuccessCount			Integer	package(s) processed successfully		
		FailCount			Integer	package(s) failed to process		
Result	Shipment	PackageList	Package	OrderNumber		Integer	The order number for the operation	
				SellerID		String	• Your Seller ID	
				OrderStatus		String	The new order status: • Shipped • PartiallyShipped	
				TrackingNumber	String	Tracking number for the shipped package		
				ShipDate	String	Ship date(Pacific Standard Time)		
	ItemList	ItemDes		ProcessStatus		String	True or False. True stands for package have been successfully processed. False stands for package that failed to process.	
				ProcessResult		String	Success or fail. If fail, detailed error description displayed here.	
				SellerPartNumber	String	The Seller Part # of the item(s)		
				NeweggItemNumber	String	Newegg Item Number of the item		
				ShippedQty	Integer	Shipped quantity of items.		

Example: XML, Response

}
}

```

#### 10.2.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SO001	Seller ID cannot be null or empty
SO002	Order Number should be an integer (ranging from 1 to 2147483647)
SO003	No data found or this order does not belong to this seller
SO004	This is a replacement SO with a RMA number. It cannot be voided
SO005	Cannot remove item because this is a Shipped by Newegg order. order is Shipped by Newegg
SO006	Only unshipped orders can be voided. The order status is currently {0}
SO007	Cannot get the order status info
SO008	This order has already been voided
SO009	Order number cannot be null or empty
SO010	Invalid order. No item exists
SO011	Only unshipped orders can be shipped. The order status is currently {0}
SO012	Only shipped by seller orders can be supported currently
SO014	The action should be [ Canceled = 1   Shipped = 2]
SO015	The Argument '{0}' cannot be null
SO016	This order has not been downloaded onto seller portal yet. Please re-submit your request after two hours.
SO017	Reason code should be [24 -- OutOfStock,72 -- Customer Requested to Cancel,73 -- PriceError,74 -- Unable to Fulfill the Order]
SO020	There is a package or packages without shipping information in this shipment.
SO025	Some items in the shipment have already been shipped.
SO027	This order has already been shipped.
SO030	There is a format error in shipment segment of this XML request.
SO036	The order's shipping method is null. Please contact System Admin.
SO037	The action should be [1 - Cancelled, 2 - Shipped]
SO040	The Order number or Seller ID provided is not the same as in the URL.
SO056	Your request cannot be processed. Order: [order #] is a Newegg Premier order and can only be shipped using Newegg Shipping Label Service.

### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SO002</Code>
        <Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
    </Error>
</Errors>
```

### Example: Json, Response

```
{
    "Code": "SO002",
    "Message": " Order Number should be an integer (ranging from 1 to 2147483647)"
}
```

## 10.3. Order Confirmation

Use this function to let Newegg mark the orders you have confirmed and downloaded. You will be able to exclude these downloaded orders in the Get Order Info API's through OrderDownloaded filter.

### 10.3.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/ordermgmt/orderstatus/orders/confirmation?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	1000 per min per client

### 10.3.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest	IssueUser	No	String	Specify your eligible seller account (email address) here.
	OperationType	Yes	String	Fixed value: OrderConfirmationRequest
	RequestBody DownloadedOrderList	Yes	Integer	The order(s) you want to mark as downloaded already.

Example: XML, Request

XSD

API Schema > OrderMgmt > OrderConfirm > OrderConfirmRequest.xsd

POST

      ]
    }
  }
}

```

### 10.3.3. Response Body

Attribute		Format	Description
NeweggAPIResponse	IsSuccess	String	Used to identify the operation of order confirmation is successful Response: true or false
	OperationType	String	Fixed value: OrderConfirmationResponse
	SellerID	String	Your Seller ID
	ResponseDate	String	The date time of response (Pacific Standard Time)
	RequestBody	String	The date time of request (Pacific Standard Time)
	DownloadedOrderList	OrderNumber	Integer The order(s) you want to mark as downloaded already.
	Memo	String	Additional Information. Currently will return null.

## Example: XML, Response

### XSD

API Schema > OrderMgmt > OrderConfirm > OrderConfirmResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
    <IsSuccess>true</IsSuccess>
    <OperationType>OrderConfirmationResponse</OperationType>
    <SellerID>A006</SellerID>
    <ResponseDate>2/22/2012 16:37:20</ResponseDate>
    <ResponseBody>
        <RequestDate>2/22/2012 16:37:20</RequestDate>
        <DownloadedOrderList>
            <OrderNumber>159243598</OrderNumber>
        </DownloadedOrderList>
    </ResponseBody>
</NeweggAPIResponse>
```

## Example: Json, Response

```
{
    "NeweggAPIResponse": {
        "IsSuccess": "true",
        "OperationType": "OrderConfirmationResponse",
        "SellerID": "A006",
        "ResponseDate": "2/22/2012 16:38:53",
        "ResponseBody": {
            "RequestDate": "2/22/2012 16:38:53",
            "DownloadedOrderList": {
                "OrderNumber": "159243598"
            }
        }
    }
}
```

#### 10.3.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>
    <Code>CE001</Code>
    <Message>SellerID cannot be null or empty</Message>
  </Error>
</Errors>
```

Example: Json, Response

```
{
  "Code": "CE001",
  "Message": "SellerID cannot be null or empty"
}
```

### 10.4. Remove Item(s)

This service will remove item(s) in specified order, but only supports order(s) that is fulfilled by seller. If all items removed from an order, order status becomes void.

#### 10.4.1. Resource URL & Information

Resource URL

```
https://api.newegg.com/marketplace/ordermgmt/killitem/orders/{ordernumber}?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace
{ordernumber}	Yes	The order number for the operation

## Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

### 10.4.2. Request Body

Attribute						Required?	Format	Description
NeweggAPIRequest	IssueUser					No	String	Specify your eligible seller account (email address) here.
	OperationType					Yes	String	Fixed value: KillItemRequest
	RequestBody	KillItem	Order	ItemList	Item	SellerPartNumber	String	The Seller Part # of the item(s). Note: Items cannot be removed with SBN orders
	Memo					No	String	

Example: XML, Request

### XSD

API Schema > OrderMgmt > RemoveItem > RemoveItemRequest.xsd

```

PUT
https://api.newegg.com/marketplace/ordermgmt/killitem/orders/{ordernumber}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634

SO051	This '{0}' has already been canceled in Newegg System
SO052	CANNOT find out item by ordernumber ='{0}' and sellerid='{1}'.
SO053	Cannot get the ordernumber='{0}' status.
SO054	The ordernumber= '{0}' is Replacement SO. CANNOT be voided.
SO055	The seller part# = '{0}' is repeated.

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SO008</Code>
        <Message>This order has already been voided</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "SO008",
    "Message": " This order has already been voided"
}
```

## 10.5. Get Order Info

Retrieve order info by specified order number.

### 10.5.1. Resource URL & Information

## Resource URL

`https://api.newegg.com/marketplace/ordermgmt/order/orderinfo?sellerid={sellerid}&version={versionno}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

## Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace
version	Yes	Available version numbers: 304 305 306 307

## Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

## 10.5.2. Request Body

Attribute	Required?	Format	Description	Available Ver.#
NameAndBody	IssueUser	No	String	Specify your eligible seller account (email address) here.
	OperationType	Yes	String	Fixed value: GetOrderInfoRequest
	PageIndex	No	Integer	Current page index If left blank, will use 1 as default.
	PageSize	No	Integer	Return records count in one page. (Max is 100 per page) If left blank, will use 100 as default.
	OrderNumber	No	Integer	The order number Ignore other search conditions (request criteria) if order number specified this field.

		SellerOrderNumber	No	String	<p>The seller order number.</p> <p>This is available for sellers using SBN (Shipped by Newegg) to fulfill multi-channel orders.</p> <p>If not specify Newegg order number in field “OrderNumber”, ignore other search conditions (request criteria) and only apply the query result on seller order numbers specified in this field.</p>	307
		Status	No	Integer	<p>0: Unshipped 1: Partially Shipped 2: Shipped 3: Invoiced 4: Voided</p> <p>If left blank, will return orders in all order status</p>	All
		OrderDownloaded	No	Integer	<p>0: False(Default): include downloaded orders 1: True: do not include downloaded orders</p>	All
		Type	No	Integer	<p>0: All (Default) 1: SBN (Shipped by Newegg) 2: SBS (Shipped by Seller) 3: Multi-Channel</p>	All
		VoidSoon	No	Integer	<p>The order will be auto voided after 24 or 48 hours.</p> <p>Available values: 24 48</p>	All
		OrderDateFrom	No	String	<p>Order Date From (Pacific Standard Time)</p> <p>Please refer to the Acceptable Date Format</p>	All
		OrderDateTo	No	String	<p>Order Date To (Pacific Standard Time)</p> <p>Please refer to the Acceptable Date Format</p>	All
		CountryCode	No	String	<p>The country for your orders. Only the ISO standard 3-digit codes are accepted.</p> <p>To review the complete list of available values, please download the following:</p> <p><a href="https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/international%20Country%20Guide.pdf">https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/international%20Country%20Guide.pdf</a></p>	All
		PremierOrder	No	Integer	<p>0: All (Default) 1: Premier Order Only 2: No Premier Order</p>	All

Example: XML, Request

#### 10.5.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CE001</Code>
        <Message>SellerID cannot be null or empty</Message>
    </Error>
</Errors>

```

Example: Json, Response

```
{
    "Code": "CE001",
    "Message": "SellerID cannot be null or empty"
}
```

## 10.6. Get SBN (Shipped by Newegg) Order Cancellation Request Result

Get the status of specified SBN (Shipped by Newegg) cancellation request. Resource URL & Information

Resource URL

<https://api.newegg.com/marketplace/ordermgmt/sbnorder/cancellationresult/{ordernumber}?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace
{ordernumber}	Yes	The order number

Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
GET	Required	XML, Json	XML, Json	1000 per min per client

### 10.6.1. Request Body

Example: XML, Request

```

GET
https://api.newegg.com/marketplace/ordermgmt/sbnorder/cancellationresult/{ordernumber}?sellerid={sellerid}

```

```

Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

```

#### Example: Json, Request

```

GET
https://api.newegg.com/marketplace/ordermgmt/sbnorder/cancellationresult/{ordernumber}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

```

## 10.6.2. Response Body

Attribute		Format	Description
NeweggAPIResponse	IsSuccess	String	Used to identify the operation of order confirmation is successful Response: true or false
	SellerID	String	Your Seller ID
	OperationType	String	Fixed value: GetSBNOrderCancellationResultResponse
	ResponseDate	String	The date time of response (Pacific Standard Time)
	RequestBody	RequestDate	The date time of request (Pacific Standard Time)
	RequestBody	OrderNumber	The order number.
	RequestBody	Result	Available values: Success Failed Processing
	RequestBody	ErrorMessage	The error message if the request was failed.

#### Example: XML, Response

#### XSD

```
API Schema > OrderMgmt > GetSBNOrderCancellationResponse > GetSBNOrderCancellationResponse.xsd
```

```

<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>
  <OperationType>GetSBNOrderCancellationResultResponse</OperationType>
  <SellerID>A006</SellerID>
  <ResponseDate>2/22/2012 16:37:20</ResponseDate>
  <ResponseBody>
    <RequestDate>2/22/2012 15:37:20</RequestDate>
    <OrderNumber>159243598</OrderNumber>
    <Result>Failed</Result>
    <ErrorMessage>Order void was not successful due to technical issues / order already shipped.</ErrorMessage>
  </ResponseBody>
</NeweggAPIResponse>

```

Example: Json, Response

```
{
  "IsSuccess": "true",
  "OperationType": "GetSBNOrderCancellationResultResponse",
  "SellerID": "A006",
  "ResponseDate": "2/22/2012 16:37:20",
  "ResponseBody": {
    "RequestDate": "2/22/2012 15:37:20",
    "OrderNumber": "159243598",
    "Result": "Failed",
    "ErrorMessage": "Order void was not successful due to technical issues / order already shipped."
  }
}
```

### 10.6.3. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SO057	The order #: [order#] is not a valid Shipped by Newegg order. Please verify the order # then submit your request again.
SO058	No void request found for order #:{order#}.

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>
    <Code>SO002</Code>
    <Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
  </Error>
</Errors>
```

Example: Json, Response

```
{
  "Code": "SO002",
  "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"
}
```

## 11. Newegg Shipping Label Service

Newegg marketplace sellers can take advantage of discounted shipping rates by using the Newegg Shipping Label Service for Newegg Marketplace orders.

To use Newegg Shipping Label Service:

1. [Submit a shipping request](#)
2. [Retrieve the result of submitted shipping request](#)
3. [Confirm a shipping request](#)
4. [Void a shipping request \(Optional\)](#)
5. [Request a packing list](#)
6. [Request a shipping label](#)

### 11.1. Submit Shipping Request

Submit the shipping request for your Newegg order to receive the estimation of shipping cost using Newegg Shipping Label Service.

Please note that any unconfirmed shipping request will be void automatically within 15 days after submitting the request.

#### 11.1.1. Resource URL & Information

## Resource URL

`https://api.newegg.com/marketplace/shippingservice/shippinglabel/shippingrequest?sellerid={sellerid}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

## Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

## Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	10 per min per client

    }
}
```

#### 11.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SL001	Your request cannot be processed. The item(s):{0} in order: [Order #] has been shipped or voided
SL002	No data found or this order does not belong to this seller
SL003	Only unshipped orders can submit a shipping request. The order status is currently {order status}
SL004	Only shipped by seller orders can submit a shipping request.
SL005	Seller Part #: {sellerpart#} must be shipped for its entire quantity on the order.
SL006	The field: [PackageWeight or PackageLength or PackageHeight or PackageWidth] is required when using Newegg Partnered Carrier service (ShippingCarrierCode: 100). For more detail, please review Newegg API Development Guide.
SL007	The value in the field: PackageWeight cannot exceed {Maximum package weight limit by Newegg Partnered Carrier} lbs. ({Maximum package weight limit by Newegg Partnered Carrier}kg) when using Newegg Partnered Carrier service (ShippingCarrierCode: {ShippingCarrierCode}). For more detail, please review Newegg API Development Guide.
SL008	The value in the field: PackageLength cannot exceed {Maximum package length limit by Newegg Partnered Carrier} inches ({Maximum package length limit by Newegg Partnered Carrier} cm) when using Newegg Partnered Carrier service (ShippingCarrierCode: {ShippingCarrierCode}). For more detail, please review Newegg API Development Guide.
SL009	Package size cannot exceed {Maximum package cubic size limit by Newegg Partnered Carrier}inches ({Maximum package cubic size limit by Newegg Partnered Carrier} cm) in (Package Length + 2x Package Width + 2x Package Height) when using Newegg Partnered Carrier service (ShippingCarrierCode: {ShippingCarrierCode}). For more detail, please review Newegg API Development Guide.
SL010	Cannot submit the request because seller part number(s):{sellerpart#} does NOT belong to this order.
SL015	Cannot submit the request because currently only supports USA domestic transportation. Please revise the Ship From or Ship To information and try again.

SL027	Invalid request. You are not able to use Newegg Shipping Label Service before sign up. Please visit Newegg Seller Portal > Add-on Services > Newegg Shipping Label Service to sign up.
SL030	Invalid request. The <code>ShippingServiceCode</code> :{ shipping service code} you specified is not a recognized value for <code>ShippingCarrierCode</code> :{ shipping carrier code}. Please review Newegg API Development Guide or schema for correct information.

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SL001</Code>
        <Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
    </Error>
</Errors>
```

#### Example: Json, Response

```
{
    "Code": "SL001",
    "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"
}
```

### 11.1.5. Newegg Partnered Carrier- UPS

Newegg partnered carriers offer deeply discounted rates, and the cost is billed to your account as a “Newegg Shipping Label”. We will provide a shipping label that you can print and use with our partnered carriers. The rates apply to shipments originating from the continental 50 U.S. states only (does not include Puerto Rico or APO/FPO addressed). Please note this service is currently not available for International Sellers.

#### Shipment Measurement Guidelines

##### - Shipments Weight and Size Limitations.\*

- Packages can be up to 150 lbs. (70 kg).
- Packages can be up to 165 inches (419 cm) in (Length + 2x Width + 2x Height).
- Packages can be up to 108 inches (270 cm) in Length.

\*Packages with a large size-to-weight ratio require special pricing and dimensional weight calculations.

Example: A box measuring 34" x 34" x 34" exceeds the maximum dimensions. The length (34") plus 2x width (2 x 34") and 2x height (2 x 34") equals 170".

#### - **Large Package**

If packages Length plus 2x Width plus 2x Height exceeds 130 inches (330 cm), UPS applies a Large Package Surcharge.

Example: A box measuring 36" x 26" x 26" the length (36") plus 2x width (2 x 26") and 2x height (2 x 26") equals 140".

UPS will accept the box, but they may apply a Large Package Surcharge.

#### - **Dimensional Weight**

If a package's volume is more than 5,184 cubic inches (3 cubic feet), UPS compares the dimensional weight (cubic inches divided by 166) with the actual weight. If the dimensional weight is greater than actual weight, UPS uses the package's dimensional weight as the billable weight.

Example: A package measuring 26" x 16" x 16" has a volume of 6,656 cubic inches. The dimensional weight equals 6,656 divided by 166 or 41 lbs. If the package's actual weight is 24 lbs., the dimensional weight may be used for the billable weight.

#### - **Billable Weight**

For large packages, UPS determines the billable weight by taking the package dimensions into account. For large packages, if the dimensional weight is greater than the actual weight, UPS may use the dimensional weight instead of the actual weight.

### **11.1.6. Newegg Partnered Carrier- FedEx**

Newegg partnered carriers offer deeply discounted rates, and the cost is billed to your account as a "Newegg Shipping Label Fee". We will provide a shipping label that you can print and use with our partnered carriers. The rates apply to shipments originating from the continental 50 U.S. states only (does not include Puerto Rico or APO/FPO addressed). Please note this service is currently not available for International Sellers.

#### **Shipment Measurement Guidelines**

##### **- Shipments Weight and Size Limitations.\***

- Packages can be up to 150 lbs. (70 kg).
- Packages can be up to 165 inches (419 cm) in (Length + 2x Width + 2x Height).
- Packages with a large size-to-weight ratio require special pricing and dimensional weight calculations.\*Packages with a large size-to-weight ratio require special pricing and dimensional weight calculations.

\*: Packages that exceed weight and size limits may be refused by FedEx or at FedEx's discretion of shipment and apply an oversize surcharge.

**Example:** A box measuring 34" x 34" x 34" exceeds the maximum dimensions. The length (34") plus 2x width (2 x 34") and 2x height (2 x 34") equals 170".

- **Large Package**

If packages Length plus 2x Width plus 2x Height exceeds 130 inches (330 cm), FedEx applies an Oversize Surcharge.

**Example:** A box measuring 36" x 26" x 26" the length (36") plus 2x width (2 x 26") and 2x height (2 x 26") equals 140".

FedEx will accept the box, but they may apply an Oversize Surcharge.

- **Dimensional Weight**

If the dimensional weight is greater than actual weight, FedEx uses the package's dimensional weight as the billable weight.

**Example:** A package measuring 26" x 16" x 16" has a volume of 6,656 cubic inches. The dimensional weight equals 6,656 divided by 166 or 41 lbs. If the package's actual weight is 24 lbs, the dimensional weight may be used for the billable weight.

- **Billable Weight**

For large packages, FedEx determines the billable weight by taking the package dimensions into account. For large packages, if the dimensional weight is greater than the actual weight, FedEx may use the dimensional weight instead of the actual weight.

## 11.2. Get Request Detail

Retrieving the processing result including [Shipping Request \(section 11.1\)](#), [Confirm Shipping Request \(section 11.3\)](#), and [Void Shipping Request \(section 11.4\)](#).

### 11.2.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/shippingservice/shippinglabel/shippingdetail?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	10 per min per client

### 11.2.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest	IssueUser	No	String	Specify your eligible seller account (email address) here
	OperationType	Yes	String	Fixed values: GetShippingDetailRequest
	RequestBody	YES if no RequestID is not available	String	The request ID  * This service does NOT support querying multiple request IDs.
		YES if no RequestID is not available	String	The order number

Example: XML, Request

#### 11.2.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#).

Error Code	Description
SL013	Cannot find shipping request:{[request ID]}

## Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors>  
    <Error>  
        <Code>SI.001</Code>
```

```

<Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
</Error>
</Errors>

```

Example: Json, Response

```

{
  "Code": "SL001",
  "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"
}

```

## 11.3. Confirm Shipping Request

Once a shipping estimate is available, you must confirm it when you are ready to ship.

Please note: once a shipping request is confirmed, Newegg will continue to process the order and the status of order will soon become “Shipped”. Also, the shipping information will be displayed in Order Detail under the customer’s My Account section, and Newegg also send the customer an email notification with all of the shipping information.

Once a shipping request is confirmed, the revoke of the operation is not available.

### 11.3.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/shippingservice/shippinglabel/confirmshippingrequest?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	10 per min per client

### 11.3.2. Request Body

Attribute	Required?	Format	Description
≥	OperationType	Yes	String Fixed values:

					ConfirmShippingRequest
RequestBody	RequestIDList	RequestID	Yes	String	The shipping request ID

Example: XML, Request

## XSD

API Schema > ShippingLabel > ConfirmShippingRequest > ShippingComfirmRequest.xsd

```
POST
https://api.newegg.com/marketplace/shippingservice/shippinglabel/confirmshippingrequest?sellerid={sellerid}

    "RequestIDList": [
      "2PQBYWH4V68ZP",
      "2PQCX3SPZ3QBF"
    ],
    "RequestDate": "12/06/2015 10:21:00",
    "RequestStatus": "CONFIRMING"
  }
}

```

#### 11.3.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SL014	This shipping request cannot be confirmed. The shipping request has not estimated, Please submit estimate shipping cost request first.
SL017	Request {request ID} cannot be submitted because the shipping request has {confirmed   voided}. Please revise the request list and submit again.
SL024	Invalid Request ID

#### Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>

```

```

<Code>SL001</Code>
<Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
</Error>
</Errors>

```

Example: Json, Response

```
{
  "Code": "SL001",
  "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"
}
```

## 11.4. Void Shipping Request

An unconfirmed shipping request can be void using this function.

### 11.4.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/shippingservice/shippinglabel/voidshippingrequest?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	10 per min per client

### 11.4.2. Request Body

Attribute	Required?	Format	Description
New	OperationType	String	Fixed values: VoidShippingRequest

	RequestBody	RequestIDList	RequestID	Yes	String	Shipping request ID
--	-------------	---------------	-----------	-----	--------	---------------------

Example: XML, Request

XSD

[API Schema > ShippingLabel > VoidShippingRequest > ShippingVoidRequest.xsd](#)

```
POST
https://api.newegg.com/marketplace/shippingservice/shippinglabel/voidshippingrequest?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

<NeweggAPIRequest>
  <OperationType>VoidShippingRequest</OperationType>
  <RequestBody>
    <RequestIDList>
      <RequestID>2PQBYWH4V68ZP</RequestID>
      <RequestID>2PQCX3SPZ3QBF</RequestID>
    </RequestIDList>
  </RequestBody>
</NeweggAPIRequest>
```

Example: Json, Response

```
https://api.newegg.com/marketplace/shippingservice/shippinglabel/voidshippingrequest?sellerid={sellerid}

SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

{
  "OperationType": "VoidShippingRequest",
  "RequestBody": {
    "RequestIDList": {
```

```

        "RequestID": [
            "2PQBYWH4V68ZP",
            "2PQCX3SPZ3QBF"
        ]
    }
}
}
}

```

### 11.4.3. Response Body

	Attribute		Format	Description
NeweggAPIResponse	IsSuccess		String	Used to identify the operation of Get feed status is successful True or False
	OperationType		String	Fixed value: ConfirmShippingResponse
	SellerID		String	Your seller ID
	ResponseBody	RequestID	String	The Identifier of a submission
		RequestDate	String	Request date.
	RequestIDList	RequestStatus	String	The status of the request submission. VOIDING

Example: XML, Response

### XSD

API Schema > ShippingLabel > VoidShippingRequest > ShippingVoidResponse.xsd

```

<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
    <IsSuccess>true</IsSuccess>
    <OperationType>VoidShippingResponse</OperationType>
    <SellerID>A006</SellerID>
    <ResponseBody>
        <RequestIDList>
            <RequestID>2PQBYWH4V68ZP</RequestID>
            <RequestID>2PQCX3SPZ3QBF</RequestID>
        </RequestIDList>
        <RequestDate>12/06/2015 10:21:00</RequestDate>
        <RequestStatus>VOIDING</RequestStatus>
    </ResponseBody>
</NeweggAPIResponse>

```

#### Example: Json, Response

```
{  
    "IsSuccess": "true",  
    "OperationType": "VoidShippingResponse",  
    "SellerID": "A006",  
    "ResponseBody": {  
        "RequestIDList": {  
            "RequestID": [  
                "2PQBYWH4V68ZP",  
                "2PQCX3SPZ3QBF"  
            ]  
        },  
        "RequestDate": "12/06/2015 10:21:00",  
        "RequestStatus": "CONFIRMING"  
    }  
}
```

#### 11.4.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SL017	Request {request ID} cannot be submitted because the shipping request has {confirmed   voided}. Please revise the request list and submit again.

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors>  
    <Error>  
        <Code>SL001</Code>  
        <Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>  
    </Error>  
</Errors>
```

Example: Json, Response

```
{  
    "Code": "SL001",  
    "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"  
}
```

## 11.5. Get Package List

When you are ready to ship an order, you can request a package list using this function.

### 11.5.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/shippingservice/shippinglabel/packagelist?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	10 per min per client

### 11.5.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest RequestBod	OperationType	Yes	String	Fixed values: GetPackageListRequest
	RequestID	YES if OrderNumber is not available	String	The shipping request ID
	OrderNumber	YES if no RequestID is not available	String	The order number.

#### Example: XML, Request

##### XSD

API Schema > ShippingLabel > GetPackageList > GetPackageListRequest.xsd

```
PUT
https://api.newegg.com/marketplace/shippingservice/shippinglabel/packagelist?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

<NeweggAPIRequest>
    <OperationType>GetPackageListRequest</OperationType>
    <RequestBody>
        <RequestID>2PQCX3SPZ3QBF</RequestID>
    </RequestBody>
</NeweggAPIRequest>
```

#### Example: Json, Request

```
PUT

#### 11.5.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SL018	Invalid request. OrderNumber or RequestId is required.

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SL001</Code>
        <Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "SL001",
    "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"
}
```

## 11.6. Get Shipping Labels

When you are ready to ship an order, you can request a shipping label for a confirmed shipping request.

### 11.6.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/shippingservice/shippinglabel/shippinglabels?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

## Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	10 per min per client

### 11.6.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest RequestBod	OperationType	Yes	String	Fixed values: GetShippingLabelRequest
	RequestID	YES if OrderNumber is not available	String	The shipping request ID
	OrderNumber	YES if no RequestID is not available	String	The order number.

Example: XML, Request

## XSD

API Schema > ShippingLabel > GetShippingLabels > GetShippingLabelRequest.xsd

```

PUT

#### 11.6.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SL018	Invalid request. OrderNumber or RequestId is required.

Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SL001</Code>
        <Message>Order Number should be an integer (ranging from 1 to 2147483647)</Message>
    </Error>
</Errors>

```

Example: Json, Response

```
{
    "Code": "SL001",
    "Message": "Order Number should be an integer (ranging from 1 to 2147483647)"
}
```

## 12. DataFeed Management

The Newegg DataFeed API lets you upload item creation/update, item inventory and order ship notice to Newegg Systems and return result in **XML/Json format**. You can also use the Newegg DataFeed API to get processing status and report(s).

The process for submitting feeds is as follows:

1. Submit an XML request using the SubmitFeed operation along with all required metadata, including a value from the FeedType list. Current available data feed types:
  - [Creating item list or updating existing item information.](#)
  - [Updating inventory and price. This function does not support multiple warehouse locations.](#)
  - [Updating inventory for Newegg International](#)
  - [Updating price for Newegg International](#)
  - [Submit/update the setting of the country exclusion for Newegg International selling items.](#)
  - [Updating order shipping information.](#)
  - [Create orders with other platforms other than Newegg Marketplace. This is only available for SBN \(Shipped by Newegg\) sellers.](#)
  - [Batch submit/update Subscribe & Save items.](#)
  - [Submit/update volume discount items in batch.](#)
  - [Batch deal submission requests.](#)
  - [Batch mark Newegg Premier Items.](#)
  - [Adding warranty services for refurbished and used items.](#)
2. As with all submissions to Newegg Marketplace API, you must also include authentication information. The SubmitFeed operation returns a RequestID, which you can use to periodically check the status of the feed using the GetFeedsStatus operation.
3. If Newegg Marketplace API is still processing a request, the RequestStatus element of the GetFeedsStatus operation returns a status of IN\_PROGRESS. If the processing is complete, a status of FINISHED is returned.
4. When the feed processing is complete, you can use the GetFeedResult operation to receive a processing report that describes which records in the feed were successful and which records generated errors.
5. Analyze the processing report, correct any errors in the transmission, and resubmit the feed using the SubmitFeed operation. Repeat the process until there are no errors in the processing report to complete your updates.
6. Please download the XSD's and XML sample files for different feed types from [https://sellerportal.newegg.com/Guideline/Newegg\\_Marketplace\\_API\\_DeveloperGuide.zip](https://sellerportal.newegg.com/Guideline/Newegg_Marketplace_API_DeveloperGuide.zip). You can also contact Newegg Marketplace Integration team: [Datafeeds@newegg.com](mailto>Datafeeds@newegg.com) for assistance.

## 12.1. Submit Feed

### 12.1.1. Resource URL & Information

#### Resource URL

`https://api.newegg.com/marketplace/datafeedmgmt/feeds/submitfeed?sellerid={sellerid}&requesttype={RequestType}`

Note: Please make sure your request URL is all in lower case (except for Seller ID and Request Type) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace
requesttype	Yes	<p>The feed type which you want to submit to our system, which determines the action you want to perform through datafeed systems.</p> <p>Current support following types:</p> <p><b>ITEM_DATA –</b></p> <ul style="list-style-type: none"><li>- <b>Batch creating item / update item / replace or append item image(s) based on specified subcategories.</b></li><li>- <b>Batch item creation by matching the existing items in Newegg catalog.</b> The main intent of this approach is to let sellers listing an item using ISBN, UPC, Manufacturer Part Number, or Newegg Item Number without specifying sub-category related information. This helps sellers creating the items more quickly.</li><li>- <b>Batch updating basic information for items without having to specify item subcategory.</b> This template can only be used to update common item fields such as “Website Short Title”, Product Description”, “Item Images”, etc. Complete list of common fields listed in section 11.1.2</li></ul> <p><b>INVENTORY_AND_PRICE_DATA -</b> Through this type you can batch update inventory/price.</p> <p><b>INVENTORY_DATA -</b> Through this type you can batch update inventory for Newegg International program.</p> <p><b>PRICE_DATA -</b> Through this type you can batch update price for additional countries for Newegg International program.</p>

		<p><b>ORDER_SHIP_NOTICE_DATA</b> - Through this type you can batch ship order.</p> <p><b>MULTICHANNEL_ORDER_DATA</b> – Through this type you can batch creating multi-channel orders that are not placed on Newegg.com, orders that will be SBN (Shipped by Newegg).</p> <p><b>ITEM_SUBSCRIPTION</b> – Through this type you can batch adding or removing Subscription &amp; Save items.</p> <p><b>VOLUME_DISCOUNT_DATA</b> - Through this type you can batch create/update/delete volume discount.</p> <p><b>ITEM_PROMOTION_DATA</b> - Through this type you can batch create item promotion requests.</p> <p><b>ITEM_PREMIER_MARK_DATA</b> – Through this type you can batch add / remove items for Newegg Premier Program</p> <p><b>ITEM_WARRANTY_DATA</b> – Adding Warranty Services for Items</p>
--	--	--

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats
POST	Required	XML, Json	XML, Json

Request Type	Rate Limited	Maximum Size of Request
ITEM_DATA	10 per min per client	30,000 records per hour, 20MB per feed
INVENTORY_AND_PRICE_DATA	100 per min per client	20MB per feed
PRICE_DATA		
ITEM_COUNTRY_RESTRICTION_DATA		
ORDER_SHIP_NOTICE_DATA		
MULTICHANNEL_ORDER_DATA		
ITEM_SUBSCRIPTION		
VOLUME_DISCOUNT_DATA		
ITEM_PROMOTION_DATA		
ITEM_PREMIER_MARK_DATA		
ITEM_WARRANTY_DATA		

#### 12.1.2. Request Body

## **ITEM\_DATA (Create, Update Item Info)**

There are several options available:

1. [Batch creating item / update item / replace or append image to item\(s\) based on different sub-categories](#). For each subcategory, there's a category structure schema that needs to be followed (different subcategory requires different property input per item). You can download these schemas by logging into Seller Portal and select Manage Items -> Batch Item Creation/Update -> The tab of Download File Template Batch -> Select "Batch Item Creation" from the drop-down options of Action-> Select Extensible Markup Language (.XML) file format-> select the industry from the drop-down list.
2. [Batch item creation by matching the existing items in Newegg catalog](#). The main intent of this approach is to let sellers listing an item using ISBN, UPC, Manufacturer Part Number, or Newegg Item Number without specifying sub-category related information. This helps sellers creating the items more quickly.
3. [Batch updating the basic information for items without specifying item subcategory](#). This template can only be used to update common fields (not subcategory specific fields).

**CANNOT exceed 7,000 items or total file size cannot exceed 10 MB per request.**

The following information provides element definitions. You can also contact Newegg Marketplace Integration team:  
Datafeeds@newegg.com for assistance.

The following information provides Attribute Definitions and the corresponding XML example.

### **Batch creating item / update item / replace or append image to item(s) based on different sub-categories**

Attribute		Format	Description	Required
DocumentVersion		Decimal	The identifier for the version of current datafeed; assigned by Newegg	Y
MessageType		String	BatchItemCreation	Y
Message Itemfeed	SubCategoryID	String	Identify the category specification. There is only one category can be used for any single item.  <b>NOTE: Once an item is created, this information cannot be updated.</b>	Y
	Item	Action	Specify the action you would like to perform. - Enter " <b>Create Item</b> " if you want to list a new product that is not currently in your item list.	N

			<ul style="list-style-type: none"> <li>- Enter "<b>Update Item</b>" to update the information of a product already in your item list (does not include updating of pricing fields: Currency, MSRP, MAP, Selling Price, Shipping, Inventory and Activation Mark)</li> <li>- Enter "<b>Update/Append Image</b>" to upload additional image(s) of the product or overwrite existing image(s).</li> <li>- Enter "<b>Replace Image</b>" to replace all of your existing images with the image URL's provided in this file. When this action is selected, the system will only process the Item Images field and Activation Mark; all other information, including Selling Price, will be ignored.</li> </ul> <p>If no value was entered for this field, by default the system will do the following:</p> <ul style="list-style-type: none"> <li>- <b>If item currently does not exist in your item list</b>, we will treat it as if you entered "<b>Create Item</b>".</li> </ul>	
BasicInfo	SellerPartNumber	String	<p>A seller-defined unique identifier for an item. An alphanumeric string, max 40 characters including space.</p> <p><b>NOTE: Once an item is created, this information cannot be updated.</b></p>	Y
	Manufacturer	String	<p>The manufacturer name for the item. You must use a pre-defined value from our system or request the addition of a new value from the Content Team at <a href="mailto:mktp.content@newegg.com">mktp.content@newegg.com</a>.</p> <p><b>NOTE: Once an item is created, this information cannot be updated.</b></p>	Y
	ManufacturerPartNumberOrISBN	String	<p>Manufacturer defined unique identifier for an item. An alphanumeric string, max 20 characters including space.</p> <p><b>NOTE: Once an item is created, this information cannot be updated.</b></p>	Required if item UPC code is not provided
	UPC	String	<p>A unique Universal Product Code (UPC) (12 characters only) or European Article Number</p>	Required if item

			(EAN)(13 characters only) for an item. A numeric string, max 40 characters. <b>NOTE: Once an item is created, this information cannot be updated.</b>	Manufacturer Part # / ISBN is not provided
	RelatedSellerPartNumber	String	If the item is a variant of another ("related") item with its own seller part #, list the related item's seller part # here. This is required for the variant item to display under a single product page. An alphanumeric string, max 20 characters including space. <b>NOTE: Once an item is created, this information cannot be updated.</b>	N
	WebsiteShortTitle	String	The short, easily identifiable item name for this item. It will be used as the main name for your product on all store pages, Sales Orders and receipts, so should not contain variables. Maximum characters: 200.	Y
	BulletDescription	String	Enter concise descriptions of selected product features or functions which will be listed by bullet point below the website short/long title on the product page. Use separator "^^" to separate different points. Maximum characters: 200, including spaces and separators. NO HTML is allowed.	N
	ProductDescription	String	The detailed description to be featured on the item page. This description should state the features and functions of the product. Should be the same for all items in product family. (4000 character limit.) Accepted HTML for Product Description fields. Only <ol>, <ul>, <li>,  , <p>, <b>, <i>, <u>, <em>, <strong>, <sub>, <sup> are allowed.	Y
ItemDimension	ItemLength	Decimal	Individual unit shipping length in inches	N
	ItemWidth	Decimal	Individual unit shipping width in inches	N
	ItemHeight	Decimal	Individual unit shipping height in inches	N
ItemWeight		Decimal	Individual unit shipping weight in lb.	Y
ItemCondition		String	Available values for Item Condition:	N

			<ul style="list-style-type: none"> <li>• <b>New:</b> This means the product will ship as received by the manufacturer, sealed, with all advertised components, and with the manufacturer warranty.</li> <li>• <b>Refurbished:</b> This means the product was tested and repaired as required to meet the standards of the refurbisher, which may or may not be the original manufacturer. Any exceptions to the condition of the item outside the manufacturer's information should be provided in the listing, up to and including warranty details.</li> </ul> <p>The following values are only apply to U.S. Marketplace:</p> <ul style="list-style-type: none"> <li>• <b>UsedLikeNew:</b> This means that the product has been opened, possibly used but is in perfect factory condition with no signs of cosmetic or functional defect. Product includes warranty, and accessories found with the original product. Product may or may not be in the original packaging. Returned items with minor packaging defects fall under this category.</li> <li>• <b>UsedVeryGood:</b> This means that the product has been opened, may show slight signs of use and cosmetic blemish, and may be missing minor accessories, but remain in excellent condition. Product does not come with warranty unless stated otherwise in product description.</li> <li>• <b>UsedGood:</b> This means that the product has been used, may show clear signs of use and may be missing minor accessories, but remain in good condition. Product does not come with warranty unless stated otherwise in product description.</li> <li>• <b>UsedAcceptable:</b> This means that the product shows clear signs of use, cosmetic defect, and may be missing minor accessories and manual, but remain in working condition.</li> </ul>
--	--	--	---

			Product does not come with warranty unless stated otherwise in product description. Functionality issues beyond signs of use should be disclosed in product description. <b>NOTE: Once an item is created, this information cannot be updated.</b>	
	PacksOrSets	Integer	Identify the package count of this product. All products in a pack or set will have matching item and condition. <b>NOTE: Once an item is created, this information cannot be updated.</b>	Y
	ItemPackage	String	Available value to identify the package of product	N
	ShippingRestriction	String	Identify if there is any shipping restriction for product	Y
	Currency	String	The form of money for all price related elements. Default value: USD	N
	MSRP	Decimal	The default manufacturer's suggested retail price for the product for the United States. If you want to remove MSRP, input "0.00" or '0' in this field. If null, no change to current setting.	N
	MAP	Decimal	The default Minimum advertised price for the United States. If the Selling Price is below the defined MAP, the website will ask customer to add item to shopping cart to see the item's price. If you want to remove MAP, input "0.00" or '0' in this field. If null, no change to current setting.	N
	CheckoutMAP	String	Regardless the Selling Price and the value inputted in MAP field, if the Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. This is the default setting of the United of states.	N
	SellingPrice	Decimal	The default selling price for the United States.	Y
	Shipping	String	The default shipping charge setting for this item for the United States.	Y

		Inventory	Integer	The inventory quantity available for the only warehouse location.  NOTE: If multiple warehouses are available, Please submit International Program- Update Inventory requests/feeds to manage inventory.	Y
		ActivationMark	String	The ActivationMark's default setting is "True" on all uploaded products for United States. All products must be activated to be visible on Newegg.com United States. You may set it to "False" if you wish to deactivate your product.	N
ItemImages	Image	ImageUrl	String	Enter the URL for this item's product images. All URLs must be a direct link to the actual image. Image file must be (.jpg or .jpeg). An alphanumeric string; 2000 characters maximum in length.  Minimum image size: 640 pixels width and 480 pixels height.  The maximum file size for each image is 5MB. All files larger than the 5MB limit will fail to process.	Y
		IsPrimary		The identifier to specify the default image, if multiple images will be uploaded.	N
ConditionDetails		String	Information related to the condition, not including New or Refurbished, of the product can be described here to help customer understanding the product.  <b>NOTE: This information only apply to U.S. Marketplace</b>		N

UsedItemImages	Image	ImageUrl	String	Item images of your item to better describe the characteristics of used condition. This image(s) should not be images of a new item. Enter the URL for the USED item's specified product images. All URLs must be a direct link to the actual image. Image file must be (.jpg or .jpeg) Minimum image size: 640 pixels width and 480 pixels height. The maximum file size for each image is 5MB. All files larger than the 5MB limit will fail to process. <b>NOTE: This information only apply to U.S. Marketplace</b>	N
				The identifier to specify the default image, if multiple images will be uploaded. <b>NOTE: This information only apply to U.S. Marketplace</b>	N
	Warning	Prop65	String	Used if the product is subject to prop 65 regulations in California.	N
		Prop65Motherboard	String	Used if the product is motherboard related subject to prop 65 regulations in California.	N
		CountryOfOrigin	String	Country of Origin is the country of manufacture/ production of your items. Newegg only accept ISO standard three-letter codes for the various countries of the world. For complete list, please refer to the following: <a href="http://en.wikipedia.org/wiki/ISO_3166-1_alpha-3">http://en.wikipedia.org/wiki/ISO_3166-1_alpha-3</a> <b>Please note: this value is required if you intend to sell your items globally through Newegg.</b>	N
		OverAge18Verification	String	Used if the product contains graphics or adult content that is inappropriate for person under 18 years old.	N

			ChokingHazard	String	<p>Choking Hazard Warning Requirements for Children's Toys and Games</p> <p>You may select up to four of these six warnings. You should never need to choose more than four warnings, as a warning that a product "contains" a small ball or marble should not apply simultaneously with the corresponding warning that a product "is" a small ball or marble.</p> <p>Please refer to Consumer product Safety Improvement Act of 2008 (CPSIA) for more information.</p>	N
			SubCategoryProperty	Vary	Section containing category-specific information such as properties. Reference the following XSDs to complete the Product Data section (only one category can be used for a given item).	Y

MessageType				String	BatchItemCreation	Y
Message	Itemfeed	Item	BasicInfo	SellerPartNumber	String <p><b>NOTE: Once an item is created, this information cannot be updated.</b></p>	Y
				Manufacturer	String <p>The manufacturer name for the item. You must use a pre-defined value from our system or request the addition of a new value from the Content Team at <a href="mailto:mktp.content@newegg.com">mktp.content@newegg.com</a>.</p> <p><b>NOTE: Once an item is created, this information cannot be updated.</b></p>	Y

			<b>updated.</b>	
	ManufacturerPartNumberOrISBN	String	Manufacturer defined unique identifier for an item. An alphanumeric string, max 20 characters including space. <b>NOTE: Once an item is created, this information cannot be updated.</b>	Required if item UPC is not provided
	UPC	String	A unique Universal Product Code (UPC) (12 characters only) or European Article Number (EAN)(13 characters only) for an item. A numeric string, max 40 characters. <b>NOTE: Once an item is created, this information cannot be updated.</b>	Required if item Manufacturer Part # / ISBN is not provided
	NeweggItemNumber	String	Newegg's unique identifier for an item	Required if neither UPC or item Manufacturer Part # / ISBN is not provided
	Currency	String	The form of money for all price related elements. Default value: USD	N
	MSRP	Decimal	The default manufacturer's suggested retail price for the product for the United States. If you want to remove MSRP, input "0.00" or '0' in this field. If null, no change to current setting.	N
	MAP	Decimal	The default Minimum advertised price for the United States. If the Selling Price is below the defined MAP, the website will ask customer to add item to shopping cart to see the item's price. If you want to remove MAP, input "0.00" or '0' in this field. If null, no	N

			change to current setting. If the Selling Price is below the defined MAP, the website will ask customer to add item to shopping cart to see the item's price.	
	CheckoutMAP	String	Regardless the Selling Price and the value inputted in MAP field, if the Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. This is the default setting of the United of states.	N
	SellingPrice	Decimal	The default selling price for the United States.	Y
	Shipping	String	The default shipping charge setting for this item for the United States.	Y
	Inventory	Integer	The inventory quantity available for the only warehouse location. NOTE: If multiple warehouses are available, Please submit International Program- Update Inventory requests/feeds to manage inventory.	Y
	ItemCondition	String	<p>Available values for Item Condition:</p> <ul style="list-style-type: none"> <li>• <b>New:</b> This means the product will ship as received by the manufacturer, sealed, with all advertised components, and with the manufacturer warranty.</li> <li>• <b>Refurbished:</b> This means the product was tested and repaired as required to meet the standards of the refurbisher, which may or may not be the original manufacturer. Any exceptions to the condition of the item outside the manufacturer's information</li> </ul>	Y

should be provided in the listing, up to and including warranty details.

The following values are only apply to U.S. Marketplace:

- **UsedLikeNew:** This means that the product has been opened, possibly used but is in perfect factory condition with no signs of cosmetic or functional defect. Product includes warranty, and accessories found with the original product. Product may or may not be in the original packaging. Returned items with minor packaging defects fall under this category.

- **UsedVeryGood:** This means that the product has been opened, may show slight signs of use and cosmetic blemish, and may be missing minor accessories, but remain in excellent condition. Product does not come with warranty unless stated otherwise in product description.

- **UsedGood:** This means that the product has been used, may show clear signs of use and may be missing minor accessories, but remain in good condition. Product does not come with warranty unless stated otherwise in product description.

- **UsedAcceptable:** This means that the product shows clear signs of use, cosmetic defect, and may be missing minor accessories and manual, but remain in

				working condition. Product does not come with warranty unless stated otherwise in product description. Functionality issues beyond signs of use should be disclosed in product description. <b>NOTE: Once an item is created, this information cannot be updated.</b>	
	PacksOrSets		Integer	Identify the package count of this product. All products in a pack or set will have matching item and condition. <b>NOTE: Once an item is created, this information cannot be updated.</b>	Y
	ActivationMark		String	The ActivationMark's default setting is "True" on all uploaded products because all products must be activated to be visible on Newegg websites. You may set it to "False" if you wish to hide your product.	N
	ConditionDetails		String	Information related to the condition, not including New or Refurbished, of the product can be described here to help customer understanding the product. <b>NOTE: This information only apply to U.S. Marketplace</b>	N
	UsedItemImages	Image	ImageUrl	Item images of your item to better describe the characteristics of used condition. This image(s) should not be images of a new item. Enter the URL for the USED item's specified product images. All URLs must be a direct link to the actual image. Image file must be (.jpg or .jpeg)	N

					Minimum image size: 640 pixels width and 480 pixels height. The maximum file size for each image is 5MB. All files larger than the 5MB limit will fail to process. <b>NOTE: This information only apply to U.S. Marketplace</b>	
		IsPrimary	Boolean	The identifier to specify the default image, if multiple images will be uploaded. <b>NOTE: This information only apply to U.S. Marketplace</b>	N

### Batch updating the basic information for items without specifying item subcategory

Attribute				Format	Description	Required
DocumentVersion				Decimal	The identifier for the version of current datafeed; assigned by Newegg	Y
MessageType				String	BatchItemCreation	Y
Message	Itemfeed	Item	Action	String	Specify the action you would like to perform. - Enter " <b>Update Item</b> " to update the information of a product already in your item list (does not include updating of pricing fields: Currency, MSRP, MAP, Selling Price, Shipping, Inventory and Activation Mark)	Y

				<ul style="list-style-type: none"> <li>- Enter "<b>Update/Append Image</b>" to upload additional image(s) of the product or overwrite existing image(s).</li> <li>- Enter "<b>Replace Image</b>" to replace all of your existing images with the image URL's provided in this file. When this action is selected, the system will only process the Item Images field and Activation Mark; all other information, including Selling Price, will be ignored.</li> </ul>	
BasicInfo	SellerPartNumber	String	A seller-defined unique identifier for an item. An alphanumeric string, max 40 characters including space	Y	
	WebsiteShortTitle	String	The short, easily identifiable item name for this item. It will be used as the main name for your product on all store pages, Sales Orders and receipts, so should not contain variables. Maximum characters: 200.	N	
	BulletDescription	String	<p>Enter concise descriptions of selected product features or functions which will be listed by bullet point below the website short/long title on the product page.</p> <p>An alphanumeric string. Use separator "^^" to separate different points. Maximum characters: 200, including spaces and separators. NO HTML is allowed.</p>	N	
	ProductDescription	String	<p>The detailed description to be featured on the item page. This description should state the features and functions of the product. Should be the same for all items in product family. (4000 character limit.)</p> <p>Accepted HTML for Product Description fields. Only &lt;ol&gt;,&lt;ul&gt;, &lt;li&gt;,&lt;br&gt;, &lt;p&gt;, &lt;b&gt;, &lt;i&gt;, &lt;u&gt;, &lt;em&gt;, &lt;strong&gt;, &lt;sub&gt;, &lt;sup&gt; are allowed.</p>	N	
	ItemDimension	ItemLength	Decimal	Individual unit shipping length in inches	N
		ItemWidth	Decimal	Individual unit shipping width in inches	N
		ItemHeight	Decimal	Individual unit shipping height in inches	N
	ItemWeight		Decimal	Individual unit shipping weight in lb.	Y
	ActivationMark		String	The ActivationMark's default setting is "True" on all uploaded products because all products must be activated to be visible on Newegg websites. You may	N

					set it to "False" if you wish to deactivate your product.		
		ItemImages	Image	ImageUrl	String	Enter the URL for this item's product images. All URLs must be a direct link to the actual image. Image file must be (.jpg or .jpeg). An alphanumeric string; 2000 characters maximum in length. Minimum image size: 640 pixels width and 480 pixels height. The maximum file size for each image is 5MB. All files larger than the 5MB limit will fail to process.	
			IsPrimary	Boolean	The identifier to specify the default image, if multiple images will be uploaded.	N	
		ConditionDetails		String	Information related to the condition, not including New or Refurbished, of the product can be described here to help customer understanding the product. <b>NOTE: This information only apply to U.S. Marketplace</b>	N	
		UsedItemImages	Image	ImageUrl	String	Item images of your item to better describe the characteristics of used condition. This image(s) should not be images of a new item. Enter the URL for the USED item's specified product images. All URLs must be a direct link to the actual image. Image file must be (.jpg or .jpeg) Minimum image size: 640 pixels width and 480 pixels height. The maximum file size for each image is 5MB. All files larger than the 5MB limit will fail to process. <b>NOTE: This information only apply to U.S. Marketplace</b>	N
			IsPrimary	Boolean	The identifier to specify the default image, if multiple images will be uploaded. <b>NOTE: This information only apply to U.S. Marketplace</b>	N	
	Warning	Prop65		String	Used if the product is subject to prop 65 regulations in California.	N	
		Prop65Motherboard		String	Used if the product is motherboard related subject to prop 65 regulations in California.	N	
		CountryOfOrigin		String	Country of Origin is the country of manufacture/ production of your items. Newegg only accept ISO	N	

					standard three-letter codes for the various countries of the world. For complete list, please refer to the following: <a href="http://en.wikipedia.org/wiki/ISO_3166-1_alpha-3">http://en.wikipedia.org/wiki/ISO_3166-1_alpha-3</a> <b>Please note: this value is required if you intend to sell your items globally through Newegg.</b>	
			OverAge18Verification	String	Used if the product contains graphics or adult content that is inappropriate for person under 18 years old.	N
			ChokingHazard	String	Choking Hazard Warning Requirements for Children's Toys and Games  You may select up to four of these six warnings. You should never need to choose more than four warnings, as a warning that a product "contains" a small ball or marble should not apply simultaneously with the corresponding warning that a product "is" a small ball or marble.  Please refer to Consumer product Safety Improvement Act of 2008 (CPSIA) for more information.	N

## INVENTORY\_AND\_PRICE\_DATA

For schema, please download the XSD's and XML sample files from

[https://sellerportal.newegg.com/Guideline/Newegg\\_Marketplace\\_API\\_DeveloperGuide.zip](https://sellerportal.newegg.com/Guideline/Newegg_Marketplace_API_DeveloperGuide.zip)

**Note:** This feature will not support multiple warehouse locations.

The following information provides element definitions. You can also contact Newegg Marketplace Integration team: Datafeeds@newegg.com for assistance.

Attribute	Format	Description	Required
-----------	--------	-------------	----------

DocumentVersion		Decimal	The identifier for the version of current datafeed; assigned by Newegg	Y
MessageType		String	Inventory	Y
Overwrite		String	The flag (when set to "Yes") will deactivate any existing product data then apply the contents of current datafeed; applicable to product-related datafeeds only .	N
Message Inventory Item	SellerPartNumber	String	A seller-defined unique identifier for an item. An alphanumeric string, max 40 characters including space	Y
	NeweggItemNumber	String	Newegg's unique identifier for an item	N
	Currency	String	The form of money for all price related elements. Default value: USD	N
	MSRP	Decimal	The default manufacturer's suggested retail price for the product for the United States.  If you want to remove MSRP, input "0.00" or '0' in this field. If null, no change to current setting.	N
	MAP	Decimal	The default Minimum advertised price for the United States.  If the Selling Price is below the defined MAP, the website will ask customer to add item to shopping cart to see the item's price.  If you want to remove MAP, input "0.00" or '0' in this field. If null, no change to current setting.	N
	CheckoutMAP	String	Regardless the Selling Price and the value inputted in MAP field, if the Checkout MAP is marked as True, then the website will ask customer to add item to shopping cart AND go to checkout page to see the item's price. This is the default setting of the United of states.	N
	SellingPrice	Decimal	The selling price	N
	Inventory	Integer	The inventory quantity available for the only warehouse location. If multiple warehouse locations are available, Please submit INVENTORY_DATA to manage inventory.	N
	FulfillmentOption	String	Used only when switching the fulfillment of an item from Seller to Newegg (Shipped by Newegg) or vice versa	N
	Shipping	String	The default selling price for the United States.	N
	ActivationMark	String	<b>True:</b> Activate item  <b>False:</b> Deactivate item  Null = Ignore this action, no change to current item active/deactivate setting	N

#### ORDER\_SHIP\_NOTICE\_DATA

ORDER\_SHIP\_NOTICE\_DATA feed allows you to update shipment of one or all items in an order. When an order has been completely fulfilled, mean that all the items are fulfilled, the order process is completed.

Please review the following example and the possible shipment options you can assign for each feed:

Order XYZ has item A (5 units) and item B (1 unit)

- Single package contains 5 units of item A and 1 unit of item B with one tracking number.
- Single package contains either 5 units of item A or 1 unit of item B with one tracking number.
- Multiple packages: one package contains 5 units of item A with one tracking number. The other package contains 1 unit of item B with another tracking number.
- Multiple package: one package contains 2 units of item A with one tracking number. Another package contains 3 units of item A with another tracking number. The other package contains 1 unit of item B with another tracking number.
- Multiple package, 1 package contains 2 units of item A with one tracking number. The other package contains 3 units of item A and 1 unit of item B with another tracking number.
- **You cannot submit a request for partial shipment as following:** Single package contains 2 units of item A with one tracking number.

For schema, please download the XSD's and XML sample files from

[https://sellerportal.newegg.com/Guideline/Newegg\\_Marketplace\\_API\\_DeveloperGuide.zip](https://sellerportal.newegg.com/Guideline/Newegg_Marketplace_API_DeveloperGuide.zip).

The following information provides element definitions. You can also contact Newegg Marketplace Integration team:  
Datafeeds@newegg.com for assistance.

Attribute				Format	Description	Required

## **ITEM\_SUBSCRIPTION**

Subscribe and Save is Newegg's subscription service. It is available for most items in different categories. This program allows customers to subscribe to certain items for repeat uses and have them shipped every few months with certain percentage of discount.

**Note: by submitting your item list, all listed items will be automatically join/leave all the ongoing Newegg subscription programs.**

For schema, please download the XSD's and XML sample files from

[https://sellerportal.newegg.com/Guideline/Newegg\\_Marketplace\\_API\\_DeveloperGuide.zip](https://sellerportal.newegg.com/Guideline/Newegg_Marketplace_API_DeveloperGuide.zip)

The following information provides element definitions. You can also contact Newegg Marketplace Integration team:

Datafeeds@newegg.com for assistance.

<b>Attribute</b>		<b>Format</b>	<b>Description</b>	<b>Required</b>
DocumentVersion		Decimal	The identifier for the version of current datafeed; assigned by Newegg	Y
MessageType		String	Subscription	Y
Message	Item	SellerPartNumber	String	Identify the category specification. There is only one category can be used for any single item.
	Item	Action	String	Specify the action you would like to perform. <ul style="list-style-type: none"><li>- Enter "<b>Add</b>" if you want to add the item as a subscription &amp; save product.</li><li>- Enter "<b>Remove</b>" to change the item from a Subscription &amp; Save item to a normal product.</li></ul> If no value was entered for this field, by default the system will treat it as "Add".

## **ITEM\_PROMOTION\_DATA**

Newegg marketplace offers a lot of promotion strategies to help sellers increase their sales, in order to better organize the deals, seller is able to batch submit the requests to our deal center. Our promotion team will review the request and find the best place where the promotion could be seen by customers.

For schema, please download the XSD's and XML sample files from

[https://sellerportal.newegg.com/Guideline/Newegg\\_Marketplace\\_API\\_DeveloperGuide.zip](https://sellerportal.newegg.com/Guideline/Newegg_Marketplace_API_DeveloperGuide.zip)

The following information provides element definitions. You can also contact Newegg Marketplace Integration team:  
Datafeeds@newegg.com for assistance.

<b>Attribute</b>		<b>Format</b>	<b>Description</b>	<b>Required</b>
DocumentVersion		Decimal	The identifier for the version of current datafeed; assigned by Newegg	Y
MessageType		String	ItemPromotion	Y
Message	Item	Integer	<p>This Tab ID is NOT required. If you left this empty all requests will go to "Marketplace Deal Center"(You can see this tab on Seller Portal -&gt; Manage Promotion -&gt; Submit Deals page) . Our promotion team will review the request and once the request gets approved, will assign an appropriate promotion vehicle for the item.</p> <p>If you already know the Tab ID, you can specify it here and the request will be added in the tab group on Newegg marketplace hot deals page (<a href="http://www.newegg.com/marketplace/deals">http://www.newegg.com/marketplace/deals</a>). Also you can find the Tab's information on Seller Portal -&gt; Manage Promotion -&gt; Submit</p>	N

			Deals page.	
SellerPartNumber	String	The seller part # is the SKU number assigned to this item by seller.		Y
NeweggItemNumber	String	The Newegg Item # for this item	N (Yes if SellerPartNumber is not provided)	
PromoMSRP	Decimal	The manufacturer's suggested retail price (MSRP) or list price for the item during the promotion.		N
PromoSellingPrice	Decimal	The actual price at which the item is offered for the promotion.		Y
PromoShipping	String	The shipping setting for the item during the promotion, the available two options are default and free		Y
PromoStartDate	Datetime	The date when the promotion will be starting. Format: mm/dd/yyyy. The default time is 12:00:00 AM.		Y
PromoEndDate	Datetime	The date when the promotion will be end. Format: mm/dd/yyyy. The default time is 11:59:00 PM		Y
LimitQty	Integer	The maximum quantity this item can be purchased by a customer within a 48 hour time period.  If left empty, there will be no quantity limitation.		N
MaxQty	Integer	The maximum quantity that can be sold for this item during this promotion period. Please note that once the promotion schedule has started, this value cannot be updated.  If left empty, there will be no quantity limitation.		N
MinInventory	Integer	The minimum inventory level. The level below which inventory can never drop 24 hours prior to promotion start time. The inventory updates via datafeeds / API / seller portal will not be processed if the updates are less than this		N

			<p>value. You can freely update inventory 24 hours after promotion start time. For urgent inventory adjustment please contact Newegg Marketplace Integration team: Datafeeds@newegg.com for assistance.</p> <p>The default value is 0. This field is usable only when "Inventory Locked" = true.</p>	
	Inventory Locked	String	<p>If set with Yes, any inventory update via datafeeds / API / seller portal will not be processed if request to update inventory less than the value in "Min Inventory". For urgent inventory adjustment please contact Newegg Marketplace Integration team: Datafeeds@newegg.com for assistance.</p> <p>The default is No.</p>	N
	Note	String	The additional message or memo you want to create with this request. 200 characters limit.	N

      }
    ],
    "SellerID": "A006"
  }
}
```

#### 12.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
DF003	The MaxCount (maximum request records) CANNOT be over 30000.
DF004	Unfortunately, we are unable to process your request at this time. We apologize for the inconvenience. Please try again later.

DF011	Your data feed request will not be processed during the scheduled data feed processing restriction from [{begin timestamp: hh:mm:ss, MM/DD/YYYY}] to [{end timestamp: hh:mm:ss, MM/DD/YYYY}]. Please contact datafeeds@newegg.com if you have any question or concern. Thank you for your patience.
-------	---

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>DF003</Code>
        <Message>The MaxCount (maximum request records) CANNOT be over 30000</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "DF003",
    "Message": "The MaxCount (maximum request records) CANNOT be over 30000"
}
```

## 12.2. Get Feed Status

Get the status of specified feed request by specified query conditions.

### 12.2.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/datafeedmgmt/feeds/status?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your Seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

## 12.2.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest	IssueUser		No	String	Specify your eligible seller account (email address) here.
	OperationType		Yes	String	Fixed value: GetFeedStatusRequest
	RequestBody	GetRequestStatus	RequestIDList	RequestID	No A list of feed Task ID, other condition will be ignored if specify an ID in the list
			RequestType	No	String ITEM_DATA INVENTORY_AND_PRICE_DATA INVENTORY_DATA PRICE_DATA ITEM_COUNTRY_RESTRICTION_DATA ORDER_SHIP_NOTICE_DATA MULTICHANNEL_ORDER_DATA ITEM_SUBSCRIPTION VOLUME_DISCOUNT_DATA ITEM_PROMOTION_DATA ITEM_PREMIER_MARK_DATA ITEM_WARRANTY_DATA
			MaxCount	No	Integer The maximum return records. Default is 100. If you specified over than 100, the system still return 100 records.
			RequestStatus	No	String The status of the feed submission. Available values: ALL (Default) SUBMITTED IN_PROGRESS FINISHED CANCELLED
			RequestFromDate	No	DateTime Search by request date range. (Pacific Standard Time) Please refer to the Acceptable Date Format
			RequestToDate	No	DateTime Search by request date range. (Pacific Standard Time) Please refer to the Acceptable Date Format

Example: XML, Request

                <RequestDate>2/22/2012 17:25:10</RequestDate>
                <RequestStatus>FINISHED</RequestStatus>
            </ResponseInfo>
        </ResponseList>
    </ResponseBody>
</NeweggAPIResponse>

```

Example: Json, Response

```

{
    "IsSuccess": true,
    "OperationType": "GetFeedStatusResponse",
    "ResponseBody": {
        "ResponseList": [
            {
                "RequestDate": "2\22\2012 17:25:10",
                "RequestId": "2PQCX3SPZ3QBF",
                "RequestStatus": "FINISHED",
                "RequestType": "ITEM_DATA"
            }
        ],
        "SellerID": "A006"
    }
}

```

#### 12.2.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CE001</Code>
        <Message>SellerID cannot be null or empty</Message>
    </Error>
</Errors>

```

Example: Json, Response

```
{
    "Code": "CE001",
    "Message": "SellerID cannot be null or empty"
}
```

## 12.3. Get Feed Result

When your datafeed status is finished, you can use this interface to get the processing report.

### 12.3.1. Resource URL & Information

#### Resource URL

<a href="https://api.newegg.com/marketplace/datafeedmgmt/feeds/result/{Requestid}?sellerid={sellerid}">https://api.newegg.com/marketplace/datafeedmgmt/feeds/result/{Requestid}?sellerid={sellerid}</a>
---

Note: Please make sure your request URL is all in lower case (except for Seller ID and Request ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace
{Requestid}	Yes	The request ID of the submitted feed request

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
GET	Required	XML, Json	XML, Json	1000 per min per client

### 12.3.2. Request Body

#### Example: XML, Request

```
GET https://api.newegg.com/marketplace/datafeedmgmt/feeds/result/{Requestid}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml
```

#### Example: Json, Request

```
GET https://api.newegg.com/marketplace/datafeedmgmt/feeds/result/{Requestid}?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json
```

### 12.3.3. Response Body

The following information provides element definitions for processing report

Attribute		Description	Required
DocumentVersion		The identifier for the version of current datafeed; assigned by Newegg	Y
MessageType		ProcessingReport	Y
Message ProcessingReport	OrginalMessageName	Available value to identify processed message	Y
	OriginalMessageType	Available value to identify processed message	Y
	ProcessedStamp	The time stamp for processed message. Time format: 8/12/2010 9:32:33 PM	Y
	StatusCode	Available value to identify message processing status	Y
	ProcessedCount	Identify the total processed records.	N
	SuccessCount	Identify the total successfully processed records.	N
	WithErrorCount	Identify the total error processed records.	N
	Result AdditionalInfo	Error and warning information, available as the following components: SellerPartNumber ManufacturePartNumber NeweggItemNumber UPC OrderNumber TrackingNumber	N

		ErrorList	ErrorDescription	Identify the reason of an error	N
--	--	-----------	------------------	---------------------------------	---

#### 12.3.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
DF004	Unfortunately, we are unable to process your request at this time. We apologize for the inconvenience. Please try again later.
DF005	Your feed was not submitted successfully (Feed Request ID: [{0}]). Please resubmit your feed again.
DF006	The requestId cannot be null.
DF007	Invalid RequestID.
DF010	Data feed request processing failed:{0}  Available values: a. FileContentError (mapped error message: Incorrect data feed format or template)

b. No record (mapped error message: request with no record specified.)

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>
    <Code>DF006</Code>
    <Message>Invalid RequestID</Message>
  </Error>
</Errors>
```

Example: Json, Response

```
{
  "Code": "DF006",
  "Message": "Invalid RequestID"
}
```

# 13. RMA Management

The following sections describe how to create, retrieve and update RMA (refund and replacement), as well as how to issue a courtesy refund.

RMA (Return Merchandise Authorization) is a return transaction that seller would expect a return shipment from customer in exchange for refund or replacement. However, the functions allow you to issue refund even if a return shipment is not received (mark auto receive, see details below). **\*RMA refund will result in commission refund to seller.**

Simple RMA flow goes as follows:

Issue RMA -> Receive RMA -> Process Refund / Replacement. Replacement will appear as a new order in order list.

If Auto Received marked as yes:

Issue RMA -> Process Refund (not applicable to RMA Replacement type). Please consult with Newegg Integration team for details of how auto-receiving a RMA works.

Courtesy Refund is a refund transaction that seller would not expect a return shipment from customer. It is normally a refund for reasons such as Pricing Error. NOTE: please make sure that the courtesy refund should not be used as regular refund. **\*Courtesy refund will NOT result in commission refund to seller.**

## 13.1. Submit RMA

Issue a Refund or Replacement RMA for an invoiced order.

### 13.1.1. Resource URL & Information

#### Resource URL

`https://api.newegg.com/marketplace/servicemgmt/rma/newrma?sellerid={sellerid}&version={versionno}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace
version	No	Available version numbers: 307

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
-------------	-----------------	-----------------	------------------	---------------

POST	Required	XML, Json	XML, Json	30 per min per client
------	----------	-----------	-----------	-----------------------

### 13.1.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest RequestBody  IssueRMA		No	String	The RMA issuer's registered Seller Portal email address. System will only accept Seller's registered Seller Portal email addresses. If left blank, default value will be Seller ID.
		Yes	String	Fixed value: IssueRMAResquest
		Yes	Integer	Available values:  1: Replacement  2: Refund  For Courtesy Refund, please refer to Issue Courtesy Refund section ( <a href="#">click here</a> )
		Yes	Integer	The order number which the RMA is issued for.
		No	String	Seller RMA #.  An alphanumeric string, max 50 characters.  Note: only available for version=307
		Yes if:  • RMA type = Replacement • The original order has items currently fulfilled by SBS and SBN.	Integer	The RMA replacement Order you are submitting currently has items Shipped by Seller and Shipped by Newegg. In order to process the RMA replacement request, please choose one of the following actions:  1: Convert to Refund with Restocking Fee 2: Convert to Refund without Restocking Fee 3: Split into Two RMAs
		No	Integer	This mark is used to:  - Receive the RMA automatically once the RMA has been created successfully. Seller would not need to "receive" RMA as a separate action to proceed with refund. Otherwise, seller will need to "receive"

				RMA after RMA created to proceed with refund. - Auto match with existing open RMA's for the same order.  Available values: 0: Don't receive the RMA automatically (default). Do not proceed with refund until RMA is marked as received. 1: Receive the RMA automatically after RMA creation and proceed with refund.  Restriction: Currently this mark only applies to the order shipped by seller and is only available for RMA type = refund.  Note: If the RMA didn't create successfully, the RMA will not be automatically received, even if you specified the mark as 1.  Note: if you are not sure how to use this, please consult with Datafeeds@newegg.com.
RMA Transaction List	RMA Transaction	RMANote	No	String Comment for this RMA. Max 4000 character(s).
		SellerPartNumber	Yes	String The seller part number of the item, used to identify the item
		ReturnQuantity	Yes	Integer The return quantity of each item in this RMA
		ReturnUnitPrice	Yes if RMA type = Refund	Decimal The return unit price of each item in refund RMA. How much refund will be issued per unit of this item. NOTE: All amounts are set in U.S. Dollars (USD).
		RefundShippingPrice	Yes if RMA type = Refund	Decimal The shipping amount of refund of each item in this RMA NOTE: All amounts are set in U.S. Dollars (USD).

			RMAReason	Yes	Integer	The replacement/refund reason of each item in this RMA.  Available values: 1: Carrier damage 2: Defective 3: Incompatible 4: No longer needed 5: Not match what we show 6: Ordered wrong item 7: Sent wrong item 8: Unsatisfied
--	--	--	-----------	-----	---------	---

### 13.1.3. Response Body

Attribute				Format	Description
NeweggAPIResponse	ResponseBody	RMAInfoList	RMAInfo		
NeweggAPIResponse	ResponseBody	RMAInfoList	RMAInfo	String	Used to identify the operation of Submit RMA is successful. Returns true or false.
				String	Fixed value: IssueRMAResponse
				String	Your seller ID
				Integer	RMA number
				Integer	1. Replacement 2. Refund
				String	Replacement for RMAType value 1. Refund for RMAType value 2.
				String	Seller RMA #.  An alphanumeric string, max 50 characters.  Note: only available for version = 307
				String	RMA Issue User or Seller ID (if RMA Issue User was not specified when RMA was created).
				String	Date of RMA(Pacific Standard Time)
				Integer	6. Processing

	RMAStatusDescription	String	Processing (default)
	RMAShipMethod	Integer	<p>The ship method if the RMA type = Replacement:</p> <p>1: Super Saver(7-14 business days)      2: Standard Shipping(5-7 business days)      3: Expedited Shipping(3-5 business days)      4: Two-Day Shipping(2 business days)      5: One-Day Shipping(Next day)      6: International Economy Shipping(8-15 business days)      7: International Standard Shipping(5-7 business days)      8: International Expedited Shipping(3-5 business days)      9: International Two-Day Shipping(2 business days)      10: APO/FPO – Military ONLY      11: Newegg Premier 3 Days      12: Newegg Premier 2 Days      13: Newegg Premier Next Day</p> <p>If RMA type = Refund, this element will be blank.</p> <p>NOTE: Newegg will apply the same ship method used by order.</p>

		RMAShipMethodDescription	String	<p>The ship method if the RMA type = Replacement:</p> <p><b>Super Saver(7-14 business days)</b>for status code: 1</p> <p><b>Standard Shipping(5-7 business days)</b> for status code: 2</p> <p><b>Expedited Shipping(3-5 business days)</b> for status code: 3</p> <p><b>Two-Day Shipping(2 business days)</b>for status code: 4</p> <p><b>One-Day Shipping(Next day)</b>for status code: 5</p> <p><b>International Economy Shipping(8-15 business days)</b>for status code: 6</p> <p><b>International Standard Shipping(5-7 business days)</b>for status code: 7</p> <p><b>International Expedited Shipping (3-5 business days)</b>for status code: 8</p> <p><b>International Two-Day Shipping(2 business days)</b> for status code :9</p> <p><b>APO/FPO – Military ONLY</b> for status code:10</p> <p><b>Newegg Premier 3 Days</b> for status code:11</p> <p><b>Newegg Premier 2 Days</b> for status code:12</p> <p><b>Newegg Premier Next Day</b> for status code:13</p> <p>If RMA type = Refund, this element will be blank.</p> <p>NOTE: Newegg will apply the same ship method used by order.</p>
		OrderNumber	Integer	Order Number of the RMA requested order
		OrderDate	String	Order Date(Pacific Standard Time)
		InvoiceNumber	Integer	Invoice Number of the order RMA requested order
		OrderAmount	Decimal	<p>Order Amount</p> <p>NOTE: All amounts are set in U.S. Dollars (USD).</p>
		AvailableRefundAmount	Decimal	<p>Available Refund Amount</p> <p>NOTE: All amounts are set in U.S. Dollars (USD).</p>
		RMAProcessedBy	String	Newegg or Seller
		RMAReceiveDate	String	RMA shipment received date
		RMANote	String	The comment in this RMA
		PriorRefundAmount	Decimal	<p>Previous Refund Amount if any</p> <p>NOTE: All amounts are set in U.S. Dollars (USD).</p>

			CustomerName	String	Customer Name
			CustomerPhoneNumber	String	Customer Phone Number
			CustomerEmailAddress	String	The masked customer email address, you can reach to the customer through this email address. For example: gdv6l0viwo4l7j1d@marketplace.newegg.com
			ShipToAddress1	String	The order will be ship to address1
			ShipToAddress2	String	The order's ship to address2
			ShipToCityName	String	The order's ship to cityName
			ShipToStateCode	String	The order's ship to state code
			ShipToZipCode	String	The order's ship to zip code
			ShipToCountryCode	String	The order's ship to countrycode.  E.g. UNITED STATES
			ShipToLastName	String	The ship to LastName
			ShipToFirstName	String	The ship to FirstName
			ShipToCompany	String	The order's ship to company
	RMATransactionList	RMATransaction	SellerPartNumber	String	The seller part number to identify a SKU
			MfrPartNumber	String	Manufacturer Part Number
			NeweggItemNumber	String	Newegg Item Number
			Description	String	Item Description
			UnitPrice	decimal	Item's price  NOTE: All amounts are set in U.S. Dollars (USD).
			ReturnQuantity	Integer	The return quantity of each SKU in this RMA
			ReturnUnitPrice	decimal	If RMA type = Refund: The return unit price of each item in refund RMA. How much refund will be issued per unit of this item. If RMA type = replacement, this element will be blank.  NOTE: All amounts are set in U.S. Dollars (USD).
			RefundShippingPrice	decimal	If RMA type = Refund: The shipping amount of refund of each item in this RMA. If RMA type = replacement, this element will be blank.  NOTE: All amounts are set in U.S. Dollars (USD).
			ShippedBy	Integer	If RMA type = Replacement:  Indicates if shipped by Newegg. 0: Shipped by seller 1: Shipped by Newegg

				RMAReason	Integer	The replacement/refund reason of each SKU in this RMA.  Available values: 1: Carrier damage 2: Defective 3: Incompatible 4: No longer needed 5: Not match what we show 6: Ordered wrong item 7: Sent wrong item 8: Unsatisfied 9: Other Reason {0}
				RMAReasonDescription	String	The replacement/refund reason of each SKU in this RMA.  <b>Carrier damage</b> for status code: 1 <b>Defective</b> for status code: 2 <b>Incompatible</b> for status code: 3 <b>No longer needed</b> for status code: 4 <b>Not match what we show</b> for status code: 5 <b>Ordered wrong item</b> for status code: 6 <b>Sent wrong item</b> for status code: 7 <b>Unsatisfied</b> for status code: 8 <b>Other Reason {0}</b> for status code: 9
	Memo			String	Additional messages	
	ResponseDate			String	Response date

### 13.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SE001	Invalid SellerPartNumber
SE003	OrderNumber is required
SE004	Cannot issue RMA because the order has not been invoiced.
SE005	ShipMethodCode is required when RMAType is replacement
SE006	RMATransaction is required in RMATransactionList
SE007	ReasonCode is required
SE008	Return Qty must be greater than zero
SE009	[Seller Part #] Return Qty has to be equal to or less than Max Return Qty - Prior Returned Qty, currently the available return qty = {0}.
SE010	Refund per Qty must be greater than zero.
SE011	{Seller Part #} refund price per Qty cannot be greater than item unit price, which = {0.00}.
SE012	Order Shipping Refund cannot be greater than Order Shipping Charge, which = {0.00}.
SE013	Replacement RMA Order Qty cannot be greater than item available inventory.
SE014	Item(s) has two fulfillment channels. Please use DiffShippedByPartyAction field to resolve this issue.
SE020	The following item(s) must return with the current item(s) since they are in a same Combo or Auto Add to Cart promotion :{ Seller Part # List}.
SE021	The item's ReturnUnitPrice cannot be greater than the item's order's UnitPrice, which = {0.00}.
SE023	Total refund amount cannot exceed total order amount, which = {0.00}.

SE024	Item does not exist.
SE025	Cannot issue RMA because the order type is invalid.
SE026	Cannot issue RMA because the order is a replacement order.
SE027	Cannot issue RMA because the order has been voided.
SE031	<b>Auto Receive is not available for order returns processed by Newegg.</b>
SE032	Cannot issue RMA as Auto Receive because the RMA type is not refund.
SE034	Refund cannot exceed order total minus previous refunded amount[0]
SE035	This seller account currently does not support the selected shipping method {0}. Please setup this shipping setting in Seller Portal or select another shipping method.
SE036	The item:{seller part #} unit product refund cannot be less than {minimum refund amount} per account restocking fee setting: {seller restocking fee rate }
SE038	International seller covered by Newegg Buy-out policy cannot request return or refund directly. Please contact MarketplaceSupport@newegg.com for assistance.
SE039	This item is not eligible for {refund   replacement}
SE040	This seller RMA number must be a text of number and/or letters.

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SE004</Code>
        <Message>Cannot issue RMA because the order has not been invoiced</Message>
    </Error>
</Errors>
```

#### Example: Json, Response

```
{
    "Code": "SE004",
    "Message": "Cannot issue RMA because the order has not been invoiced"
}
```

## 13.2. Update RMA

Receive, Edit, Reject or Void an existing RMA.

### 13.2.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/servicemgmt/rma/updaterma?sellerid={sellerid}&version={versionno}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace
version	No	Available version numbers: 307

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	30 per min per client

### 13.2.2. Request Body

#### Edit RMA

Attribute			Required?	Format	Description
NeweggAPIRequest  RequestBody			No	String	Specify your eligible seller account (email address) here.  Only choose from seller account existing login (email)
			Yes	String	Fixed value: EditRMAResult
EditRMAInfo	RMANumber	Yes	integer	RMA Number	
	RMAType	Yes	integer	Available values: 1: Replacement 2: Refund	
	SellerRMANumber	No	String	Seller RMA #.  An alphanumeric string, max 50 characters.  Note: only available for version=307	
	RMANote	No	String	The comment in this RMA Max 4000 character(s).	
	RMA	SellerPartNumber	String	Seller Part Number	
	RMA	ReturnQuantity	integer	The return quantity of each SKU in this RMA	

					ReturnUnitPrice	Yes if Refund type	decimal	The return unit price of each SKU in refund RMA NOTE: All amounts are set in U.S. Dollars (USD).
					RefundShippingPrice	Yes if Refund type	decimal	The shipping amount of refund of each SKU in this RMA NOTE: All amounts are set in U.S. Dollars (USD).
					RMAReason	Yes	integer	The replacement/refund reason of each SKU in this RMA. Available values: 1: Carrier damage 2: Defective 3: Incompatible 4: No longer needed 5: Not match what we show 6: Ordered wrong item 7: Sent wrong item 8: Unsatisfied

Example: XML, Edit RMA

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>SE004</Code>
```

```

<Message>Cannot issue RMA because the order has not been invoiced</Message>
</Error>
</Errors>

```

Example: Json, Response

```

{
  "Code": "SE004",
  "Message": "Cannot issue RMA because the order has not been invoiced"
}

```

## 13.3. Get RMA Info

Get RMA info by specified query conditions.

### 13.3.1. Resource URL & Information

#### Resource URL

<https://api.newegg.com/marketplace/servicemgmt/rma/rmainfo?sellerid={sellerid}&version={versionno}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
SellerId	Yes	Your seller ID on Newegg Marketplace
version	No	Available version numbers: 307

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	30 per min per client

### 13.3.2. Request Body

Attribute	Required?	Format	Description
Newegg	IssueUser	No	string Specify your eligible seller account (email address) here. Only choose from seller account existing login (email)
	OperationType	String	Fixed value: GetRMAInfoRequest

	PageSize	No	Integer	How many records in a page. (Max is 100 per page)  If left blank, will use 1 as default.
	PageIndex	No	Integer	Current page index. Default is 1.  If left blank, will use 100 as default.
	KeywordsType	No	Integer	Available values: 1: RMANumber 2: OrderNumber 3: CustomerName 4: SellerRMANumber (Note: only available for version=307)
	KeywordsValue	No	String	The keywords value of the specified type
	Status	No	Integer	Available values: 0: All (Default) 1: Open 2: Received 3: Rejected 4: Voided 5: Closed 6: Processing
	RMAFromDate	No	String	Search RMA by date range. (Pacific Standard Time) Please refer to the Acceptable Date Format
	RMAToDate	No	String	Search RMA by date range. (Pacific Standard Time) Please refer to the Acceptable Date Format
	RMAType	No	Integer	Available values: 0: All (Default) 1: Replacement 2: Refund
	ProcessedBy	No	Integer	Available values: 0: All (Default) 1: Seller 2: Newegg

### 13.3.3. Response Body

Attribute		Format	Description
NeweggAPIResponse	ResponseBody	IsSuccess	String Used to identify the operation of Submit RMA is successful. Returns true or false.
		OperationType	String Fixed value: IssueRMAResponse
		SellerID	String Your seller ID
	PageInfo	TotalCount	Integer How many record(s) for you request
		TotalPageCount	Integer How many page(s) return
		PageIndex	Integer Current page index. (Default is 1)
		PageSize	Integer How many record(s) in a page. (Max 100 per page)
	RMAInfoList	RMANumber	Integer RMA number
		RMAType	Integer Available values: 1: Replacement 2: Refund
		RMATypeDescription	String <b>Replacement</b> for type value: 1 <b>Refund</b> for type value: 1
		SellerRMANumber	String Seller RMA #.  An alphanumeric string, max 50 characters.  <b>Note: only available for version=307</b>
		IssueUser	String RMA Issue User or Seller ID (if RMA Issue User was not specified when RMA was created).
		RMADate	String Date of RMA(Pacific Standard Time)
		RMAStatus	Integer Available values: 1: Open 2: Received 3: Rejected 4: Voided 5: Closed 6: Processing

	RMAStatusDescription	String	<p>Available values:</p> <p><b>Open</b> for status code: 1</p> <p><b>Received</b> for status code: 2</p> <p><b>Rejected</b> for status code: 3</p> <p><b>Voided</b> for status code: 4</p> <p><b>Closed</b> for status code: 5</p> <p><b>Processing</b> for status code: 6</p>
	RMAShipMethod	Integer	<p>The ship method if the RMA type = Replacement:</p> <p>1: Super Saver(7-14 business days)</p> <p>2: Standard Shipping(5-7 business days)</p> <p>3: Expedited Shipping(3-5 business days)</p> <p>4: Two-Day Shipping(2 business days)</p> <p>5: One-Day Shipping(Next day)</p> <p>6: International Economy Shipping(8-15 business days)</p> <p>7: International Standard Shipping(5-7 business days)</p> <p>8: International Expedited Shipping(3-5 business days)</p> <p>9: International Two-Day Shipping(2 business days)</p> <p>10: APO/FPO – Military ONLY</p> <p>11: Newegg Premier 3 Days</p> <p>12: Newegg Premier 2 Days</p> <p>13: Newegg Premier Next Day</p> <p>If RMA = Refund, then this element will appear blank.</p>

		RMAShipMethodDescription	String	The ship method if the RMA type = Replacement: Super Saver(7-14 business days)for status code: 1 Standard Shipping(5-7 business days) for status code: 2 Expedited Shipping(3-5 business days) for status code: 3 Two-Day Shipping(2 business days)for status code: 4 One-Day Shipping(Next day)for status code: 5 International Economy Shipping(8-15 business days)for status code: 6 International Standard Shipping(5-7 business days)for status code: 7 International Expedited Shipping (3-5 business days)for status code: 8 International Two-Day Shipping(2 business days) for status code :9 APO/FPO – Military ONLY for status code:10 Newegg Premier 3 Days for status code:11 Newegg Premier 2 Days for status code:12 Newegg Premier Next Day for status code:13  If RMA = Refund, then this element will appear blank.
		OrderNumber	Integer	Order Number of the RMA requested
		OrderDate	String	Order Date(Pacific Standard Time)
		InvoiceNumber	Integer	Invoice Number of the order RMA requested.
		OrderAmount	Decimal	Order Amount NOTE: All amounts are set in U.S. Dollars (USD).
		AvailableRefundAmount	Decimal	Available Refund Amount NOTE: All amounts are set in U.S. Dollars (USD).
		RMAProcessedBy	String	Newegg or Seller
		RMAReceiveDate	String	RMA shipment received date
		RMANote	String	RMA note
		PriorRefundAmount	Decimal	Order Prior Refund Amount NOTE: All amounts are set in U.S. Dollars (USD).
		CustomerName	String	Customer Name
		CustomerPhoneNumber	String	Customer Phone Number

			CustomerEmailAddress	String	The masked customer email address, you can reach to the customer through this email address. For example: gdv6l0viwo4l7j1d@marketplace.newegg.com
			ShipToAddress1	String	The order's ship to address line 1
			ShipToAddress2	String	The order's ship to address line 2
			ShipToCityName	String	The order's ship to city name
			ShipToStateCode	String	The order's ship to state code (abbreviated)
			ShipToZipCode	String	The order's ship to zip code
			ShipToCountryCode	String	The order's ship to country.  E.g. UNITED STATES
			ShipToLastName	String	The ship to Last Name
			ShipToFirstName	String	The ship to First Name
			ShipToCompany	String	The order's ship to company name
RMATransactionList	RMATransaction	SellerPartNumber	String	Seller Part Number	
		MfrPartNumber	String	Manufacturer Part Number	
		NeweggItemNumber	String	Newegg Item Number	
		Description	String	Item Description	
		UnitPrice	decimal	Item's Unit Price  NOTE: All amounts are set in U.S. Dollars (USD).	
		ReturnQuantity	Integer	The return quantity of each SKU in this RMA	
		ReturnUnitPrice	decimal	If RMA type = Refund: The return unit price of each item in refund RMA. How much refund will be issued per unit of this item. If RMA = Replacement, then this element will appear blank.  NOTE: All amounts are set in U.S. Dollars (USD).	
		RefundShippingPrice	decimal	If RMA type = Refund: The shipping amount of refund of each item in this RMA. If RMA = Replacement, then this element will appear blank.  NOTE: All amounts are set in U.S. Dollars (USD).	
		ShippedBy	Integer	If RMA type = Replacement:  Indicates if shipped by Newegg. 0: Shipped by seller 1: Shipped by Newegg  If RMA = Refund, then this element will appear blank.	

		RMARReason	Integer	The replacement/refund reason of each SKU in this RMA.  Available values: 1: Carrier damage 2: Defective 3: Incompatible 4: No longer needed 5: Not match what we show 6: Ordered wrong item 7: Sent wrong item 8: Unsatisfied 9: Other Reason {0}
		RMARReasonDescription	String	The replacement/refund reason of each SKU in this RMA.  Available values: <b>Carrier damage</b> for status code: 1 <b>Defective</b> for status code: 2 <b>Incompatible</b> for status code: 3 <b>No longer needed</b> for status code: 4 <b>Not match what we show</b> for status code: 5 <b>Ordered wrong item</b> for status code: 6 <b>Sent wrong item</b> for status code: 7 <b>Unsatisfied</b> for status code: 8 <b>Other Reason {0}</b> for status code: 9
	Memo		String	Additional messages
	ResponseDate		String	Response date

#### **13.3.4. Request Failure Errors**

For common HTTP error responses, please refer to [Common Error Responses](#)

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CE001</Code>
        <Message>SellerID cannot be null or empty</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "CE001",
    "Message": "SellerID cannot be null or empty"
}
```

## 13.4. Issue Courtesy Refund

Submit a Courtesy Refund Request. Use this function when it is simply to issue the customer a courtesy refund that does not require RMA shipment returned to seller. This function is a request and will need user to use Get Request Status (listed in the next section) to receive update about the status of the Courtesy Refund creation. Please note that commission will not be refunded for refunds issued as courtesy refund.

### 13.4.1. Resource URL & Information

Resource URL

```
https://api.newegg.com/marketplace/servicemgmt/courtesyrefund/new?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	30 per min per client

### 13.4.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest RequestBody IssueCourtesyRefund			No	String	Specify your eligible seller account (email address) here. Only choose from seller account existing login (email)
			Yes	String	Fixed value: IssueCourtesyRefund
SourceSONumber	Yes	Integer	Order Number which you wish to issue a courtesy refund for.		
RefundReason	Yes	Integer	Available values for refund reason: 1: Negative customer feedback 2: Pricing error 3: Wrong item information 4: Shipping delay 5: Package not received 6: Customer Courtesy		
TotalRefundAmount	Yes	Decimal	The total amount need to refund.  The total refund amount cannot exceed order amount or order amount minus previously refunded amount. NOTE: All amounts are set in U.S. Dollars (USD).		
NoteToCustomer	No	String	The note of this courtesy refund to customer. Max 500 character(s).		

Example: XML, Request

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>CE001</Code>
        <Message>SellerID cannot be null or empty</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "CE001",
    "Message": "SellerID cannot be null or empty"
}
```

## 13.5. Get Courtesy Refund Request Status

Get the status of specified courtesy refund request by specified query conditions.

### 13.5.1. Resource URL & Information

#### Resource URL

`https://api.newegg.com/marketplace/servicemgmt/courtesyrefund/requeststatus?sellerid={sellerid}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	30 per min per client

### 13.5.2. Request Body

Attribute				Required?	Format	Description
NeweggAPIRequest	IssueUser			No	String	Specify your eligible seller account (email address) here. Only choose from seller account existing login (email)
	OperationType			Yes	String	Fixed value: GetCourtesyRefundStatusRequest
	RequestBody	GetRequestStatus	RequestID	No	String	Courtesy refund Request ID. Other condition(s) will be ignored Issue courtesy refund Request ID is specified.
			MaxCount	No	Integer	The maximum return records. Default is 100. If you specified over than 100, the system still return 100 records.

		RequestStatus	No	String	The available values of the status of the request submission.  ALL (Default) SUBMITTED IN_PROGRESS FINISHED FAILED CANCELLED
		RequestDateFrom	No	String	Search by Courtesy Refund Date. (Pacific Standard Time) Please refer to the Acceptable Date Format
		RequestDateTo	No	String	Search by Courtesy Refund Date. (Pacific Standard Time) Please refer to the Acceptable Date Format

Example: XML, Request

## XSD

#### 13.6.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>
    <Code>CE001</Code>
    <Message>SellerID cannot be null or empty</Message>
  </Error>
</Errors>
```

Example: Json, Response

```
{
  "Code": "CE001",
  "Message": "SellerID cannot be null or empty"
}
```

# 14. Report Management

You can submit API requests to generate business reports.

Steps to Request and Retrieve a report:

- Step 1- Submit a report request using the SubmitReportRequest operation. This is a request to Newegg Marketplace API to generate a specific report.
- Step 2- Submit a request using Get Report Status service to get a list of report requests' ID and status. Newegg Marketplace API returns a Request ID and status for every report requested. When the status of a report request is "FINISHED", you can use the Get Report Result service to retrieve the report.
- Step 3- Submit a request using the Get Report Result service to receive a specific report. Depending on the report type, a XML format report will be returned or an URL of the report will be provided for you to download the file.

## 14.1. Submit Report Request

The following types of Business Report are available:

- [Order List Report](#)
- [Settlement Summary Report](#)
- [Settlement Transaction Report](#)
- [Daily Inventory Report\\*](#)
- [RMA List Report](#)
- [Item Lookup Report](#)
- [International Program- Daily Inventory Report](#)
- [International Program- Daily Price Report](#) (\*Note: this feature will not support multiple warehouse locations.)
- [Newegg Premier Item Report](#)

### 14.1.1. Resource URL & Information

Resource URL

`https://api.newegg.com/marketplace/reportmgmt/report/submitrequest?sellerid={sellerid}`

**Note:** Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
SellerId	Yes	Your seller ID on Newegg Marketplace

Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	30 per min per client

## 14.1.2. Request Body

### Order List Report

Attribute		Required?	Format	Description
NeweggAPIRequest RequestBody OrderReportCriteria	IssueUser	No	string	Specify your eligible seller account (email address) here
	OperationType	Yes	string	Fixed value: OrderListReportRequest
	RequestType	Yes	string	ORDER_LIST_REPORT
	KeywordsType	Yes	Integer	<p>Available values:</p> <p>0:All 1: OrderNumber 2: InvoiceNumber 3: CustomerName 4: SellerPartNumber 5: NeweggItemNumber 6: CustomerPhoneNumber 7: TitleDescription 8: Manufacturer 9: SellerOrderNumber</p> <p><b>NOTE:</b> 9: SellerOrderNumber is designed for sellers using SBN (Shipped by Newegg) to fulfill multi-channel orders.</p>
	KeywordsValue	No	string	The keywords value of the specified type. If the type is 0, ignore this field
	Status	Yes	Integer	<p>Available values:</p> <p>0: Unshipped 1: Partially Shipped 2: Shipped 3: Invoiced 4: Voided</p>
	Type	No	Integer	<p>Available values:</p> <p>0: All (Default) 1: SBN 2: SBS 3: Multi-Channel</p>

		OrderDateFrom	No	string	Search by Order Date Range. (Pacific Standard Time) Please refer to the Acceptable Date Format
		OrderDateTo	No	string	Search by Order Date Range. (Pacific Standard Time) Please refer to the Acceptable Date Format
		VoidSoon	No	Integer	the order will be auto void after 24 or 48 hours Available values: 24 48
		OrderDownloaded	No	string	false(Default): include those downloaded orders true: don't include those downloaded orders
		CountryCode	No	String	The country for your orders. Only the ISO standard 3-digit codes are accepted. To review the complete list of available values, please download the following: <a href="https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/International%20Country%20Guide.pdf">https://promotions.newegg.com/Marketplace/Sellers/resourceLibrary/International%20Country%20Guide.pdf</a>
		PremierOrder	No	Integer	0: All (Default) 1: Premier Order Only 2: No Premier Order

        "RequestStatus": "SUBMITTED"
      }
    ]
  }
}

```

#### 14.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
RP010	Invalid Order Number.
RP018	Invalid Settlement Date
RP019	The requestId cannot be null or empty.

RP020	We are unable to process your request because one of the following search criteria is required: SettlementID, SettlementDate, or SettlementDateFrom and SettlementDateTo
RP021	Maximum item lookup cannot exceed 1000 for each request.
RP022	Daily Inventory Report does not support multiple warehouse locations. For multiple warehouse locations, please use International Program – Daily Inventory Report.

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>RP018</Code>
        <Message>Invalid Settlement Date</Message>
    </Error>
</Errors>
```

Example: Json, Response

```
{
    "Code": "RP018",
    "Message": "Invalid Settlement Date"
}
```

## 14.2. Get Report Status

Get the status of specified report request by specified query conditions.

### 14.2.1. Resource URL & Information

Resource URL

<https://api.newegg.com/marketplace/reportmgmt/report/status?sellerid={sellerid}>

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
SellerId	Yes	Your seller ID on Newegg Marketplace

## Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	30 per min per client

### 14.2.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest RequestBody GetRequestStatus	IssueUser		No	String	Specify your eligible seller account (email address) here
	OperationType		Yes	String	Fixed value: GetReportStatusRequest
	RequestIDList	RequestID	No	String	A list of feed request ID, other condition will be ignored if specify an ID in the list
		RequestType	No	String	A list of feed Task type, default is All.  ORDER_LIST_REPORT SETTLEMENT_SUMMARY_REPORT SETTLEMENT_TRANSACTION_REPORT DAILY_INVENTORY_REPORT RMA_LIST_REPORT ITEM_LOOKUP INTERNATIONAL_INVENTORY_REPORT INTERNATIONAL_PRICE_REPORT PREMIER_ITEM_REPORT
	RequestTypeList	MaxCount	No	Integer	The maximum return records. Default and maximum is 100. If you specified over than 100, the system still return 100 records
		RequestStatus	No	String	The status of the feed submission.  SUBMITTED IN_PROGRESS FINISHED CANCELLED ALL
		RequestFromDate	No	String	Search by date range. (Pacific Standard Time) Please refer to the Acceptable Date Format
		RequestToDate	No	String	Search by date range. (Pacific Standard Time) Please refer to the Acceptable Date Format

Example: XML, Request

## XSD

API Schema > ReportMgmt > GetReportStatus > GetReportStatusRequest.xsd

## Settlement Summary Report Result

Attribute		Format	Description
NeweggAPIResponse	IsSuccess	String	Used to identify the operation is successful. Returns true or false
	SellerID	String	Your seller ID
	OperationType	String	Fixed value: GetSettlementSummaryInfoResponse
	PageInfo	RequestID	Your request ID
		RequestDate	Your request datetime(Pacific Standard Time)
		TotalCount	Integer Total number of records
		TotalPageCount	Integer Total page count
		PageIndex	Integer Current page index
		PageSize	Integer How many records in a page.
Response Body	SettlementSummaryList	SettlementDateFrom	String Settlement From Date (Pacific Standard Time)
		SettlementDateTo	String SettlementDateTo(Pacific Standard Time)
		SettlementID	string SettlementID
		CheckNumber	string CheckNumber
		ItemPrice	Decimal ItemPrice NOTE: All amounts are set in U.S. Dollars (USD).
		Shipping	Decimal Shipping NOTE: All amounts are set in U.S. Dollars (USD).
		Other	Decimal Other NOTE: All amounts are set in U.S. Dollars (USD).
		TotalOrderAmount	Decimal TotalOrderAmount NOTE: All amounts are set in U.S. Dollars (USD).
		Refunds	Decimal Refunds NOTE: All amounts are set in U.S. Dollars (USD).
		ChargeBack	Decimal ChargeBack NOTE: All amounts are set in U.S. Dollars (USD).
		MiscellaneousAdjustment	Decimal MiscellaneousAdjustment NOTE: All amounts are set in U.S. Dollars (USD).

	TotalRefunds	Decimal	TotalRefunds NOTE: All amounts are set in U.S. Dollars (USD).
	NeweggCommissionFee	Decimal	NeweggCommissionFee NOTE: All amounts are set in U.S. Dollars (USD).
	NeweggTransactionFee	Decimal	NeweggTransactionFee NOTE: All amounts are set in U.S. Dollars (USD).
	NeweggRefundCommissionFee	Decimal	NeweggRefundCommissionFee NOTE: All amounts are set in U.S. Dollars (USD).
	NeweggMonthlyFee	Decimal	NeweggMonthlyFee NOTE: All amounts are set in U.S. Dollars (USD).

## RMA List Report

Attribute		Format	Description
NeweggAPIResponse	IsSuccess	String	Used to identify the operation is successful. Returns true or false.
	SellerID	String	Your seller ID
	OperationType	String	Fixed value: GetRMAListInfoResponse
	RequestID	String	You request ID
	RequestDate	String	You request datetime(Pacific Standard Time)
	PageInfo	TotalCount	Total number of records
		TotalPageCount	Total page count
		PageIndex	Current page index
		PageSize	How many records in a page.
	ResponseByody	RMAInfoList	SellerID
			RMANumber
			RMAType
			RMATypeDescription
			SellerRMANumber
			RMADate
			RMAStatus

		RMAStatusDescription	String	Available values: <b>Open</b> for status code: 1 <b>Received</b> for status code: 2 <b>Rejected</b> for status code: 3 <b>Voided</b> for status code: 4 <b>Closed</b> for status code: 5 <b>Processing</b> for status code: 6	
		LastEditDate	String	Last edit date(Pacific Standard Time)	
		LastEditUser	String	Last edit user	
		OrderNumber	Integer	Order Number of the RMA requested order.	
		OrderDate	String	Order Date(Pacific Standard Time)	
		InvoiceNumber	Integer	Invoice Number of the RMA requested order.	
		OrderAmount	Decimal	Order Amount	
		RMAProcessedBy	String	Newegg or Seller	
		CustomerName	String	Customer Name	
		CustomerPhoneNumber	String	Customer Phone Number	
		CustomerAddress	String	Customer Address	
		RMAReceiveDate	String	RMA shipment received date(Pacific Standard Time)	
		RMANote	String	The comment in this RMA	
RMATransactionList	RMATransaction	SellerPartNumber	String	The seller part number to identify a SKU	
		MfrPartNumber	String	Manufacturer Part Number	
		NeweggItemNumber	String	Newegg Item Number	
		Description	String	Item Description	
		UnitPirce	Decimal	The return unit price of each SKU in refund RMA	
		Refund/Replacement Info	ItemReturnQty	Integer	The return quantity of each SKU in this RMA
			ItemRefundPerQty	Integer	Refund per qty of the item
			ItemShippingRefund	Decimal	The shipping amount of refund of each SKU in this RMA

				RMATotalRefund	Decimal	RMA total Refund
				RefundReason	Integer	The replacement/refund reason of each SKU in this RMA.  Available values: 1: Carrier damage 2: Defective 3: Incompatible 4: Not match what we show 5: Sent wrong item 6: Personal Reason   Other Reason
				RMAReasonDescription	String	Available values: <b>Carrier damage</b> for reason code: 1 <b>Defective</b> for reason code: 2 <b>Incompatible</b> for reason code: 3 <b>Not match what we show</b> for reason code: 4 <b>Sent wrong item</b> for reason code: 5 <b>Personal Reason   Other Reason</b> for reason code: 6
				ShippedBy	Integer	0. Shipped by seller 1. Shipped by Newegg
				RMAShipMethod	Integer	The ship method if you want issue a replacement RMA.  Available values: 1: Media Mail(7-14 business days) 2: Standard Shipping(5-7 business days) 3: Expedited Shipping(3-5 business days) 4: Two-Day shipping 5: One-day shipping 6: International Standard Shipping(5-15 business days) 7: International Expedited Shipping(3-5 business days) 8: International Two-Day shipping 9: International Two-Day Shipping(2 business days) 10: APO/FPO – Military ONLY 11: Newegg Premier 3 Days 12: Newegg Premier 2 Days 13: Newegg Premier Next Day

					RMAShipMethodDescription	String	Available values: <b>Super Saver(7-14 business days)</b> for status code: 1 <b>Standard Shipping(5-7 business days)</b> for status code: 2 <b>Expedited Shipping(3-5 business days)</b> for status code: 3 <b>Two-Day Shipping(2 business days)</b> for status code: 4 <b>One-Day Shipping(Next day)</b> for status code: 5 <b>International Economy Shipping(8-15 business days)</b> for status code: 6 <b>International Standard Shipping(5-7 business days)</b> for status code: 7 <b>International Expedited Shipping (3-5 business days)</b> for status code: 8 <b>International Two-Day Shipping(2 business days)</b> for status code :9 <b>APO/FPO – Military ONLY</b> for status code:10 <b>Newegg Premier 3 Days</b> for status code:11 <b>Newegg Premier 2 Days</b> for status code:12 <b>Newegg Premier Next Day</b> for status code:13

</NeweggAPIResponse>

```

Example: Json, Response

```

{
  "NeweggAPIResponse": {
    "IsSuccess": "true",
    "sellerID": "A006",
    "OperationType": "InternationalPriceReportResponse",
    "ResponseBody": {
      "RequestID": "2PQC13C7UYDPQ",
      "RequestType": "INTERNATIONAL_PRICE_REPORT",
      "RequestDate": "2/21/2012 15:32:57",
      "ReportFileURL": "ftp://API-
e6C12FfE:M9RUTm2s@ftp03.newegg.com/InternationalPriceReport_2PQC13C7UYDPQ.xls"
    },
    "Memo": null
  }
}

```

## Newegg Premier Item Report

Attribute		Format	Description
NeweggAPIResponse	IsSuccess	String	Used to identify the operation is successful. Returns true or false.
	SellerID	String	Your seller ID
	OperationType	String	Fixed value: PremierItemReportResponse
	SellerID	String	Your seller ID
	Response	RequestID	You request ID
	RequestType	String	PREMIER_ITEM_REPORT
	RequestDate	String	You request datetime(Pacific Standard Time)

		ReportFileURL	string	The ftp file path, where you can get the report result file. For example: ftp://API- 52qNFIUQ:pKLgE2aE@ftp03.newegg.com/PremierItemReport_2PN75DT8ZICH8.txt
	Memo	String		Additional Information.

Example: XML, Response

## XSD

API Schema > ReportMgmt > GetReport > PremierItemResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>
  <sellerID>A006</sellerID>
  <OperationType>PremierItemReportResponse</OperationType>
  <ResponseBody>
    <RequestID>2PQC13C7UYDPQ</RequestID>
    <RequestType>Premier_ITEM_REPORT</RequestType>
    <RequestDate>2/21/2012 15:32:57</RequestDate>
    <ReportFileURL>ftp://API-e6C12FfE:M9RUtms@ftp03.newegg.com/PremierItemReport_2PQC13C7UYDPQ.xls</ReportFileURL>
  </ResponseBody>
  <Memo />
</NeweggAPIResponse>
```

Example: Json, Response

```
{
  "NeweggAPIResponse": {
    "IsSuccess": "true",
    "sellerID": "A006",
    "OperationType": "PremierItemReportResponse",
    "ResponseBody": {
      "RequestID": "2PQC13C7UYDPQ",
      "RequestType": "Premier_ITEM_REPORT",
      "RequestDate": "2/21/2012 15:32:57",
      "ReportFileURL": "ftp://API-e6C12FfE:M9RUtms@ftp03.newegg.com/PremierItemReport
2PQC13C7UYDPQ.xls"
    },
    "Memo": null
  }
}
```

```
    }  
}
```

#### 14.3.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors>  
  <Error>  
    <Code>CE001</Code>  
    <Message>SellerID cannot be null or empty</Message>  
  </Error>  
</Errors>
```

Example: Json, Response

```
{  
  "Code": "CE001",  
  "Message": "SellerID cannot be null or empty"  
}
```

# 15. Seller Management

The Seller Management service group contains functions that will allow you to get reference information you may need to use some of the functions in Newegg API.

## 15.1. Get Industry List

Get the list of industry that is currently on Newegg Marketplace. Response contains Industry Code and Industry Name.

### 15.1.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/sellermgmt/seller/industry?sellerid={sellerid}&industrycode={industrycode}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace
industrycode	No	Industry code.  If you don't specify this parameter, system will return all industries.

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
GET	Required	XML, Json	XML, Json	1000 per min per client

### 15.1.2. Request Body

#### Example: XML, Request

```
GET https://api.newegg.com/marketplace/sellermgmt/seller/industry?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml
```

#### Example: Json, Request

```

GET https://api.newegg.com/marketplace/sellermgmt/seller/industry?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

```

### 15.1.3. Response Body

Attribute				Format	Description
NeweggAPIResponse	IsSuccess			String	Used to identify the operation of Get feed status is successful True or False
	OperationType			String	Fixed value: GetSellerIndustryResponse
	SellerID			String	Your seller ID
	ResponseBody	IndustryList	Industry	IndustryCode	String The industry code
				IndustryName	String The industry name

Example: XML, Response

### XSD

```
API Schema > SellerMgmt > GetIndustry > GetIndustryResponse.xsd
```

```

<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>
  <OperationType>GetSellerIndustryResponse</OperationType>
  <SellerID>A006</SellerID>
  <ResponseBody>
    <IndustryList>
      <Industry>
        <IndustryCode>AP</IndustryCode>
        <IndustryName>Apparel</IndustryName>
      </Industry>
      <Industry>
        <IndustryCode>AL</IndustryCode>
        <IndustryName>Appliance</IndustryName>
      </Industry>
    </IndustryList>
  </ResponseBody>
</NeweggAPIResponse>

```

```

</Industry>
</IndustryList>
</ResponseBody>
</NeweggAPIResponse>

```

#### Example: Json, Response

```

{
  "IsSuccess": "true",
  "OperationType": "GetSellerIndustryResponse",
  "SellerID": "A006",
  "ResponseBody": {
    "IndustryList": [
      {
        "IndustryCode": "AP",
        "IndustryName": "Apparel"
      },
      {
        "IndustryCode": "AL",
        "IndustryName": "Appliance"
      }
    ]
  }
}

```

#### 15.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
DF008	Invalid industry code [{0}].

#### Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
  <Error>
    <Code>DF008</Code>
    <Message>Invalid industry code ABC</Message>
  </Error>

```

```
</Errors>
```

Example: Json, Response

```
{
  "Code": "DF008",
  "Message": "Invalid industry code ABC"
}
```

## 15.2. Get Subcategory Status

Get the subcategory status for the specified seller account. Subcategory is either enabled or not enabled for a seller.

### 15.2.1. Resource URL & Information

Resource URL

```
https://api.newegg.com/marketplace/sellermgmt/seller/subcategory?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

### 15.2.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest	OperationType		Yes	String	Fixed value: GetSellerSubcategoryRequest
	RequestBody	GetItemSubcategoryIDList	SubcategoryID	No	Subcategory ID. If this value is provided, then response will only contain information of the specified subcategory ID.

			IndustryCodeList	IndustryCode	No	String	Industry Code
			Enabled	No	Integer	Condition filter to specify the request by sub-category current status.  Available values: 0: Not Enabled 1: Enabled  If left blank, the response will return both Not Enabled and Enabled subcategories	

Example: XML, Request

## XSD

API Schema > SellerMgmt > GetSubcategory > GetSubcategoryRequest.xsd

```
PUT https://api.newegg.com/marketplace/sellermgmt/seller/subcategory?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

<NeweggAPIRequest>
  <OperationType>GetSellerSubcategoryRequest</OperationType>
  <RequestBody>
    <GetItemSubcategory>
      <SubcategoryIDList>
        <SubcategoryID>397</SubcategoryID>
      </SubcategoryIDList>
      <IndustryCodeList>
        <IndustryCode>CH</IndustryCode>
      </IndustryCodeList>
      <Enabled>1</Enabled>
    </GetItemSubcategory>
  </RequestBody>
</NeweggAPIRequest>
```

#### Example: Json, Request

```

PUT https://api.newegg.com/marketplace/sellermgmt/seller/subcategory?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

{
    "OperationType": "GetSellerSubcategoryRequest",
    "RequestBody": {
        "GetItemSubcategory": {
            "SubcategoryIDList": { "SubcategoryID": "397" },
            "IndustryCodeList": { "IndustryCode": "CH" },
            "Enabled": "1"
        }
    }
}

```

#### 15.2.3. Response Body

Attribute				Format	Description
NeweggAPIResponse	IsSuccess			String	Used to identify the operation of Get feed status is successful True or False
	OperationType			String	Fixed value: GetSellerSubcategoryResponse
	SellerID			String	Your seller ID
	ResponseBody	SubCategoryList	Subcategory	IndustryCode	The industry code
				IndustryName	The industry name
				SubcategoryID	The subcategory ID
				SubcategoryName	The subcategory name
				Enabled	The subcategory is enabled or not for this seller Available values; 0: Not Enabled 1: Enabled

#### Example: XML, Response

## XSD

API Schema > SellerMgmt > GetSubcategory > GetSubcategoryResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>
  <OperationType>GetSellerSubcategoryResponse</OperationType>
  <SellerID>A006</SellerID>
  <ResponseBody>
    <SubcategoryList>
      <Subcategory>
        <IndustryCode>AP</IndustryCode>
        <IndustryName>Apparel</IndustryName>
        <SubcategoryID>1508</SubcategoryID>
        <SubcategoryName> <! [CDATA[Belts & Suspenders]]></SubcategoryName>
        <Enabled>1</Enabled>
      </Subcategory>
      <Subcategory>
        <IndustryCode>AP</IndustryCode>
        <IndustryName>Apparel</IndustryName>
        <SubcategoryID>153</SubcategoryID>
        <SubcategoryName> <! [CDATA[Buckles]]></SubcategoryName>
        <Enabled>0</Enabled>
      </Subcategory>
    </SubcategoryList>
  </ResponseBody>
</NeweggAPIResponse>
```

Example: Json, Response

```
{
  "IsSuccess": "true",
  "OperationType": "GetSellerSubcategoryResponse",
  "SellerID": "A006",
  "ResponseBody": {
    "SubcategoryList": [
      {
        "IndustryCode": "AP",
        "IndustryName": "Apparel",
        "SubcategoryID": "1508",
        "SubcategoryName": "Belts & Suspenders"
      },
      {
        "IndustryCode": "AP",
        "IndustryName": "Apparel",
        "SubcategoryID": "153",
        "SubcategoryName": "Buckles"
      }
    ]
  }
}
```

```

        "SubcategoryName": "Belts & Suspenders",
        "Enabled": "1"
    },
    {
        "IndustryCode": "AP",
        "IndustryName": "Apparel",
        "SubcategoryID": "153",
        "SubcategoryName": "Buckles",
        "Enabled": "0"
    }
]
}

```

#### 15.2.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
DF008	Invalid industry code [{0}].

Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>DF008</Code>
        <Message>Invalid industry code ABC</Message>
    </Error>
</Errors>

```

Example: Json, Response

```
{
    "Code": "DF008",
    "Message": "Invalid industry code ABC"
}
```

## 15.3. Download Feed Schema

Download the schema of specified feed type. You can download schema files for Item Creation, Inventory Update or Order Shipping.

### 15.3.1. Resource URL & Information

#### Resource URL

`https://api.newegg.com/marketplace/sellermgmt/seller/feedschema?sellerid={sellerid}`

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	10 per min per client

### 15.3.2. Request Body

Attribute	Required?	Format	Description
≥ OperationType	Yes	String	Fixed value: GetFeedSchemaRequest

		FeedType	Yes	Integer	<p>The feed schema type which you want to download from our system.</p> <p>Current only support the following:</p> <ul style="list-style-type: none"> <li>1:ITEM_DATA – The schema for batch create item / update item / update and/or append image to item(s).</li> <li>2: INVENTORY_AND_PRICE_DATA – The schema for batch update inventory/price.</li> <li>3: ORDER_SHIP_NOTICE_DATA – The schema for batch ship order.</li> <li>4: ITEM_BATCH_UPDATE – The schema for batch item update. The schema for batch updating the basic information for items under multiple subcategories at a time. This template can only be used to update common fields: (i.e. “Website Short Title”, “Product Description”, “Item Images”, etc.)</li> <li>5: MULTICHANNEL_ORDER_DATA – The schema for batch create multi-channel order.</li> <li>6: ITEM_DATA_UPCMATCH – A simplified version of item creation. This can be used to create items that exist on Newegg.com.</li> <li>7: ITEM_PROMOTION_DATA – The schema for batch create item promotion requests.</li> <li>8: VOLUME_DISCOUNT_DATA – The schema for batch create/update/delete volume discount.</li> <li>9: INVENTORY_DATA - Through this type you can batch update inventory.</li> <li>10: PRICE_DATA - Through this type you can batch update price.</li> <li>11: ITEM_PREMIER_MARK_DATA – The schema for batch add/remove item for Newegg Premier Program</li> </ul>
RequestBody	GetFeedSchema				

			IndustryCode	Yes if FeedType=ITEM_DATA	String	The industry code which the ITEM_DATA schema belongs to.  You can get the industry code through <a href="#">GET Industry List</a> function.
--	--	--	--------------	------------------------------	--------	---

Example: XML, Request

## XSD

API Schema > SellerMgmt > GetSchema > GetSchemaRequest.xsd

```
PUT https://api.newegg.com/marketplace/sellermgmt/seller/feedschema?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/octet-stream

<NeweggAPIRequest>
<OperationType>GetFeedSchemaRequest</OperationType>
<RequestBody>
    <GetFeedSchema>
        <FeedType>1</FeedType>
        <IndustryCode>BA</IndustryCode>
    </GetFeedSchema>
</RequestBody>
</NeweggAPIRequest>
```

Example: Json, Request

```
PUT https://api.newegg.com/marketplace/sellermgmt/seller/feedschema?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/octet-stream

{
    "OperationType": "GetFeedSchemaRequest",
    "RequestBody": {
        "GetFeedSchema": {
            "FeedType": "1",
```

```
        "IndustryCode": "BA"  
    }  
}  
}
```

### 15.3.3. Response Body

Newegg compressed schema file(s) before returning it as a Base64-encoded string. To obtain this package, you must decode the Base64-encoded string, save it as binary file with a ".zip" extension, and then exact the schema files from the zip file.

### 15.3.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
DF008	Invalid industry code [{0}].

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors>  
    <Error>  
        <Code>DF008</Code>  
        <Message>Invalid industry code ABC</Message>  
    </Error>  
</Errors>
```

Example: Json, Response

```
{  
    "Code": "DF008",  
    "Message": "Invalid industry code ABC"  
}
```

## 15.4. Get Subcategory Properties

Get the subcategory properties for the specified subcategory.

### 15.4.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/sellermgmt/seller/subcategoryproperty?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

### 15.4.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest	RequestBody	Yes	String	Fixed value: GetSellerSubcategoryPropertyRequest

Example: XML, Request

#### XSD

```
API Schema > SellerMgmt > GetSubcategoryProperties > GetSubcategoryPropertiesRequest.xsd
```

```
PUT https://api.newegg.com/marketplace/sellermgmt/seller/subcategoryproperty?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

<NeweggAPIRequest>
  <OperationType>GetSellerSubcategoryPropertyRequest</OperationType>
  <RequestBody>
```

```

<SubcategoryID>1045</SubcategoryID>
</RequestBody>
</NeweggAPIRequest>

```

#### Example: Json, Request

```

PUT https://api.newegg.com/marketplace/sellermgmt/seller/subcategoryproperty?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

{
    "OperationType": "GetSellerSubcategoryPropertyRequest",
    "RequestBody": { "SubcategoryID": "1045" }
}

```

#### 15.4.3. Response Body

Attribute							
NeweggAPIResponse	IsSuccess						
	OperationType						
	SellerID		String				
	ResponseBody	SubcategoryPropertyList	SubcategoryID				
			Integer				
	SubcategoryProperty	PropertyName	SubcategoryName				
			String				
	IsAdvancedSearch	IsGroupBy	PropertyName				
			String				
			Integer				
	IsAdvancedSearch						
Will this property be showing up in the advance search navigation?							
Available values:							
0: No							
1: Yes							
Is this a group by property?							
Available values:							
0: No							
1: Yes							

				IsRequired	Integer	Is this a required property? Available values: 0: No 1: Yes
--	--	--	--	------------	---------	--

Example: XML, Response

## XSD

API Schema > SellerMgmt > GetSubcategoryProperties > GetSubcategoryPropertiesResponse.xsd

```
<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>
  <OperationType>GetSellerSubcategoryPropertyResponse</OperationType>
  <SellerID>A006</SellerID>
  <ResponseBody>
    <SubcategoryPropertyList>
      <SubcategoryProperty>
        <SubcategoryID>1045</SubcategoryID>
        <SubcategoryName><! [CDATA[Costumes] ]></SubcategoryName>
        <PropertyName><! [CDATA[Costume_Brand] ]></PropertyName>
        <IsAdvancedSearch>0</IsAdvancedSearch>
        <IsGroupBy>0</IsGroupBy>
        <IsRequired>0</IsRequired>
      </SubcategoryProperty>
      <SubcategoryProperty>
        <SubcategoryID>1045</SubcategoryID>
        <SubcategoryName><! [CDATA[Costumes] ]></SubcategoryName>
        <PropertyName><! [CDATA[Costume_Model] ]></PropertyName>
        <IsAdvancedSearch>1</IsAdvancedSearch>
        <IsGroupBy>1</IsGroupBy>
        <IsRequired>1</IsRequired>
      </SubcategoryProperty>
    </SubcategoryPropertyList>
  </ResponseBody>
</NeweggAPIResponse>
```

#### Example: Json, Response

```
{  
    "IsSuccess": "true",  
    "OperationType": "GetSellerSubcategoryPropertyResponse",  
    "SellerID": "A006",  
    "ResponseBody": {  
        "SubcategoryPropertyList": [  
            {  
                "SubcategoryID": "1045",  
                "SubcategoryName": "Costumes",  
                "PropertyName": "Costume_Brand",  
                "IsAdvancedSearch": "0",  
                "IsGroupBy": "0",  
                "IsRequired": "0"  
            },  
            {  
                "SubcategoryID": "1045",  
                "SubcategoryName": "Costumes",  
                "PropertyName": "Costume_Model",  
                "IsAdvancedSearch": "1",  
                "IsGroupBy": "1",  
                "IsRequired": "1",  
            }  
        ]  
    }  
}
```

#### 15.4.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
DF009	Invalid subcategory ID [{0}].

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors>  
    <Error>
```

```
<Code>DF009</Code>
<Message>Invalid subcategory ID ABC</Message>
</Error>
</Errors>
```

Example: Json, Response

```
{
  "Code": "DF009",
  "Message": "Invalid subcategory ID ABC"
}
```

## 15.5. Get Subcategory Property Values

Get the subcategory property value for the specified property.

### 15.5.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/sellermgmt/seller/propertyvalue?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

## 15.5.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest RequestBody	OperationType	Yes	String	Fixed value: GetSellerPropertyValueRequest
	SubcategoryId	No	Integer	Subcategory ID.  If left blank, returns the property information for all applied subcategories.
	PropertyName	Yes	String	Property Name.

Example: XML, Request

XSD

API Schema > SellerMgmt > GetSubcategoryPropertyValue > GetSubcategoryPropertyValueRequest.xsd

```

#### 15.5.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

### 15.6. Seller Status Check

Get the seller account status.

#### 15.6.1. Resource URL & Information

Resource URL

```
https://api.newegg.com/marketplace/sellermgmt/seller/accountstatus?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
GET	Required	XML, Json	XML, Json	1000 per min per client

#### 15.6.2. Request Body

Example: XML, Request

```
GET https://api.newegg.com/marketplace/sellermgmt/seller/accountstatus?sellerid={sellerid}
```

```

Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/xml
Accept: application/xml

```

#### Example: Json, Request

```

GET https://api.newegg.com/marketplace/sellermgmt/seller/accountstatus?sellerid={sellerid}
Authorization: 720ddc067f4d115bd544aff46bc75634
SecretKey: 21EC2020-3AEA-1069-A2DD-08002B30309D
Content-Type: application/json
Accept: application/json

```

### 15.6.3. Response Body

Attribute		Format	Description
NeweggAPIResponse	IsSuccess	String	Used to identify the operation of Get feed status is successful True or False
	OperationType	String	Fixed value: GetSellerAccountStatusResponse
	SellerID	String	Your seller ID
	SellerName	String	The seller's name
		String	The seller account's status Available values: Active Suspended InActive Terminated Closed

#### Example: XML, Response

#### XSD

```
API Schema > SellerMgmt > SellerStatusCheck > GetSellerAccountStatusResponse.xsd
```

```

<?xml version="1.0" encoding="utf-8"?>
<NeweggAPIResponse>
  <IsSuccess>true</IsSuccess>

```

```
<OperationType>GetSellerAccountStatusResponse</OperationType>
<SellerID>A006</SellerID>
<ResponseBody>
  <SellerName><! [CDATA[Test_MKTPLS] ]></SellerName>
  <Status>Suspended</Status>
</ResponseBody>
</NeweggAPIResponse>
```

Example: Json, Response

```
{
  "IsSuccess": "true",
  "OperationType": "GetSellerAccountStatusResponse",
  "SellerID": "A006",
  "ResponseBody": {
    "SellerName": "Test_MKTPLS",
    "Status": "Suspended"
  }
}
```

#### 15.6.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

## 16. SBN (Shipped by Newegg) Management

The SBN (Shipped by Newegg) Management service group is designed to help you send your inventory to one of Newegg's warehouse. Once your inventory is in a Newegg's warehouse, you will be able to sell your items on Newegg, or you can sell the products on different channels then use Shipped by Newegg to ship your orders.

### 16.1. Get Inbound Shipment Plan Suggestion

Create an inbound shipment plan suggestion to identify the shipments of the items that you want to send to Newegg warehouse. By submitting the inbound shipment plan suggestion request, Newegg will provide the appropriate ship arrangement based on Newegg's business intelligence. This will make your items allocation more reasonable and competitive.

### 16.1.1. Resource URL & Information

#### Resource URL

```
https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/plansuggestion?sellerid={sellerid}
```

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

### 16.1.2. Request Body

Attribute			Required?	Format	Description
NeweggAPIRequest	OperationType		Yes	String	Fixed value: GetPlanSuggestionRequest
	RequestBody	PlanSuggestion	SellerPartNumber	String	Seller part number.
	ItemList	Item	PlannedQuantity	Integer	The total quantity of the specified item you want to send to Newegg's warehouse.
			QuantityPerCarton	Integer	The carton capacity for this item.  If fill this element, we will return the suggested number of cartons for you reference.

Example: XML, Request

#### XSD

```
API Schema > SBNMgmt > GetInboundShipmentPlan > GetInboundShipmentPlanRequest.xsd
```

```
PUT https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/plansuggestion?sellerid={sellerid}

#### 16.1.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SBN002	Invalid Seller Part # :{sellerpart#}.
SBN003	Seller Part # :{sellerpart#} is marked as Shipped by Seller now, please convert this item to Shipped by Newegg and try again.

Example: XML, Response

```

<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>

```

```

<Code>DF008</Code>
<Message>Invalid industry code ABC</Message>
</Error>
</Errors>

```

Example: Json, Response

```
{
  "Code": "DF008",
  "Message": "Invalid industry code ABC"
}
```

## 16.2. Submit Inbound Shipment Request

Submit a request to Newegg for:

- Creating a new inbound shipment based on the information that was returned by the Get Inbound Shipment Plan Suggestion.
- Updating existing shipment based on assigned Shipment ID.

### 16.2.1. Resource URL & Information

#### Resource URL

<a href="https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/shipmentrequest?sellerid={sellerid}">https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/shipmentrequest?sellerid={sellerid}</a>
---

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
POST	Required	XML, Json	XML, Json	100 per min per client

### 16.2.2. Request Body

#### Create Inbound Shipment

Attribute		Required?	Format	Description
NeweggAPIRequest RequestBody Shipment	OperationType	Yes	String	The value is fixed, will always be "SubmitShipmentRequest"
	ActionCode	Yes	Integer	Action code: 1.Create
	ShipFromAddress1	No	String	Ship from address1.  If left blank, will use seller's primary address.
	ShipFromAddress2	No	String	Ship from address2  If left blank, will use seller's primary address.
	ShipFromCity	No	String	Ship from city.  If left blank, will use seller's primary address.
	ShipFromState	No	String	Ship from state  If left blank, will use seller's primary address.
	ShipFromZipcode	No	String	Ship from zip code  If left blank, will use seller's primary address.
	ShipFromCountry	No	String	Ship from country code  If left blank, will use seller's primary address.
	ShipFromPhoneNumber	No	String	Ship from location contact phone number
	ShipToWarehouseCode	Yes	String	Which Newegg warehouse you want to ship to. Currently available Newegg warehouse: 06: Tennessee Bulk Warehouse 07: California Small Warehouse 08: California Bulk Item Warehouse 10: New Jersey Bulk Warehouse 14: New Jersey Small Warehouse

		ShippingMethodCode	Yes	Integer	<p>Which shipping method you will be using for this shipment?</p> <p>Available values:</p> <p>1: Small Parcel Delivery(Individual boxes: consist of units packed in individual boxes and individually labeled for delivery)</p> <p>2: Less Than Truckload(LTL, Pallets, Shipment at least 150 lbs:shipment combines individual boxes on pallets for delivery)</p>
		ShippingCarrierCode	Yes	Integer	<p>Which shipping carrier you will be using for this shipment?</p> <p>If ShippingMethodCode = 1:</p> <p>101: DHL</p> <p>102: FedEx</p> <p>103: UPS</p> <p>104: USPS</p> <p>105: Newegg Partnered Carrier(UPS). For more information, please refer to <a href="#">section 15.2.5: Newegg Partnered Carrier- UPS.</a></p> <p>99: Other</p> <p>If ShippingMethodCode = 2, the only acceptable value is: 99. Other</p>
		OtherCarrierName	Yes if = ShippingCarrierCode = 99	String	Provide the shipping carrier name you will be using if ShippingCarrierCode = 99.
Packagelist	Package	TrackingNumber	No	String	Tracking number in this shipment
		PackageWeight	Yes if ShippingCarrierCode = 105	Decimal	<p>Package weight</p> <p>See <a href="#">Shipments Weight and Size Limitations</a> for more details.</p>
		PackageLength	Yes if ShippingCarrierCode = 105	Decimal	<p>Package length</p> <p>See <a href="#">Shipments Weight and Size Limitations</a> for more details.</p>

			PackageHeight	Yes if ShippingCarrierCode = 105	Decimal	Package height See <a href="#">Shipments Weight and Size Limitations</a> for more details.
			PackageWidth	Yes if ShippingCarrierCode = 105	Decimal	Package width See <a href="#">Shipments Weight and Size Limitations</a> for more details.
ItemList	Item		sellerPartNumber	Yes	String	Seller part number.
			Quantity	Yes	Integer	Item quantity
			NumberofPackage	No	Integer	Number of package labels.  If left blank, will return 1 package label.
			ORM-D	No	Integer	1: Yes 0: No  If left blank, will treat it as 0.  ORM-D is a marking for mail or shipping in the United States that identifies other regulated materials for domestic transport only. Packages bearing this mark contain hazardous material in a limited quantity that presents a limited hazard during transportation, due to its form, quantity, and packaging. Please select ORM-D checkbox if applicable. A material safety data sheet must be uploaded for ORM-D items. Examples of ORM-D items: - Aerosol cans - Automotive batteries - Perfumes - Small arms ammunition - Gunpowder (black powder) - Some photographic chemicals - Lighters - Beer - Drain openers

				MSDSURL	Yes if ORM-d = 1	String	<p>Please specify the local path where the Material Safety Data Sheet file located.</p> <p>Enter the URL for this product's Material Safety Data Sheet File. All URLs must be a direct link to the actual file. File must be (pdf, jpg, jpeg, png, doc, docx, xls or xlsx). An alphanumeric string; 2000 characters maximum in length.</p> <p>The maximum file size is 10MB. All files larger than the 10MB limit will fail to process.</p>

    <RequestDate>06/06/2013 10:21:00</RequestDate>
    <RequestStatus>SUBMITTED</RequestStatus>
  </ResponseBody>
</NeweggAPIResponse>
```

Example: Json, Response

```
{
  "IsSuccess": true,
  "OperationType": "SubmitShipmentResponse",
  "SellerID": "A006",
  "ResponseBody": {
    "RequestID": "Z2OTIV1AVVBJ",
    "RequestDate": "07/11/2013 17:24:46",
    "RequestStatus": "SUBMITTED"
  }
}
```

#### 16.2.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description
SBN001	Delivery to the Newegg warehouse: {ShipToWarehouseCode} of Seller Part # {SellerPart#} is not available. Please submit a Get Inbound Shipment Plan request to receive the information of available option(s).
SBN002	Invalid Seller Part # :{sellerpart#}.
SBN003	Seller Part # :{sellerpart#} is marked as Shipped by Seller now, please convert this item to Shipped by Newegg and try again.
SBN004	Invalid Shipment ID:{ShipmentID}
SBN005	Cannot void Shipment: [ShipmentID]. Shipment using Newegg Partnered Carrier service cannot be void 48 hours after pre-paid shipping label created.
SBN006	Cannot void Shipment: [ShipmentID]. Shipment cannot be void because it is marked as [Received or Partially Received or Manually closed or Voided]
SBN007	The field: [PackageWeight or PackageLength or PackageHeight or PackageWidth ] is required when using Newegg Partnered Carrier service (ShippingCarrierCode:105). For more detail, please review Newegg API Development Guide, SBN section.
SBN008	The value in the field: PackageWeight cannot exceed 150 lbs. (70 kg) when using Newegg Partnered Carrier service (ShippingCarrierCode:105). For more detail, please review Newegg API Development Guide, SBN section.
SBN009	The value in the field: PackageLength cannot exceed 108 inches (270 cm) when using Newegg Partnered Carrier service (ShippingCarrierCode:105). For more detail, please review Newegg API Development Guide, SBN section.
SBN010	Package size cannot exceed 165 inches (419 cm) in (Package Length + 2x Package Width + 2x Package Height) when using Newegg Partnered Carrier service (ShippingCarrierCode:105). For more detail, please review Newegg API Development Guide, SBN section.
SBN011	The field: OtherCarrierName is required when Shipping Carrier is Other (ShippingCarrierCode: 99). For more detail, please review Newegg API Development Guide, SBN section.
SBN012	The value in the field of ShippingCarrier can only be Other (ShippingCarrierCode: 99) when the ShippingMethodCode= 2. For more detail, please review Newegg API Development Guide, SBN section.
SBN013	Newegg Partnered Carrier service (ShippingCarrierCode: 105) is not available for international sellers.
SBN014	Package Dimension Weight cannot exceed 150 lbs.(70kg) in (Package Length x Package Width x Package Height/166) when using Newegg Partnered Carrier service (ShippingCarrierCode:105). For more detail, please review Newegg API Development Guide, SBN section.
SBN015	The field:[MSDSURL] is required when ORM-D = 1. For more detail, please contact datafeeds@newegg.com.

Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>
<Errors>
    <Error>
        <Code>DF008</Code>
        <Message>Invalid industry code ABC</Message>
    </Error>
```

```
</Errors>
```

Example: Json, Response

```
{  
    "Code": "DF008",  
    "Message": "Invalid industry code ABC"  
}
```

### 16.2.5. Newegg Partnered Carrier- UPS

Newegg partnered carriers offer deeply discounted rates, and the cost is billed to your account as an “SBN Inbound Fee”. We will provide a shipping label that you can print and use with our partnered carriers. The rates apply to shipments originating from the continental 50 U.S. states only (does not include Puerto Rico or APO/FPO addressed). Please note this service is currently not available for International Sellers.

#### Shipment Measurement Guidelines

##### - Shipments Weight and Size Limitations.\*

- Packages can be up to 150 lbs. (70 kg).
- Packages can be up to 165 inches (419 cm) in (Length + 2x Width + 2x Height).
- Packages can be up to 108 inches (270 cm) in Length.

\*Packages with a large size-to-weight ratio require special pricing and dimensional weight calculations.

Example: A box measuring 34" x 34" x 34" exceeds the maximum dimensions. The length (34") plus 2x width (2 x 34") and 2x height (2 x 34") equals 170".

##### - Large Package

If packages Length plus 2x Width plus 2x Height exceeds 130 inches (330 cm), UPS applies a Large Package Surcharge.

Example: A box measuring 36" x 26" x 26" the length (36") plus 2x width (2 x 26") and 2x height (2 x 26") equals 140".

UPS will accept the box, but they may apply a Large Package Surcharge.

##### - Dimensional Weight

If a package's volume is more than 5,184 cubic inches (3 cubic feet), UPS compares the dimensional weight (cubic inches divided by 166) with the actual weight. If the dimensional weight is greater than actual weight, UPS uses the package's dimensional weight as the billable weight.

Example: A package measuring 26" x 16" x 16" has a volume of 6,656 cubic inches. The dimensional weight equals 6,656 divided by 166 or 41 lbs. If the package's actual weight is 24 lbs., the dimensional weight may be used for the billable weight.

##### - Billable Weight

For large packages, UPS determines the billable weight by taking the package dimensions into account. For large packages, if the dimensional weight is greater than the actual weight, UPS may use the dimensional weight instead of the actual weight.

## 16.3. Get Inbound Shipment Status Request

Get the status of specified inbound shipment.

### 16.3.1. Resource URL & Information

#### Resource URL

<a href="https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/shipmentstatus?sellerid={sellerid}">https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/shipmentstatus?sellerid={sellerid}</a>
---

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

#### Parameters

Name	Required?	Description
sellerId	Yes	Your seller ID on Newegg Marketplace

#### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

### 16.3.2. Request Body

Attribute			Required?	Format	Description	
NeweggAPIRequest	OperationType		Yes	String	The value is fixed, will always be "GetShipmentStatusRequest"	
	RequestBody	GetRequestStatus	RequestID	No	String	The Identifier of a submission. Other condition will be ignored if Request ID has been specified.
			ActionCode	No	Integer	Available values for action code: 0: All(Default) 1: Create 2: Void
	MaxCount		No	Integer	The maximum return records. Default is 100. If you specified over than 100, the system still return 100 records.	

		RequestStatus	No	String	The status of the submitted request. Available values: ALL (Default) SUBMITTED IN_PROGRESS FINISHED CANCELLED
		RequestDateFrom	No	DateTime	Search by request date range. (Pacific Standard Time) Please refer to the Acceptable Date Format
		RequestDateTo	No	DateTime	Search by request date range. (Pacific Standard Time) Please refer to the Acceptable Date Format

Example: XML, Request

## XSD

API Schema > SBNMgmt > GetInboundShipmentStatus > GetShipmentStatusRequest.xsd

#### 16.4.4. Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

### 16.5. Get Inbound Shipment List

Get the inbound shipment list of a specified Shipment ID or certain time period.

#### 16.5.1. Resource URL & Information

##### Resource URL

<a href="https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/shipmentlist?sellerid={sellerid}">https://api.newegg.com/marketplace/sbnmgmt/inboundshipment/shipmentlist?sellerid={sellerid}</a>
---

Note: Please make sure your request URL is all in lower case (except for Seller ID) and cannot contain any blank spaces or line breaks.

##### Parameters

Name	Required?	Description
sellerid	Yes	Your seller ID on Newegg Marketplace

##### Resource Information

HTTP Method	Authentication?	Request Formats	Response Formats	Rate Limited?
PUT	Required	XML, Json	XML, Json	1000 per min per client

## 16.5.2. Request Body

Attribute		Required?	Format	Description
NeweggAPIRequest RequestBody	OperationType		Yes	String The value is fixed, will always be "GetShipmentListRequest"
	PageInfo	PageIndex	Yes	Integer Current page index. Default is 1.
		PageSize	Yes	Integer How many records in a page. (Max is 100 per page)
	KeywordsType		No	Integer 0. All (Default) 1. Shipment ID 2. Newegg Item Number 3. Seller Part Number
	KeywordsValue		No	String The keywords value of the specified type
	Status		No	Integer 0. All (Default) 1. Preparing 2. Shipped 3. Received 4. Partially Received 5. Manually closed 6. Voided
	LastUpdateDateFrom		No	String Get all shipments whose last update date starts from this date. (Pacific Standard Time) Please refer to the Acceptable Date Format  Please note if both LastUpdateDateFrom and LastUpdateDateTo are empty, will use last 30 days instead.
	LastUpdateDateTo		No	String Get all shipments whose last update date ends from this date (Include this day). (Pacific Standard Time) Please refer to the Acceptable Date Format

Example: XML, Request

}

```

### 16.5.3. Response Body

Attribute				Format	Description
NeweggAPIResponse	ResponseBody	ShipmentList	Shipment	IsSuccess	String Used to identify the operation of Get feed status is successful True or False
				OperationType	String Fixed value: GetShipmentListResponse
				SellerID	String Your seller ID
				ShipmentID	String Shipment ID
				Status	String Shipment's status:  Creating – shipment is creating at backend. (I'm going to remove) Preparing – user can work on shipment. Ready to ship – shipment is ready to ship. Shipped – shipment has been shipped out. Partially Received – warehouse received a part of shipment. Received – warehouse received whole shipment already. Void – shipment has been voided. Manually closed – shipment is manually closed which is over 3 month and still no received.
				CreateDate	String Shipment create date
				LastEditDate	String Last edit date
				ShipFrom	String Ship from name. Default value: seller's store name.

			ShipToWarehouseCode	String	Ship to warehouse code Currently available Newegg warehouse code in united states: 06. -Tennessee Bulk Warehouse 07. -California Small Warehouse 08. -California Bulk Item Warehouse 10. -New Jersey Bulk Warehouse 14. -New Jersey Small Warehouse
			ShipToAddress1	String	Ship to address 1
			ShipToAddress2	String	Ship to address 2
			ShipToCityName	String	Ship to city name
			ShipToStateCode	String	Ship to state code. Example: CA -> California
			ShipToZipCode	String	Ship to zip code
			ShipToCountryCode	String	Ship to country code
			ShippingMethodCode	Integer	The shipping method you specified for this shipment.  1. Small Parcel Delivery (Individual boxes: consist of units packed in individual boxes and individually labeled for delivery) 2. Less Than Truckload (LTL, Pallets, Shipment at least 150 lbs: shipment combines individual boxes on pallets for delivery)
			ShippingCarrierCode	Integer	The shipping carrier you used for this shipment.  If ShippingMethodCode = 1: 101.DHL 102.FedEx 103.UPS 104.USPS 105. <a href="#">Newegg Partnered Carrier(UPS)</a> 99.Other  If ShippingMethodCode = 2: 99.Other
			OtherCarrierName	String	The shipping carrier name you provided if ShippingCarrierCode = 99.
PackageList	Package	TrackingNumber	String	The number for tracking your package.	
		PackageWeight	Decimal	Package weight	
		PackageLength	Decimal	Package length	

					PackageHeight	Decimal	Package height
					PackageWidth	Decimal	Package width
	ItemList	Item		SellerPartNumber	String	Seller part number	
				Quantity	Integer	Item quantity	
				NumberofPackage	Integer	Number of package labels.

            }  
        ]  
    }  
}
```

## Request Failure Errors

For common HTTP error responses, please refer to [Common Error Responses](#)

Error Code	Description

#### Example: XML, Response

```
<?xml version="1.0" encoding="utf-8"?>  
<Errors>  
    <Error>  
        <Code>DF008</Code>  
        <Message>Invalid industry code ABC</Message>  
    </Error>  
</Errors>
```

#### Example: Json, Response

```
{  
    "Code": "DF008",  
    "Message": "Invalid industry code ABC"  
}
```

# Appendix

## 1. Common Request Headers

Name	Required?	Description
Accept	No	The content type of the response resource Type: String Default: application/json
Accept-Language	No	The information for localization Type: String Default: en-US
Authorization	Yes	The information required for request authentication Type: String Default: None
Content-Length	Conditional	Length of the message (without the headers) according to RFC 2616 Type: String Default: None Condition: Required for PUTs and operations that load XML
Content-Type	No	The content type of the resource. Example: application/json Type: String Default: None
Date	Yes	The current date and time according to the requester. Example: Wed, 01 Mar 2009 12:00:00 GMT Type: String Default: None

## 2. Failed Response Error Code List

### 2.1. General HTTP error code

Error Code	Description
400	The request cannot be fulfilled due to bad syntax
401	Unauthorized. Similar to 403 Forbidden, but specifically used when authentication is possible but has failed or has not yet been provided.

	The response must include a WWW-Authenticate header field containing a challenge applicable to the requested resource.
403	<p><b>Forbidden.</b></p> <p>The request was a valid request, but the server is refusing to respond to it. Unlike a 401 Unauthorized response, authenticating will make no difference.</p>
405	The method specified in the Request-Line is not allowed for the resource identified by the Request-URI. The response MUST include an Allow header containing a list of valid methods for the requested resource.
404	<p><b>Not Found.</b></p> <p>The requested resource could not be found but may be available again in the future. Subsequent requests by the client are permissible.</p>
409	<p><b>Conflict.</b></p> <p>Indicates that the request could not be processed because of conflict in the request, such as an edit conflict.</p>
500	<p><b>Internal Server Error.</b></p> <p>A generic error message, given when no more specific message is suitable.</p>
501	<p><b>Not Implemented.</b></p> <p>The server either does not recognize the request method, or it lacks the ability to fulfill the request.</p>
503	<p><b>Service Unavailable.</b></p> <p>The server is currently unavailable (because it is overloaded or down for maintenance). Generally, this is a temporary state.</p>

## 2.2. Common Error Response

Error Code	Description
CE001	SellerID cannot be null or empty
CE002	Invalid SellerID
CE003	Format error. {parse error message}
CE004	The request type you specified is invalid.
CE006	Invalid Issue user.
CE007	The MaxCount (maximum return records) is invalid. Default is 100. If you specified over than 100, the system still return 100 records.
CE008	DateFrom is required.
CE009	DateTo is required.
CE010	Invalid Date From.
CE011	Invalid Date To.
CE012	System is currently processing your request, please wait a moment and try again.
CE013	No data found
CE014	<p>SellerNoRightError_{0}</p> <p>Available values:</p> <p>SellerNoRightError_suspended</p>

	SellerNoRightError_terminated SellerNoRightError_closed SellerNoRightError_new SellerNoRightError_holiday lock (NOTE: This error is to indicate the seller status that not able to submit any request)
CE016	Request cannot be processed because the current seller status is suspended.
CE017	Request cannot be processed because the current seller status is terminated.
CE018	Request cannot be processed because the current seller status is closed.
CE019	Request cannot be processed because the current seller status is new.
CE021	The DateTo should later than the DateFrom
CE022	System is currently experiencing heavy traffic in processing your request. Please wait a moment and try again.
CE023	The service is unavailable or experiencing extremely high error rates.
CE024	We sincerely apologize for the inconvenience. Newegg Marketplace API is currently under scheduled maintenance and upgrades but will return shortly (From {{begin time}} to {{end time}}). Thank you for your patience.

### 3. Acceptable Date Format

Date Format	Sample
YYYY-MM-DD HH:MM:SS	1998-02-23 14:23:05
